THE ASTROPHYSICAL JOURNAL

AUTHOR INDEX

PARTS 1 & 2, VOLUMES 456 –458

1996 JANUARY 1 TO FEBRUARY 20

ABHYANKAR, K. D. R Canis Majoris—Revisited. *M. B. K. Sarma, P. Vivekananda Rao, & K. D. Abhyankar.* 458, 371, 41-B3 (1996)

ABOASHA, ABDOSSALAM. The Stability Properties of Two-Temperature White Dwarf Radiative Shock Waves. *James N. Imamura, Abdossalam Aboasha, Michael T. Wolff, & Kent S. Wood.* 458, 327, 40-D13 (1996)

ABRAMOWICZ, MAREK A. The Observational Appearance of Slim Accretion Disks. *Ewa Szuszkiewicz, Matthew A. Malkan, & Marek A. Abramowicz.* 458, 474, 45-C6 (1996)

ABRAMOWICZ, MAREK ARTUR. Fast Rotation of Neutron Stars. *Jean-Pierre Lasota, Paweł Haensel, & Marek Artur Abramowicz.* 456, 300, 5-B3 (1996)

ADAMS, FRED C. Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

ADAMSON, A. J. See WHITTET, D. C. B., et al. Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices.

AGOL, ERIC. Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

AITKEN, D. K. See WHITTET, D. C. B., et al. Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices.

AKERLOF, C. W. See QUINN, J., et al. Detection of Gamma Rays with $E > 300$ GeV from Markarian 501.

AKESON, R. L. Millimeter Interferometric Polarization Imaging of the Young Stellar Object NGC 1333/IRAS 4A. *R. L. Akeson, J. E. Carlstrom, J. A. Phillips, & D. P. Woody.* 456, L45, 8-A1 (1996)

ALARD, C. Evidence for the Sagittarius Dwarf Galaxy at Low Galactic Latitudes. *C. Alard.* 458, L17, 42-F3 (1996)

ALLAMANDOLA, L. J. Spatial Variation of the 3.29 and 3.40 Micron Emission Bands within Reflection Nebulae and the Photochemical Evolution of Methylated Polycyclic Aromatic Hydrocarbons. *C. Joblin, A. G. G. M. Tielens, L. J. Allamandola, & T. R. Geballe.* 458, 610, 47-C2 (1996)

Assessment of the Polycyclic Aromatic Hydrocarbon–Diffuse Interstellar Band Proposal. *F. Salama, E. L. O. Bakes, L. J. Allamandola, & A. G. G. M. Tielens.* 458, 621, 47-D3 (1996)

ALONSO-HERRERO, A. An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

ALTUNIN, V. I. See BIETENHOLZ, M. F., et al. VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81.

ANDERSON, M. C. Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

ANDERSON, STEPHEN W. Ultraviolet Emission-Line Intensities and Coronal Heating by Velocity Filtration: Collisionless Results. *Stephen W. Anderson, John C. Raymond, & Adriaan van Ballegooijen.* 457, 939, 33-F14 (1996)

ANDERSON, STUART B. A Pulsar Survey of 18 Supernova Remnants. *Peter W. Gorham, Paul S. Ray, Stuart B. Anderson, Shrinivas R. Kulkarni, & Thomas A. Prince.* 458, 257, 39-E6 (1996)

ANTONUCCI, ESTER. Interpretation of the Observed Plasma "Turbulent" Velocities as a Result of Magnetic Reconnection in Solar Flares. *Ester Antonucci, Carlo Benna, & Boris V. Somov.* 456, 833, 15-A12 (1996)

ANTONUCCI, ROBERT. Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

AOKI, T. Detection of a Hard X-Ray Plerion in the Candidate Historical Remnant G11.2−0.3. *G. Vasisht, T. Aoki, T. Dotani, S. R. Kulkarni, & F. Nagase.* 456, L59, 8-B11 (1996)

ARENDT, PAUL N. The Synchrotron Spectrum of Diffuse Radio Sources: Effects of Particle and Field Distributions. *Jean A. Eilek & Paul N. Arendt.* 457, 150, 20-B7 (1996)

ARENDT, R. G. See WALL, W. F., et al. *COBE*/DIRBE Observations of the Orion Constellation from the Near- to Far-Infrared.

ARMITAGE, P. J. Dynamo-driven Accretion Disks and Dwarf Nova Eruptions. *P. J. Armitage, M. Livio, & J. E. Pringle.* 457, 332, 22-E1 (1996)

ARONS, JONATHAN. Photon Bubble Oscillations in Accretion-powered Pulsars. *Richard I. Klein, Jonathan Arons, Garrett Jernigan, & Juliana J.-L. Hsu.* 457, L85, 34-G6 (1996)

ARTEMOVA, I. V. Structure of Accretion Disks with Optically Thick–Optically Thin Transitions. *I. V. Artemova, G. S. Bisnovatyi-Kogan, G. Björnsson, & I. D. Novikov.* 456, 119, 2-E7 (1996)

ARTHUR, S. J. X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

ASHBY, M. L. N. A Massive $z = 0.088$ Supercluster and Tests of Starburst Galaxy Evolution at the North Ecliptic Pole. *M. L. N. Ashby, Perry B. Hacking, J. R. Houck, B. T. Soifer, & E. W. Weisstein.* 456, 428, 9-D8 (1996)

AUDLEY, M. D. A High-Resolution X-Ray Spectrum of Centaurus X-3. *M. D. Audley, R. L. Kelley, E. A. Boldt, K. M. Jahoda, F. E. Marshall, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, & K. A. Weaver.* 457, 397, 23-D4 (1996)

AVERSA, F. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BAAS, F. Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

BABUL, ARIF. Faint Blue Galaxies and the Epoch of Dwarf Galaxy Formation. *Arif Babul & Henry C. Ferguson.* 458, 100, 37-E1 (1996)

BAHCALL, JOHN N. The *Hubble Space Telescope* Quasar Absorption Line Key Project. VII. Absorption Systems at $z_{abs} \leq 1.3$. *John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, W. L. W. Sargent, Blair D. Savage, Donald P. Schneider, David A. Turnshek, Ray J. Weymann, & Arthur M. Wolfe.* 457, 19, 18-D11 (1996)

The Apparently Normal Galaxy Hosts for Two Luminous Quasars. *John N. Bahcall, Sofia Kirhakos, & Donald P. Schneider.* 457, 557, 28-E1 (1996)

Observational Searches for Solar g-Modes: Some Theoretical Considerations. *Pawan Kumar, Eliot J. Quataert, & John N. Bahcall.* 458, L83, 52-D4 (1996)

BAILES, M. A New Method for Obtaining Binary Pulsar Distances and Its Implications for Tests of General Relativity. *J. F. Bell & M. Bailes.* 456, L33, 7-F7 (1996)

BAKES, E. L. O. Assessment of the Polycyclic Aromatic Hydrocarbon–Diffuse Interstellar Band Proposal. *F. Salama, E. L. O. Bakes, L. J. Allamandola, & A. G. G. M. Tielens.* 458, 621, 47-D3 (1996)

BALIUNAS, SALLIE. Magnetic Field and Rotation in Lower Main-Sequence Stars: An Empirical Time-dependent Magnetic Bode's Relation? *Sallie Baliunas, Dmitry Sokoloff, & Willie Soon.* 457, L99, 35-B3 (1996)

BALIUNAS, SALLIE L. Variations of β Comae through a Magnetic Minimum. *David F. Gray, Sallie L. Baliunas, G. W. Lockwood, & Brian A. Skiff.* 456, 365, 6-A8 (1996)

BALLESTER, GILDA E. See HESTER, J. JEFF, et al. WFPC2 Studies of the Crab Nebula. III. Magnetic Rayleigh-Taylor Instabilities and the Origin of the Filaments.

BALLESTER, J. L. The Influence of the Temperature Profile on the Magnetohydrodynamic Modes of a Prominence-Corona System. *R. Oliver & J. L. Ballester.* 456, 393, 6-D3 (1996)

BAND, D. L. BATSE Gamma-Ray Burst Line Search. IV. Line Candidates from the Visual Search. *D. L. Band, S. Ryder, L. A. Ford, J. L. Matteson, D. M. Palmer, B. J. Teegarden, M. S. Briggs, W. S. Paciesas, G. N. Pendleton, & R. D. Preece.* 458, 746, 49-B3 (1996)

BARBIELLINI, G. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BARCONS, XAVIER. The Gaseous Extent of Galaxies and the Origin of Lyα Systems. II. Identification of a Group or Cluster of Lyα Absorbing Galaxies at $z \cong 0.26$. *Kenneth M. Lanzetta, John K. Webb, & Xavier Barcons.* 456, L17, 7-D4 (1996)

BARLOW, THOMAS A. A 21 Centimeter Absorber Identified with a Spiral Galaxy: *Hubble Space Telescope* Faint Object Spectrograph and Wide-Field Camera Observations of 3CR 196. *Ross D. Cohen, E. A. Beaver, Athanassios Diplas, Vesa T. Junkkarinen, Thomas A. Barlow, & Ronald W. Lyons.* 456, 132, 2-F12 (1996)

Properties of a High-Redshift Galaxy at $z = 4.4$. *Limin Lu, Wallace L. W. Sargent, Donna S. Womble, & Thomas A. Barlow.* 457, L1, 25-D1 (1996)

BARNET, C. The Gaseous Sulfur Dioxide Abundance over Io's Leading and Trailing Hemispheres: *HST* Spectra of Io's $C\ ^1B_2$–$X\ ^1A_1$ Band of SO_2 near 2100 Å. *L. M. Trafton, J. J. Caldwell, C. Barnet, & C. C. Cunningham.* 456, 384, 6-C5 (1996)

BARSONY, MARY. Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

BARTEL, N. See BIETENHOLZ, M. F., et al. VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81.

BARTELMANN, MATTHIAS. Gravitational Lensing of Quasi-stellar Objects by Their Damped Lyα Absorbers. *Matthias Bartelmann & Abraham Loeb.* 457, 529, 28-B5 (1996)

BASINI, G. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BASRI, GIBOR. Lithium in Brown Dwarf Candidates: The Mass and Age of the Faintest Pleiades Stars. *Gibor Basri, Geoffrey W. Marcy, & James R. Graham.* 458, 600, 47-B3 (1996)

BAUER, FRANZ. Determinations of Metal Abundances from *ROSAT* Observations. *Franz Bauer & Joel N. Bregman.* 457, 382, 23-B11 (1996)

BAUM, S. A. The Subarcsecond Radio Structure in NGC 1068. I. Observations and Results. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, & A. Pedlar.* 458, 136, 38-A4 (1996)

BAUM, WILLIAM A. The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

BAUMGARTE, THOMAS W. Computing the Delayed Collapse of Hot Neutron Stars to Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 458, 680, 48-B9 (1996)

BAUR, G. Indirect Investigation of the $d + {}^6\mathrm{Li}$ Reaction at Low Energies Relevant for Nuclear Astrophysics. *S. Cherubini, V. N. Kondratyev, M. Lattuada, C. Spitaleri, D. Miljanić, M. Zadro, & G. Baur.* 457, 855, 32-F3 (1996)

BEASLEY, A. J. See BIETENHOLZ, M. F., et al. VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81.

BEAVER, E. A. A 21 Centimeter Absorber Identified with a Spiral Galaxy: *Hubble Space Telescope* Faint Object Spectrograph and Wide-Field Camera Observations of 3CR 196. *Ross D. Cohen, E. A. Beaver, Athanassios Diplas, Vesa T. Junkkarinen, Thomas A. Barlow, & Ronald W. Lyons.* 456, 132, 2-F12 (1996)

BECHTOLD, JILL. A Redshift 4.38 Mg II Absorber toward BR 1202–0725. *Richard Elston, Jill Bechtold, Gary J. Hill, & Jian Ge.* 456, L13, 7-C10 (1996)

Simulation Analysis of Lyα Forest Spectra. I. Empirical Description at $z \approx 3$. *Adam Dobrzycki & Jill Bechtold.* 457, 102, 19-D13 (1996)

BECK, S. C. The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

BECKMAN, J. E. The Revised Mg_2 Index as a Metallicity Indicator for Stellar Systems: Giant Elliptical Galaxies and Bulges. *E. Casuso, A. Vazdekis, R. F. Peletier, & J. E. Beckman.* 458, 533, 46-B6 (1996)

The Kinematics of the Ionized and Molecular Hydrogen in the Starburst Galaxy NGC 253. *F. Prada, A. Manchado, Blaise Canzian, R. F. Peletier, C. D. McKeith, & J. E. Beckman.* 458, 537, 46-B13 (1996)

BECKMAN, JOHN E. Molecular Cloudlets Embedded in a Diffuse H I Cloud within 120 Parsecs of the Sun. *Joaquín Trapero, María J. Sempere, John E. Beckman, & L. M. Hobbs.* 457, 731, 31-A5 (1996)

BEERS, TIMOTHY C. Lithium Processing in Halo Dwarfs, and T_{eff}, [Fe/H] Correlations on the Spite Plateau. *Sean G. Ryan, Timothy C. Beers, Constantine P. Deliyannis, & Julie A. Thorburn.* 458, 543, 46-C8 (1996)

BELL, J. F. A New Method for Obtaining Binary Pulsar Distances and Its Implications for Tests of General Relativity. *J. F. Bell & M. Bailes.* 456, L33, 7-F7 (1996)

BELLOTTI, R. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BENNA, CARLO. Interpretation of the Observed Plasma "Turbulent" Velocities as a Result of Magnetic Reconnection in Solar Flares. *Ester Antonucci, Carlo Benna, & Boris V. Somov.* 456, 833, 15-A12 (1996)

BENNETT, C. L. See WALL, W. F., et al. *COBE*/DIRBE Observations of the Orion Constellation from the Near- to Far-Infrared.

Producing Megapixel Cosmic Microwave Background from Differential Radiometer Data. *E. L. Wright, G. Hinshaw, & C. L. Bennett.* 458, L53, 51-G2 (1996)

BENNETT, DAVID P. Is There Evidence for Repeating Gamma-Ray Bursters in the BATSE Data? *David P. Bennett & Sun Hong Rhie.* 458, 293, 40-A12 (1996)

BERGERON, JACQUELINE. See BAHCALL, JOHN N., et al. The *Hubble Space Telescope* Quasar Absorption Line Key Project. VII. Absorption Systems at $z_{abs} \leq 1.3$.

BERKOVITCH, MICHAEL. The Dense Core, Outflow, and "Jet" in L810: High-Resolution Haystack Observations at 3 Millimeters. *Dan P. Clemens, Michael Berkovitch, João Lin Yun, Nimesh Patel, & Taoling Xie.* 457, 743, 31-B10 (1996)

BERRIMAN, G. B. See WALL, W. F., et al. *COBE*/DIRBE Observations of the Orion Constellation from the Near- to Far-Infrared.

BERTOLA, FRANCESCO. Counterrotating Stellar Disks in Early-Type Spirals: NGC 3593. *Francesco Bertola, Pierantonio Cinzano, Enrico Maria Corsini, Alessandro Pizzella, Massimo Persic, & Paolo Salucci.* 458, L67, 52-B1 (1996)

BERTOLDI, FRANK. Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)

BERTSCHINGER, EDMUND. Self-similar Evolution of Gravitational Clustering: Is $n = -1$ Special? *Bhuvnesh Jain & Edmund Bertschinger.* 456, 43, 1-E7 (1996)

BEST, JASON S. Analysis of Galaxy Morphology and Evolution Using the Pointwise Dimension. *Jason S. Best, Jane C. Charlton, & Gottfried Mayer-Kress.* 456, 55, 1-F8 (1996)

BHAT, P. N. A Dust Lane in the Radio Galaxy 3C 270. *Ashish Mahabal, Ajit Kembhavi, K. P. Singh, P. N. Bhat, & T. P. Prabhu.* 457, 598, 29-A12 (1996)

BHATTACHARYA, D. Constrained Linear Algebraic Deconvolution of Poisson Data. *D. D. Dixon, D. Bhattacharya, T. J. O'Neill, O. T. Tümer, R. S. White, A. D. Zych, & Wm. A. Wheaton.* 457, 789, 31-F12 (1996)

BIDOLI, V. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BIETENHOLZ, M. F. VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81. *M. F. Bietenholz, N. Bartel, M. P. Rupen, J. E. Conway, A. J. Beasley, R. A. Sramek, J. D. Romney, M. A. Titus, D. A. Graham, V. I. Altunin, D. L. Jones, A. Rius, T. Venturi, G. Umana, K. W. Weiler, S. D. Van Dyk, N. Panagia, W. H. Cannon, J. Popelar, & R. J. Davis.* 457, 604, 28-B9 (1996)

BIGGS, JAMES D. The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

BIGNAMI, GIOVANNI F. Multiwavelength Data Suggest a Cyclotron Feature on the Hot Thermal Continuum of Geminga. *Giovanni F. Bignami, Patrizia A. Caraveo, Roberto Mignani, Jerry Edelstein, & Stuart Bowyer.* 456, L111, 17-C2 (1996)

BILLER, S. See QUINN, J., et al. Detection of Gamma Rays with $E > 300$ GeV from Markarian 501.

BIRKINSHAW, MARK. Beyond the Thin Lens Approximation. *Ted Pyne & Mark Birkinshaw.* 458, 46, 36-G1 (1996)

BISNOVATYI-KOGAN, G. S. Structure of Accretion Disks with Optically Thick–Optically Thin Transitions. *I. V. Artemova, G. S. Bisnovatyi-Kogan, G. Björnsson, & I. D. Novikov.* 456, 119, 2-E7 (1996)

BIVIANO, A. Velocity Dispersions and X-Ray Temperatures of Galaxy Clusters. *M. Girardi, D. Fadda, G. Giuricin, F. Mardirossian, M. Mezzetti, & A. Biviano.* 457, 61, 19-A3 (1996)

BJÖRNSSON, G. Structure of Accretion Disks with Optically Thick–Optically Thin Transitions. *I. V. Artemova, G. S. Bisnovatyi-Kogan, G. Björnsson, & I. D. Novikov.* 456, 119, 2-E7 (1996)

BJORKMAN, J. E. Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

BLACKMAN, ERIC G. Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

BLANDFORD, ROGER. On the Jets Associated with Galactic Superluminal Sources. *Amir Levinson & Roger Blandford.* 456, L29, 7-E13 (1996)

BLONDIN, JOHN M. The Shaping of Planetary Nebulae: Asymmetry in the External Wind. *Vikram V. Dwarkadas, Roger A. Chevalier, & John M. Blondin.* 457, 773, 31-E7 (1996)

BOCCIOLINI, M. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BODO, GIANLUIGI. On the Nonlinear Evolution of Magnetohydrodynamic Kelvin-Helmholtz Instabilities. *Andrea Malagoli, Gianluigi Bodo, & Robert Rosner.* 456, 708, 13-D2 (1996)

BOEZIO, M. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BOGDAN, T. J. Waves in Radiating Fluids. *T. J. Bogdan, M. Knölker, K. B. MacGregor, & E.-J. Kim.* 456, 879, 15-F6 (1996)

BOKSENBERG, ALEC. See BAHCALL, JOHN N., et al. The *Hubble Space Telescope* Quasar Absorption Line Key Project. VII. Absorption Systems at $z_{abs} \leq 1.3$.

BOLATTO, ALBERTO D. HCN and CO in the Central 630 Parsecs of the Galaxy. *James M. Jackson, Mark H. Heyer, Timothy A. D. Paglione, & Alberto D. Bolatto.* 456, L91, 16-F13 (1996)

BOLDT, E. A. See AUDLEY, M. D., et al. A High-Resolution X-Ray Spectrum of Centaurus X-3.

BORUTA, NICHOLAS. Solar Dynamo Surface Waves in the Presence of a Primordial Magnetic Field: A 30 Gauss Upper Limit in the Solar Core. *Nicholas Boruta.* 458, 832, 50-B13 (1996)

BOWYER, STUART. Multiwavelength Data Suggest a Cyclotron Feature on the Hot Thermal Continuum of Geminga. *Giovanni F. Bignami, Patrizia A. Caraveo, Roberto Mignani, Jerry Edelstein, & Stuart Bowyer.* 456, L111, 17-C2 (1996)

The 0.8 Day Orbit of the Precataclysmic Binary EUVE J1016−053. *John R. Thorstensen, Stéphane Vennes, & Stuart Bowyer.* 457, 390, 23-C8 (1996)

Discovery of 0.5 Million K Gas in the Center of the Virgo Cluster. *Richard Lieu, Jonathan P. D. Mittaz, Stuart Bowyer, Felix J. Lockman, Chorng-yuan Hwang, & Jurgen H. M. M. Schmitt.* 458, L5, 42-D9 (1996)

BOYD, PATRICIA T. The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

BRADT, H. V. The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

BRAINERD, J. J. An Estimate of the Motion-induced Dipole Moment in the Spatial Distribution of Cosmological Gamma-Ray Bursts. *J. J. Brainerd.* 456, 449, 9-F10 (1996)

BRAND, JAN. Far Outer Galaxy H II Regions. *Alexander L. Rudolph, Jan Brand, Eugène J. de Geus, & Jan G. A. Wouterloot.* 458, 653, 47-G4 (1996)

BRANDENBURG, AXEL. The Disk Accretion Rate for Dynamo-generated Turbulence. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 458, L45, 43-B10 (1996)

BRAVAR, U. See GOLDEN, R. L., et al. Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV.

BREGMAN, JOEL N. Determinations of Metal Abundances from *ROSAT* Observations. *Franz Bauer & Joel N. Bregman.* 457, 382, 23-B11 (1996)

BRESSAN, ALESSANDRO. Uncertainties in the Modeling of Old Stellar Populations. *Stéphane Charlot, Guy Worthey, & Alessandro Bressan.* 457, 625, 29-D12 (1996)

BRIEL, U. G. An Updated Calibration of the *ROSAT* PSPC Particle Background for the Analysis of Diffuse and Extended Sources: Erratum. *P. P. Plucinsky, S. L. Snowden, U. G. Briel, G. Hasinger, & E. Pfefferman.* 458, 861, 50-E8 (1996) (Orig. paper in 418, 519, 237-D10 (1993))

BRIGGS, M. S. See BAND, D. L., et al. BATSE Gamma-Ray Burst Line Search. IV. Line Candidates from the Visual Search.

BRINKMANN, W. Is the X-Ray Spectrum of the Seyfert 2 Galaxy NGC 5252 Intrinsically Flat? *M. Cappi, T. Mihara, M. Matsuoka, W. Brinkmann, M. A. Prieto, & G. G. C. Palumbo.* 456, 141, 2-G12 (1996)

BRISSENDEN, R. J. The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

ZHANG, XIAOLEI. Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

ZHOU, YOU-YUAN. Relations between the Optical Fe II Emission and Ultraviolet Spectra in Active Galactic Nuclei. *Ting-Gui Wang, You-Yuan Zhou, & An-Song Gao.* 457, 111, 19-E11 (1996)

ZIRIN, H. OVRO, BBSO, BATSE, and *Yohkoh* Observations of a Twin Solar Flare. *H. Wang, D. E. Gary, H. Zirin, N. Nitta, R. A. Schwartz, & T. Kosugi.* 456, 403, 6-E1 (1996)

ZWEERINK, J. See QUINN, J., et al. Detection of Gamma Rays with $E > 300$ GeV from Markarian 501.

ZYCH, A. D. Constrained Linear Algebraic Deconvolution of Poisson Data. *D. D. Dixon, D. Bhattacharya, T. J. O'Neill, O. T. Tümer, R. S. White, A. D. Zych, & Wm. A. Wheaton.* 457, 789, 31-F12 (1996)

SUBJECT INDEX

PARTS 1 & 2, VOLUMES 456 –458

1996 JANUARY 1 TO FEBRUARY 20

ACCELERATION OF PARTICLES

Stochastic Particle Acceleration near Accreting Black Holes. *Charles D. Dermer, James A. Miller, & Hui Li.* 456, 106, 2-D5 (1996)

Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

Cluster Accretion Shocks as Possible Acceleration Sites for Ultra–High-Energy Protons below the Greisen Cutoff. *Hyesung Kang, Dongsu Ryu, & T. W. Jones.* 456, 422, 9-C13 (1996)

Production of Antiprotons in Interstellar Space by Propagating Cosmic Rays under Conditions of Diffusive Reacceleration. *M. Simon & U. Heinbach.* 456, 519, 10-F2 (1996)

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

Formation and Radiation Acceleration of Pair Plasmoids near Galactic Black Holes. *Hui Li & Edison P. Liang.* 458, 514, 45-G1 (1996)

A Dynamical Monte Carlo Simulation of a Collisionless Shock. *Jeffrey M. Knerr, J. R. Jokipii, & Donald C. Ellison.* 458, 641, 47-F3 (1996)

ACCRETION, ACCRETION DISKS

Stochastic Particle Acceleration near Accreting Black Holes. *Charles D. Dermer, James A. Miller, & Hui Li.* 456, 106, 2-D5 (1996)

Structure of Accretion Disks with Optically Thick–Optically Thin Transitions. *I. V. Artemova, G. S. Bisnovatyi-Kogan, G. Björnsson, & I. D. Novikov.* 456, 119, 2-E7 (1996)

The Effect of Gravitational Instabilities on Protostellar Disks. *Gregory Laughlin & Michał Różyczka.* 456, 279, 4-G4 (1996)

High-Resolution Spectroscopy of Brγ Emission in Young Stellar Objects. *Joan Najita, John S. Carr, & Alan T. Tokunaga.* 456, 292, 5-A6 (1996)

Long-Term Behavior of Centaurus X-3 Observed with the All Sky Monitor on Board *Ginga*. *Hiroshi Tsunemi, Shunji Kitamoto, & Keisuke Tamura.* 456, 316, 5-C13 (1996)

The Large Magellanic Cloud Supersoft X-Ray Binary RX J0513.9–6951. *David Crampton, J. B. Hutchings, A. P. Cowley, P. C. Schmidtke, T. K. McGrath, D. O'Donoghue, & M. K. Harrop-Allin.* 456, 320, 5-D6 (1996)

Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

Magnetic Interaction between Classic T Tauri Stars and Their Associated Disks. *Jianke Li.* 456, 696, 13-C1 (1996)

Dynamo-driven Accretion Disks and Dwarf Nova Eruptions. *P. J. Armitage, M. Livio, & J. E. Pringle.* 457, 332, 22-E1 (1996)

Layered Accretion in T Tauri Disks. *Charles F. Gammie.* 457, 355, 22-G6 (1996)

Modeling Emission Lines from Dwarf Novae in Quiescence. *Yuan-Kuen Ko, Y. Paul Lee, Eric M. Schlegel, & Timothy R. Kallman.* 457, 363, 23-A3 (1996)

The Magnetic Field of the Intermediate Polar RE 0751+14. *H. Väth, G. Chanmugam, & J. Frank.* 457, 407, 23-E3 (1996)

Damping of the Shear Instability in Magnetized Disks by Ohmic Diffusion. *Liping Jin.* 457, 798, 31-G10 (1996)

Resonance Oscillation of Radiative Shock Waves in Accretion Disks around Compact Objects. *Diego Molteni, Hanno Sponholz, & Sandip K. Chakrabarti.* 457, 805, 32-A6 (1996)

Hot Accretion Disks with Nonthermal Pairs: Injection of Low-Energy Nonthermal Electrons. *Masaaki Kusunose, Shin Mineshige, & Tetsuya T. Yamada.* 457, 813, 32-B3 (1996)

A New Model for Black Hole Soft X-Ray Transients in Quiescence. *Ramesh Narayan, Jeffrey E. McClintock, & Insu Yi.* 457, 821, 32-C1 (1996)

Photon Bubble Oscillations in Accretion-powered Pulsars. *Richard I. Klein, Jonathan Arons, Garrett Jernigan, & Juliana J.-L. Hsu.* 457, L85, 34-G6 (1996)

The Connection between Submillimeter Continuum Flux and Binary Separation in Young Binaries: Evidence of Interaction between Stars and Disks. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 458, 312, 40-C9 (1996)

The Stability Properties of Two-Temperature White Dwarf Radiative Shock Waves. *James N. Imamura, Abdossalam Aboasha, Michael T. Wolff, & Kent S. Wood.* 458, 327, 40-D13 (1996)

Hubble Space Telescope/FOS Spectroscopy of VW Hydri in Superoutburst. *M. Huang, E. M. Sion, I. Hubeny, F. H. Cheng, & P. Szkody.* 458, 355, 40-G9 (1996)

The Disk Accretion Rate for Dynamo-generated Turbulence. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 458, L45, 43-B10 (1996)

The Observational Appearance of Slim Accretion Disks. *Ewa Szuszkiewicz, Matthew A. Malkan, & Marek A. Abramowicz.* 458, 474, 45-C6 (1996)

Evolution of an Accretion Disk in an Active Galactic Nucleus. *Aneta Siemiginowska, Bożena Czerny, & Vadim Kostyunin.* 458, 491, 45-D12 (1996)

Relativistic Accretion Disks: Low-Frequency Modes and Frame Dragging. *James R. Ipser.* 458, 508, 45-F5 (1996)

Formation and Radiation Acceleration of Pair Plasmoids near Galactic Black Holes. *Hui Li & Edison P. Liang.* 458, 514, 45-G1 (1996)

Timescale Invariance of Rapid X-Ray Variability of the Black Hole Candidate GRO J1719–24. *F. van der Hooft, C. Kouveliotou, J. van Paradijs, B. C. Rubin, D. J. Crary, M. H. Finger, B. A. Harmon, M. van der Klis, W. H. G. Lewin, J. P. Norris, & G. J. Fishman.* 458, L75, 52-C2 (1996)

Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

ATOMIC DATA

OPAL Equation-of-State Tables for Astrophysical Applications. *Forrest J. Rogers, Fritz J. Swenson, & Carlos A. Iglesias.* 456, 902, 16-A4 (1996)

ATOMIC PROCESSES

OPAL Equation-of-State Tables for Astrophysical Applications. *Forrest J. Rogers, Fritz J. Swenson, & Carlos A. Iglesias.* 456, 902, 16-A4 (1996)

Polarization of Astronomical Maser Radiation. III. Arbitrary Zeeman Splitting and Anisotropic Pumping. *Moshe Elitzur.* 457, 415, 23-F1 (1996)

One-Photon Annihilation of Nonthermal Positrons in the Interstellar Medium. *Young-Dae Jung.* 457, 431, 23-G6 (1996)

BALLOONS

MSAM1-94: Repeated Measurement of Medium-Scale Anistropy in the Cosmic Microwave Background Radiation. *E. S. Cheng, D. A. Cottingham, D. J. Fixsen, C. A. Inman, M. S. Kowitt, S. S. Meyer, L. A. Page, J. L. Puchalla, J. E. Ruhl, & R. F. Silverberg.* 456, L71, 16-E1 (1996)

BLACK HOLE PHYSICS

Stochastic Particle Acceleration near Accreting Black Holes. *Charles D. Dermer, James A. Miller, & Hui Li.* 456, 106, 2-D5 (1996)

Structure of Accretion Disks with Optically Thick–Optically Thin Transitions. *I. V. Artemova, G. S. Bisnovatyi-Kogan, G. Björnsson, & I. D. Novikov.* 456, 119, 2-E7 (1996)

Stellar Kinematics and the Black Hole in the Galactic Center. *Joseph W. Haller, M. J. Rieke, G. H. Rieke, P. Tamblyn, L. Close, & F. Melia.* 456, 194, 3-F2 (1996)

Resonance Oscillation of Radiative Shock Waves in Accretion Disks around Compact Objects. *Diego Molteni, Hanno Sponholz, & Sandip K. Chakrabarti.* 457, 805, 32-A6 (1996)

Hot Accretion Disks with Nonthermal Pairs: Injection of Low-Energy Nonthermal Electrons. *Masaaki Kusunose, Shin Mineshige, & Tetsuya T. Yamada.* 457, 813, 32-B3 (1996)

A New Model for Black Hole Soft X-Ray Transients in Quiescence. *Ramesh Narayan, Jeffrey E. McClintock, & Insu Yi.* 457, 821, 32-C1 (1996)

The Neutron Star and Black Hole Initial Mass Function. *F. X. Timmes, S. E. Woosley, & Thomas A. Weaver.* 457, 834, 32-D3 (1996)

Powerful Ejection of Matter from Tidally Disrupted Stars near Massive Black Holes and a Possible Application to Sagittarius A East. *Alexei Khokhlov & Fulvio Melia.* 457, L61, 34-D4 (1996)

Relativistic Accretion Disks: Low-Frequency Modes and Frame Dragging. *James R. Ipser.* 458, 508, 45-F5 (1996)

Formation and Radiation Acceleration of Pair Plasmoids near Galactic Black Holes. *Hui Li & Edison P. Liang.* 458, 514, 45-G1 (1996)

Computing the Delayed Collapse of Hot Neutron Stars to Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 458, 680, 48-B9 (1996)

CELESTIAL MECHANICS, STELLAR DYNAMICS

On the Radial Orbit Instability. *Pablo M. Cincotta, Josué A. Núñez, & Juan C. Muzzio.* 456, 274, 4-F10 (1996)

The Mass of the Milky Way. *Christopher S. Kochanek.* 457, 228, 21-B3 (1996)

H-Function Evolution during Violent Relaxation. *Noam Soker.* 457, 287, 21-G13 (1996)

Truncation of the Binary Distribution Function in Globular Cluster Formation. *E. Vesperini & David F. Chernoff.* 458, 178, 38-E3 (1996)

CONVECTION

The Theoretical Calculation of the Rossby Number and the "Nonlocal" Convective Overturn Time for Pre–Main-Sequence and Early Post–Main-Sequence Stars. *Yong-Cheol Kim & Pierre Demarque.* 457, 340, 22-E12 (1996)

Nonlinear Compressible Convection in Oblique Magnetic Fields. *Neal E. Hurlburt, Paul C. Matthews, & Michael R. E. Proctor.* 457, 933, 33-F2 (1996)

On the Storage of Magnetic Flux Tubes at the Base of the Solar Convection Zone. *Antonio Ferriz-Mas.* 458, 802, 49-G3 (1996)

The Role of Doubly Diffusive Instabilities in the Core-Collapse Supernova Mechanism. *Stephen W. Bruenn & Tamara Dineva.* 458, L71, 52-B8 (1996)

COSMOLOGY: COSMIC MICROWAVE BACKGROUND

Large-Angle Polarization and Anisotropy of the Cosmic Microwave Background Radiation and Reionization. *Ka Lok Ng & Kin-Wang Ng.* 456, 413, 9-C1 (1996)

MSAM1-94: Repeated Measurement of Medium-Scale Anistropy in the Cosmic Microwave Background Radiation. *E. S. Cheng, D. A. Cottingham, D. J. Fixsen, C. A. Inman, M. S. Kowitt, S. S. Meyer, L. A. Page, J. L. Puchalla, J. E. Ruhl, & R. F. Silverberg.* 456, L71, 16-E1 (1996)

Interferometric Imaging of the Sunyaev-Zeldovich Effect at 30 GHz. *John E. Carlstrom, Marhshall Joy, & Laura Grego.* 456, L75, 16-E8 (1996)

Molecular Signals from Primordial Clouds at High Redshift. *Roberto Maoli, Valerio Ferrucci, Francesco Melchiorri, Monique Signore, & Danilo Tosti.* 457, 1, 18-C1 (1996)

Properties of a High-Redshift Galaxy at $z = 4.4$. *Limin Lu, Wallace L. W. Sargent, Donna S. Womble, & Thomas A. Barlow.* 457, L1, 25-D1 (1996)

The Contribution of Galactic Free-Free Emission to Anistropies in the Cosmic Microwave Background Found by the Saskatoon Experiment. *John H. Simonetti, Brian Dennison, & Gregory A. Topsana.* 458, L1, 42-D1 (1996)

An Absolute Measurement of the Cosmic Microwave Background Radiation Temperature at 20 Centimeters. *S. T. Staggs, N. C. Jarosik, D. T. Wilkinson, & E. J. Wollack.* 458, 407, 44-D5 (1996)

Producing Megapixel Cosmic Microwave Background from Differential Radiometer Data. *E. L. Wright, G. Hinshaw, & C. L. Bennett.* 458, L53, 51-G2 (1996)

COSMOLOGY: DARK MATTER

Galaxy Formation in a CDM + Λ Universe. I. Properties of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 1, 1-B1 (1996)

Galaxy Formation in a CDM + Λ Universe. II. Spatial Distribution of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 34, 1-D9 (1996)

Effects of Dark Matter on the Stability of Supermassive Stars. *Gail C. McLaughlin & George M. Fuller.* 456, 71, 2-A2 (1996)

The Intragroup Medium in Poor Groups of Galaxies. *John S. Mulchaey, David S. Davis, Richard F. Mushotzky, & David Burstein.* 456, 80, 2-B1 (1996)

Inhomogeneous Primordial Nucleosynthesis and New Abundance Constraints on $\Omega_b h^2$. *G. J. Mathews, T. Kajino, & M. Orito.* 456, 98, 2-C8 (1996)

Analysis of a *Hubble Space Telescope* Search for Red Dwarfs: Limits on Baryonic Matter in the Galactic Halo. *David S. Graff & Katherine Freese.* 456, L49, 8-A8 (1996)

Abell 2163: Temperature, Mass, and Hydrostatic Equilibrium. *M. Markevitch, R. Mushotzky, H. Inoue, K. Yamashita, A. Furuzawa, & Y. Tawara.* 456, 437, 9-E6 (1996)

Experimental Limits on the Density of Dark Matter in the Solar System. *Øyvind Grøn & Harald H. Soleng.* 456, 445, 9-F3 (1996)

The Role of Thermal Instabilities on the Theoretical Mass Function of MACHOs. *E. M. de Gouveia Dal Pino, J. E. Horvath, & J. A. de Freitas Pacheco.* 456, L97, 17-A9 (1996)

Do Microlensing Events Repeat? *R. Di Stefano & S. Mao.* 457, 93, 19-D1 (1996)

Cluster Cores, Gravitational Lensing, and Cosmology. *Ricardo A. Flores & Joel R. Primack.* 457, L5, 25-D10 (1996)

On the Destruction and Overmerging of Dark Halos in Dissipationless *N*-Body Simulations. *Ben Moore, Neal Katz, & George Lake.* 457, 455, 27-C1 (1996)

X-Ray Constraints on the Intrinsic Shapes and Baryon Fractions of Five Abell Clusters. *David A. Buote & Claude R. Canizares.* 457, 565, 28-F1 (1996)

Large-Scale Structure Tests of Warm Dark Matter. *Stéphane Colombi, Scott Dodelson, & Lawrence M. Widrow.* 458, 1, 36-C1 (1996)

COSMOLOGY: DIFFUSE RADIATION

Constraints on the Extragalactic Background Light from Gamma-Ray Observations of High-Redshift Quasars. *Piero Madau & E. Sterl Phinney.* 456, 124, 2-F1 (1996)

High-Resolution *IRAS* Maps and Infrared Emission of M31. II. Diffuse Component and Interstellar Dust. *Cong Xu & George Helou.* 456, 163, 3-C1 (1996)

Cosmic Metal Production and the Contribution of QSO Absorption Systems to the Ionizing Background. *Piero Madau & J. Michael Shull.* 457, 551, 28-D5 (1996)

An Absolute Measurement of the Cosmic Microwave Background Radiation Temperature at 20 Centimeters. *S. T. Staggs, N. C. Jarosik, D. T. Wilkinson, & E. J. Wollack.* 458, 407, 44-D5 (1996)

COSMOLOGY: DISTANCE SCALE

Abell 2163: Temperature, Mass, and Hydrostatic Equilibrium. *M. Markevitch, R. Mushotzky, H. Inoue, K. Yamashita, A. Furuzawa, & Y. Tawara.* 456, 437, 9-E6 (1996)

Explosion Models for Type Ia Supernovae: A Comparison with Observed Light Curves, Distances, H_0, and q_0. *P. Höflich & A. Khokhlov.* 457, 500, 27-G1 (1996)

The Stellar Halo of M104. I. A Survey for Planetary Nebulae and the Planetary Nebula Luminosity Function Distance. *H. C. Ford, X. Hui, R. Ciardullo, G. H. Jacoby, & K. C. Freeman.* 458, 455, 45-A8 (1996)

COSMOLOGY: EARLY UNIVERSE

Inhomogeneous Primordial Nucleosynthesis and New Abundance Constraints on $\Omega_b h^2$. *G. J. Mathews, T. Kajino, & M. Orito.* 456, 98, 2-C8 (1996)

A Redshift 4.38 Mg II Absorber toward BR 1202−0725. *Richard Elston, Jill Bechtold, Gary J. Hill, & Jian Ge.* 456, L13, 7-C10 (1996)

Molecular Signals from Primordial Clouds at High Redshift. *Roberto Maoli, Valerio Ferrucci, Francesco Melchiorri, Monique Signore, & Danilo Tosti.* 457, 1, 18-C1 (1996)

The Lithium Chemistry of the Early Universe. *P. C. Stancil, S. Lepp, & A. Dalgarno.* 458, 401, 44-C9 (1996)

COSMOLOGY: GRAVITATIONAL LENSING

Do Microlensing Events Repeat? *R. Di Stefano & S. Mao.* 457, 93, 19-D1 (1996)

Cluster Cores, Gravitational Lensing, and Cosmology. *Ricardo A. Flores & Joel R. Primack.* 457, L5, 25-D10 (1996)

Gravitational Lensing of Quasi-stellar Objects by Their Damped Lyα Absorbers. *Matthias Bartelmann & Abraham Loeb.* 457, 529, 28-B5 (1996)

Are Microlensing Events Contaminated by Dwarf Nova Eruptions? *Massimo Della Valle & Mario Livio.* 457, L77, 34-F7 (1996)

Beyond the Thin Lens Approximation. *Ted Pyne & Mark Birkinshaw.* 458, 46, 36-G1 (1996)

Gravitational Lens Models of Arcs in Abell 2218. *David W. Saraniti, Vahé Petrosian, & Roger Lynds.* 458, 57, 37-A1 (1996)

Far-UV Spectral Variability in the Gravitational Lens Candidate UM 425. *A. G. Michalitsianos, R. J. Oliversen, & S. P. Maran.* 458, 67, 37-B3 (1996)

Microlensing of Disk Source. *S. Mollerach & E. Roulet.* 458, L9, 42-E3 (1996)

COSMOLOGY: LARGE-SCALE STRUCTURE OF UNIVERSE

Galaxy Formation in a CDM + Λ Universe. I. Properties of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 1, 1-B1 (1996)

Galaxy Formation in a CDM + Λ Universe. II. Spatial Distribution of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 34, 1-D9 (1996)

Self-similar Evolution of Gravitational Clustering: Is $n = -1$ Special? *Bhuvnesh Jain & Edmund Bertschinger.* 456, 43, 1-E7 (1996)

Analysis of Galaxy Morphology and Evolution Using the Pointwise Dimension. *Jason S. Best, Jane C. Charlton, & Gottfried Mayer-Kress.* 456, 55, 1-F8 (1996)

Evolution of the Potential in Cosmological Gravitational Clustering. *Adrian L. Melott, B. S. Sathyaprakash, & Varun Sahni.* 456, 65, 1-G7 (1996)

The Two-dimensional Power Spectrum of the Las Campanas Redshift Survey: Detection of Excess Power on 100 h^{-1} Mpc Scales. *Stephen D. Landy, Stephen A. Shectman, Huan Lin, Robert P. Kirshner, Augustus A. Oemler, & Douglas Tucker.* 456, L1, 7-B1 (1996)

Cluster Accretion Shocks as Possible Acceleration Sites for Ultra–High-Energy Protons below the Greisen Cutoff. *Hyesung Kang, Dongsu Ryu, & T. W. Jones.* 456, 422, 9-C13 (1996)

Statistics of Isodensity Contours in Redshift Space. *Takahiko Matsubara.* 457, 13, 18-D2 (1996)

On the Destruction and Overmerging of Dark Halos in Dissipationless N-Body Simulations. *Ben Moore, Neal Katz, & George Lake.* 457, 455, 27-C1 (1996)

Homogeneous Velocity-Distance Data for Peculiar Velocity Analysis. II. Calibration of Field Samples. *Jeffrey A. Willick, Stéphane Courteau, S. M. Faber, David Burstein, Avishai Dekel, & Tsafrir Kolatt.* 457, 460, 27-C9 (1996)

Gravitational Lensing of Quasi-stellar Objects by Their Damped Lyα Absorbers. *Matthias Bartelmann & Abraham Loeb.* 457, 529, 28-B5 (1996)

Requirements for Investigating the Connection between Lyman-α Absorption Clouds and the Large-Scale Distribution of Galaxies. *Vicki L. Sarajedini, Richard F. Green, & Buell T. Jannuzi.* 457, 542, 28-C7 (1996)

The Lyman-Alpha Forest in the Cold Dark Matter Model. *Lars Hernquist, Neal Katz, David H. Weinberg, & Jordi Miralda-Escudé.* 457, L51, 34-C1 (1996)

Damped Lyman-Alpha and Lyman Limit Absorbers in the Cold Dark Matter Model. *Neal Katz, David H. Weinberg, Lars Hernquist, & Jordi Miralda-Escudé.* 457, L57, 34-C10 (1996)

Large-Scale Structure Tests of Warm Dark Matter. *Stéphane Colombi, Scott Dodelson, & Lawrence M. Widrow.* 458, 1, 36-C1 (1996)

COSMOLOGY: OBSERVATIONS

The Two-dimensional Power Spectrum of the Las Campanas Redshift Survey: Detection of Excess Power on 100 h^{-1} Mpc Scales. *Stephen D. Landy, Stephen A. Shectman, Huan Lin, Robert P. Kirshner, Augustus A. Oemler, & Douglas Tucker.* 456, L1, 7-B1 (1996)

High-Ionization Quasar Absorption Lines: A Test of the Existence of Hot Gas in Spiral-rich Groups. *John S. Mulchaey, Richard F. Mushotzky, David Burstein, & David S. Davis.* 456, L5, 7-B10 (1996)

MSAM1-94: Repeated Measurement of Medium-Scale Anistropy in the Cosmic Microwave Background Radiation. *E. S. Cheng, D. A. Cottingham, D. J. Fixsen, C. A. Inman, M. S. Kowitt, S. S. Meyer, L. A. Page, J. L. Puchalla, J. E. Ruhl, & R. F. Silverberg.* 456, L71, 16-E1 (1996)

Interferometric Imaging of the Sunyaev-Zeldovich Effect at 30 GHz. *John E. Carlstrom, Marhshall Joy, & Laura Grego.* 456, L75, 16-E8 (1996)

A Tolman Surface Brightness Test for Universal Expansion and the Evolution of Elliptical Galaxies in Distant Clusters. *Michael A. Pahre, S. G. Djorgovski, & R. R. de Carvalho.* 456, L79, 16-F6 (1996)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. VII. Absorption Systems at $z_{abs} \leq 1.3$. *John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, W. L. W. Sargent, Blair D. Savage, Donald P. Schneider, David A. Turnshek, Ray J. Weymann, & Arthur M. Wolfe.* 457, 19, 18-D11 (1996)

Simulation Analysis of Lyα Forest Spectra. I. Empirical Description at $z \approx 3$. *Adam Dobrzycki & Jill Bechtold.* 457, 102, 19-D13 (1996)

Cosmic Metal Production and the Contribution of QSO Absorption Systems to the Ionizing Background. *Piero Madau & J. Michael Shull.* 457, 551, 28-D5 (1996)

An Absolute Measurement of the Cosmic Microwave Background Radiation Temperature at 20 Centimeters. *S. T. Staggs, N. C. Jarosik, D. T. Wilkinson, & E. J. Wollack.* 458, 407, 44-D5 (1996)

COSMOLOGY: THEORY

Galaxy Formation in a CDM + Λ Universe. I. Properties of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 1, 1-B1 (1996)

Galaxy Formation in a CDM + Λ Universe. II. Spatial Distribution of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 34, 1-D9 (1996)

Self-similar Evolution of Gravitational Clustering: Is $n = -1$ Special? *Bhuvnesh Jain & Edmund Bertschinger.* 456, 43, 1-E7 (1996)

Evolution of the Potential in Cosmological Gravitational Clustering. *Adrian L. Melott, B. S. Sathyaprakash, & Varun Sahni.* 456, 65, 1-G7 (1996)

Inhomogeneous Primordial Nucleosynthesis and New Abundance Constraints on $\Omega_b h^2$. *G. J. Mathews, T. Kajino, & M. Orito.* 456, 98, 2-C8 (1996)

Large-Angle Polarization and Anisotropy of the Cosmic Microwave Background Radiation and Reionization. *Ka Lok Ng & Kin-Wang Ng.* 456, 413, 9-C1 (1996)

Molecular Signals from Primordial Clouds at High Redshift. *Roberto Maoli, Valerio Ferrucci, Francesco Melchiorri, Monique Signore, & Danilo Tosti.* 457, 1, 18-C1 (1996)

Statistics of Isodensity Contours in Redshift Space. *Takahiko Matsubara.* 457, 13, 18-D2 (1996)

Secondary Infall: Theory versus Simulations. *S. Zaroubi, A. Naim, & Y. Hoffman.* 457, 50, 18-G3 (1996)

Gravitational Lensing of Quasi-stellar Objects by Their Damped Lyα Absorbers. *Matthias Bartelmann & Abraham Loeb.* 457, 529, 28-B5 (1996)

Large-Scale Structure Tests of Warm Dark Matter. *Stéphane Colombi, Scott Dodelson, & Lawrence M. Widrow.* 458, 1, 36-C1 (1996)

Small Groups of Galaxies: A Clue to a Critical Universe. *F. Governato, P. Tozzi, & A. Cavaliere.* 458, 18, 36-D8 (1996)

Beyond the Thin Lens Approximation. *Ted Pyne & Mark Birkinshaw.* 458, 46, 36-G1 (1996)

Simulating Our Cosmological Neighborhood: Mock Catalogs for Velocity Analysis. *Tsafrir Kolatt, Avishai Dekel, Galit Ganon, & Jeffrey A. Willick.* 458, 419, 44-E7 (1996)

DENSE MATTER

Fast Rotation of Neutron Stars. *Jean-Pierre Lasota, Paweł Haensel, & Marek Artur Abramowicz.* 456, 300, 5-B3 (1996)

Thermally Driven Neutron Star Glitches. *Bennett Link & Richard I. Epstein.* 457, 844, 32-E2 (1996)

DIFFUSION

Damping of the Shear Instability in Magnetized Disks by Ohmic Diffusion. *Liping Jin.* 457, 798, 31-G10 (1996)

Lithium Processing in Halo Dwarfs, and T_{eff}, [Fe/H] Correlations on the Spite Plateau. *Sean G. Ryan, Timothy C. Beers, Constantine P. Deliyannis, & Julie A. Thorburn.* 458, 543, 46-C8 (1996)

ELEMENTARY PARTICLES

Production of Antiprotons in Interstellar Space by Propagating Cosmic Rays under Conditions of Diffusive Reacceleration. *M. Simon & U. Heinbach.* 456, 519, 10-F2 (1996)

One-Photon Annihilation of Nonthermal Positrons in the Interstellar Medium. *Young-Dae Jung.* 457, 431, 23-G6 (1996)

Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV. *R. L. Golden, S. J. Stochaj, S. A. Stephens, F. Aversa, G. Barbiellini, M. Boezio, U. Bravar, A. Colavita, F. Fratnik, P. Schiavon, A. Vacchi, N. Zampa, J. W. Mitchell, J. F. Ormes, R. E. Steitmatter, R. Bellotti, F. Cafagna, M. Castellano, M. Circella, G. De Cataldo, C. De Marzo, N. Giglietto, B. Marangelli, A. Rainó, P. Spinelli, M. Bocciolini, N. Finetti, P. Papini, A. Perego, S. Piccardi, P. Spillantini, G. Basini, F. Massimo Brancaccio, M. Ricci, M. T. Brunetti, A. Codino, C. Grimani, M. Menichelli, V. Bidoli, M. Candusso, M. Casolino, M. P. De Pascale, A. Morselli, P. Picozza, R. Sparvoli, M. Hof, W. Menn, & M. Simon.* 457, L103, 35-C11 (1996)

Predicting Big Bang Deuterium. *N. Hata, R. J. Scherrer, G. Steigman, D. Thomas, & T. P. Walker.* 458, 637, 47-E9 (1996)

EQUATION OF STATE

Fast Rotation of Neutron Stars. *Jean-Pierre Lasota, Paweł Haensel, & Marek Artur Abramowicz.* 456, 300, 5-B3 (1996)

OPAL Equation-of-State Tables for Astrophysical Applications. *Forrest J. Rogers, Fritz J. Swenson, & Carlos A. Iglesias.* 456, 902, 16-A4 (1996)

Transient X-Ray Sources, Luminosity Gaps, and Neutron Star Densities. *Robin H. D. Corbet.* 457, L31, 26-A10 (1996)

A Note on the Evaluation of the Generalized Fermi-Dirac Integral. *N. Mohankumar & A. Natarajan.* 458, 233, 39-C3 (1996)

Computing the Delayed Collapse of Hot Neutron Stars to Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 458, 680, 48-B9 (1996)

ERRATA, ADDENDA

Two Classes of Gamma-Ray–emitting Active Galactic Nuclei: Erratum. *Charles D. Dermer & Neil Gehrels.* 456, 412, 6-F3 (1996) (Orig. paper in 447, 103, 173-E7 (1995))

Observable Properties of X-Ray–heated Winds in Active Galactic Nuclei: Warm Reflectors and Warm Absorbers: Erratum. *J. H. Krolik & G. A. Kriss.* 456, 909, 16-B1 (1996) (Orig. paper in 447, 512, 182-G11 (1995))

Deficit of Far-Infrared [C II] Line Emission toward the Galactic Center. *T. Nakagawa, Y. Doi, Y. Y. Yui, H. Okuda, K. Mochizuki, H. Shibai, T. Nishimura, & F. J. Low.* 457, L121, 35-E3 (1996) (Orig. paper in 455, L35, 324-G3 (1995))

An Updated Calibration of the *ROSAT* PSPC Particle Background for the Analysis of Diffuse and Extended Sources: Erratum. *P. P. Plucinsky, S. L. Snowden, U. G. Briel, G. Hasinger, & E. Pfefferman.* 458, 861, 50-E8 (1996) (Orig. paper in 418, 519, 237-D10 (1993))

GALAXIES: ABUNDANCES

The Composition Gradient in M101 Revisited. I. H II Region Spectra and Excitation Properties. *Robert C. Kennicutt, Jr., & Donald R. Garnett.* 456, 504, 10-D12 (1996)

Properties of a High-Redshift Galaxy at $z = 4.4$. *Limin Lu, Wallace L. W. Sargent, Donna S. Womble, & Thomas A. Barlow.* 457, L1, 25-D1 (1996)

Spectroscopy of H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 458, 467, 45-B10 (1996)

Spectrophotometry of Blue Compact Galaxies with Broad Emission Lines: Evidence for High-Velocity Gas Motion. *Yuri I. Izotov, Andrew B. Dyak, Frederic H. Chaffee, Craig B. Foltz, Alexei Y. Kniazev, & Valentin A. Lipovetsky.* 458, 524, 46-A7 (1996)

The Revised Mg_2 Index as a Metallicity Indicator for Stellar Systems: Giant Elliptical Galaxies and Bulges. *E. Casuso, A. Vazdekis, R. F. Peletier, & J. E. Beckman.* 458, 533, 46-B6 (1996)

GALAXIES: ACTIVE

.Stochastic Particle Acceleration near Accreting Black Holes. *Charles D. Dermer, James A. Miller, & Hui Li.* 456, 106, 2-D5 (1996)

Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

The Soft X-Ray Spectral Shape of X-Ray–weak Seyfert Galaxies. *Brian Rush & Matthew A. Malkan.* 456, 466, 10-A6 (1996)

Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

Relations between the Optical Fe II Emission and Ultraviolet Spectra in Active Galactic Nuclei. *Ting-Gui Wang, You-Yuan Zhou, & An-Song Gao.* 457, 111, 19-E11 (1996)

The Steep Soft X-Ray Spectrum of the Highly Variable Active Nucleus in Markarian 478. *H. L. Marshall, T. E. Carone, J. Michael Shull, M. A. Malkan, & M. Elvis.* 457, 169, 20-D1 (1996)

An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

The Parsec-Scale Structure of NGC 1275 at 1.3 GHz. *G. B. Taylor & R. C. Vermeulen.* 457, L69, 34-E6 (1996)

The Observational Appearance of Slim Accretion Disks. *Ewa Szuszkiewicz, Matthew A. Malkan, & Marek A. Abramowicz.* 458, 474, 45-C6 (1996)

Evolution of an Accretion Disk in an Active Galactic Nucleus. *Aneta Siemiginowska, Bożena Czerny, & Vadim Kostyunin.* 458, 491, 45-D12 (1996)

Discovery of a Type 2 Quasar at $z = 0.9$. *Kouji Ohta, Toru Yamada, Kouichiro Nakanishi, Yasushi Ogasaka, Tsuneo Kii, & Kiyoshi Hayashida.* 458, L57, 51-G12 (1996)

GALAXIES: BL LACERTAE OBJECTS: GENERAL

Soft X-Ray Observations of a Complete Sample of X-Ray–selected BL Lacertae Objects. *Eric S. Perlman, John T. Stocke, Q. Daniel Wang, & Simon L. Morris.* 456, 451, 9-G2 (1996)

GALAXIES: BL LACERTAE OBJECTS: INDIVIDUAL

Name: Markarian 501

Detection of Gamma Rays with $E > 300$ GeV from Markarian 501. *J. Quinn, C. W. Akerlof, S. Biller, J. Buckley, D. A. Carter-Lewis, M. F. Cawley, M. Catanese, V. Connaughton, D. J. Fegan, J. P. Finley, J. Gaidos, A. M. Hillas, R. C. Lamb, F. Krennrich, R. Lessard, J. E. McEnery, D. I. Meyer, G. Mohanty, A. J. Rodgers, H. J. Rose, G. Sembroski, M. S. Schubnell, T. C. Weekes, C. Wilson, & J. Zweerink.* 456, L83, 16-F13 (1996)

GALAXIES: CLUSTERS: GENERAL

Self-similar Evolution of Gravitational Clustering: Is $n = -1$ Special? *Bhuvnesh Jain & Edmund Bertschinger.* 456, 43, 1-E7 (1996)

Analysis of Galaxy Morphology and Evolution Using the Pointwise Dimension. *Jason S. Best, Jane C. Charlton, & Gottfried Mayer-Kress.* 456, 55, 1-F8 (1996)

The Intragroup Medium in Poor Groups of Galaxies. *John S. Mulchaey, David S. Davis, Richard F. Mushotzky, & David Burstein.* 456, 80, 2-B1 (1996)

The Two-dimensional Power Spectrum of the Las Campanas Redshift Survey: Detection of Excess Power on 100 h^{-1} Mpc Scales. *Stephen D. Landy, Stephen A. Shectman, Huan Lin, Robert P. Kirshner, Augustus A. Oemler, & Douglas Tucker.* 456, L1, 7-B1 (1996)

The Gaseous Extent of Galaxies and the Origin of Lyα Systems. II. Identification of a Group or Cluster of Lyα Absorbing Galaxies at $z \cong 0.26$. *Kenneth M. Lanzetta, John K. Webb, & Xavier Barcons.* 456, L17, 7-D4 (1996)

The Serendipitous Discovery of a Group or Cluster of Young Galaxies at $z \approx 2.40$ in Deep *Hubble Space Telescope* WFPC2 Images. *S. M. Pascarelle, R. A. Windhorst, S. P. Driver, E. J. Ostrander, & W. C. Keel.* 456, L21, 7-D11 (1996)

A Massive $z = 0.088$ Supercluster and Tests of Starburst Galaxy Evolution at the North Ecliptic Pole. *M. L. N. Ashby, Perry B. Hacking, J. R. Houck, B. T. Soifer, & E. W. Weisstein.* 456, 428, 9-D8 (1996)

Secondary Infall: Theory versus Simulations. *S. Zaroubi, A. Naim, & Y. Hoffman.* 457, 50, 18-G3 (1996)

Velocity Dispersions and X-Ray Temperatures of Galaxy Clusters. *M. Girardi, D. Fadda, G. Giuricin, F. Mardirossian, M. Mezzetti, & A. Biviano.* 457, 61, 19-A3 (1996)

Cluster Cores, Gravitational Lensing, and Cosmology. *Ricardo A. Flores & Joel R. Primack.* 457, L5, 25-D10 (1996)

Cooling Flows and Metallicity Gradients in Clusters of Galaxies. *Andreas Reisenegger, Jordi Miralda-Escudé, & Eli Waxman.* 457, L11, 25-E6 (1996)

X-Ray Constraints on the Intrinsic Shapes and Baryon Fractions of Five Abell Clusters. *David A. Buote & Claude R. Canizares.* 457, 565, 28-F1 (1996)

Small Groups of Galaxies: A Clue to a Critical Universe. *F. Governato, P. Tozzi, & A. Cavaliere.* 458, 18, 36-D8 (1996)

Quantifying the Morphologies and Dynamical Evolution of Galaxy Clusters. II. Application to a Sample of *ROSAT* Clusters. *David A. Buote & John C. Tsai.* 458, 27, 36-E6 (1996)

Two-Point Velocity and Spatial Correlation Functions of the C IV Absorption Systems toward the Tololo Quasar Group: Evidence for Superclustering at $z \simeq 2$. *Nadine Dinshaw & Chris D. Impey.* 458, 73, 37-B12 (1996)

GALAXIES: CLUSTERS: INDIVIDUAL

Messier Number: M81

Spectroscopy of H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 458, 467, 45-B10 (1996)

Name: Abell 2163

Abell 2163: Temperature, Mass, and Hydrostatic Equilibrium. *M. Markevitch, R. Mushotzky, H. Inoue, K. Yamashita, A. Furuzawa, & Y. Tawara.* 456, 437, 9-E6 (1996)

Name: Abell 2218

Gravitational Lens Models of Arcs in Abell 2218. *David W. Saraniti, Vahé Petrosian, & Roger Lynds.* 458, 57, 37-A1 (1996)

Name: Coma

Structure and Dynamics of the Coma Cluster. *Matthew Colless & Andrew M. Dunn.* 458, 435, 44-F13 (1996)

Name: Virgo

Discovery of 0.5 Million K Gas in the Center of the Virgo Cluster. *Richard Lieu, Jonathan P. D. Mittaz, Stuart Bowyer, Felix J. Lockman, Chorng-yuan Hwang, & Jurgen H. M. M. Schmitt.* 458, L5, 42-D9 (1996)

The Stellar Halo of M104. I. A Survey for Planetary Nebulae and the Planetary Nebula Luminosity Function Distance. *H. C. Ford, X. Hui, R. Ciardullo, G. H. Jacoby, & K. C. Freeman.* 458, 455, 45-A8 (1996)

Alphanumeric: 2139−4434

A Group of Galaxies at Redshift 2.38. *Paul J. Francis, Bruce E. Woodgate, Stephen J. Warren, Palle Møller, Margaret Mazzolini, Andrew J. Bunker, James D. Lowenthal, Ted B. Williams, Takeo Minezaki, Yukiyasu Kobayashi, & Yuzuru Yoshii.* 457, 490, 27-F1 (1996)

Alphanumeric: A773

Interferometric Imaging of the Sunyaev-Zeldovich Effect at 30 GHz. *John E. Carlstrom, Marhshall Joy, & Laura Grego.* 456, L75, 16-E8 (1996)

Alphanumeric: A1704

Interferometric Imaging of the Sunyaev-Zeldovich Effect at 30 GHz. *John E. Carlstrom, Marhshall Joy, & Laura Grego.* 456, L75, 16-E8 (1996)

GALAXIES: COMPACT

Spectrophotometry of Blue Compact Galaxies with Broad Emission Lines: Evidence for High-Velocity Gas Motion. *Yuri I. Izotov, Andrew B. Dyak, Frederic H. Chaffee, Craig B. Foltz, Alexei Y. Kniazev, & Valentin A. Lipovetsky.* 458, 524, 46-A7 (1996)

GALAXIES: COOLING FLOWS

Cooling Flows and Metallicity Gradients in Clusters of Galaxies. *Andreas Reisenegger, Jordi Miralda-Escudé, & Eli Waxman.* 457, L11, 25-E6 (1996)

GALAXIES: DISTANCES AND REDSHIFTS

The Serendipitous Discovery of a Group or Cluster of Young Galaxies at $z \approx 2.40$ in Deep *Hubble Space Telescope* WFPC2 Images. *S. M. Pascarelle, R. A. Windhorst, S. P. Driver, E. J. Ostrander, & W. C. Keel.* 456, L21, 7-D11 (1996)

A Massive $z = 0.088$ Supercluster and Tests of Starburst Galaxy Evolution at the North Ecliptic Pole. *M. L. N. Ashby, Perry B. Hacking, J. R. Houck, B. T. Soifer, & E. W. Weisstein.* 456, 428, 9-D8 (1996)

Statistics of Isodensity Contours in Redshift Space. *Takahiko Matsubara.* 457, 13, 18-D2 (1996)

Homogeneous Velocity-Distance Data for Peculiar Velocity Analysis. II. Calibration of Field Samples. *Jeffrey A. Willick, Stéphane Courteau, S. M. Faber, David Burstein, Avishai Dekel, & Tsafrir Kolatt.* 457, 460, 27-C9 (1996)

A Group of Galaxies at Redshift 2.38. *Paul J. Francis, Bruce E. Woodgate, Stephen J. Warren, Palle Møller, Margaret Mazzolini, Andrew J. Bunker, James D. Lowenthal, Ted B. Williams, Takeo Minezaki, Yukiyasu Kobayashi, & Yuzuru Yoshii.* 457, 490, 27-F1 (1996)

Simulating Our Cosmological Neighborhood: Mock Catalogs for Velocity Analysis. *Tsafrir Kolatt, Avishai Dekel, Galit Ganon, & Jeffrey A. Willick.* 458, 419, 44-E7 (1996)

Structure and Dynamics of the Coma Cluster. *Matthew Colless & Andrew M. Dunn.* 458, 435, 44-F13 (1996)

The Stellar Halo of M104. I. A Survey for Planetary Nebulae and the Planetary Nebula Luminosity Function Distance. *H. C. Ford, X. Hui, R. Ciardullo, G. H. Jacoby, & K. C. Freeman.* 458, 455, 45-A8 (1996)

GALAXIES: ELLIPTICAL AND LENTICULAR, CD

A Tolman Surface Brightness Test for Universal Expansion and the Evolution of Elliptical Galaxies in Distant Clusters. *Michael A. Pahre, S. G. Djorgovski, & R. R. de Carvalho.* 456, L79, 16-F6 (1996)

X-Ray Constraints on the Intrinsic Shape of the Lenticular Galaxy NGC 1332. *David A. Buote & Claude R. Canizares.* 457, 177, 20-D12 (1996)

Interpreting Central Surface Brightness and Color Profiles in Elliptical Galaxies. *David R. Silva & Michael W. Wise.* 457, L15, 25-F1 (1996)

Structure and Dynamics of the Coma Cluster. *Matthew Colless & Andrew M. Dunn.* 458, 435, 44-F13 (1996)

The Revised Mg_2 Index as a Metallicity Indicator for Stellar Systems: Giant Elliptical Galaxies and Bulges. *E. Casuso, A. Vazdekis, R. F. Peletier, & J. E. Beckman.* 458, 533, 46-B6 (1996)

GALAXIES: EVOLUTION

A Redshift 4.38 Mg II Absorber toward BR 1202−0725. *Richard Elston, Jill Bechtold, Gary J. Hill, & Jian Ge.* 456, L13, 7-C10 (1996)

The Gaseous Extent of Galaxies and the Origin of Lyα Systems. II. Identification of a Group or Cluster of Lyα Absorbing Galaxies at $z \cong 0.26$. *Kenneth M. Lanzetta, John K. Webb, & Xavier Barcons.* 456, L17, 7-D4 (1996)

The Serendipitous Discovery of a Group or Cluster of Young Galaxies at $z \approx 2.40$ in Deep *Hubble Space Telescope* WFPC2 Images. *S. M. Pascarelle, R. A. Windhorst, S. P. Driver, E. J. Ostrander, & W. C. Keel.* 456, L21, 7-D11 (1996)

Soft X-Ray Observations of a Complete Sample of X-Ray–selected BL Lacertae Objects. *Eric S. Perlman, John T. Stocke, Q. Daniel Wang, & Simon L. Morris.* 456, 451, 9-G2 (1996)

On the Evolution of the Light Elements. I. D, ^{3}He, and ^{4}He. *Brian D. Fields.* 456, 478, 10-B7 (1996)

A Tolman Surface Brightness Test for Universal Expansion and the Evolution of Elliptical Galaxies in Distant Clusters. *Michael A. Pahre, S. G. Djorgovski, & R. R. de Carvalho.* 456, L79, 16-F6 (1996)

On the Star Formation Rate, Initial Mass Function, and Hubble Type of Disk Galaxies and the Age of the Universe. *Jesper Sommer-Larsen.* 457, 118, 19-F7 (1996)

Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

Uncertainties in the Modeling of Old Stellar Populations. *Stéphane Charlot, Guy Worthey, & Alessandro Bressan.* 457, 625, 29-D12 (1996)

Quantifying the Morphologies and Dynamical Evolution of Galaxy Clusters. II. Application to a Sample of *ROSAT* Clusters. *David A. Buote & John C. Tsai.* 458, 27, 36-E6 (1996)

Spectrophotometry and Stellar Population Models of "E + A" Galaxies. *Charles T. Liu & Robert F. Green.* 458, L63, 52-A7 (1996)

Counterrotating Stellar Disks in Early-Type Spirals: NGC 3593. *Francesco Bertola, Pierantonio Cinzano, Enrico Maria Corsini, Alessandro Pizzella, Massimo Persic, & Paolo Salucci.* 458, L67, 52-B1 (1996)

GALAXIES: FORMATION

Galaxy Formation in a CDM + Λ Universe. I. Properties of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 1, 1-B1 (1996)

Galaxy Formation in a CDM + Λ Universe. II. Spatial Distribution of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 34, 1-D9 (1996)

Self-similar Evolution of Gravitational Clustering: Is $n = -1$ Special? *Bhuvnesh Jain & Edmund Bertschinger.* 456, 43, 1-E7 (1996)

The Serendipitous Discovery of a Group or Cluster of Young Galaxies at $z \approx 2.40$ in Deep *Hubble Space Telescope* WFPC2 Images. *S. M. Pascarelle, R. A. Windhorst, S. P. Driver, E. J. Ostrander, & W. C. Keel.* 456, L21, 7-D11 (1996)

Molecular Signals from Primordial Clouds at High Redshift. *Roberto Maoli, Valerio Ferrucci, Francesco Melchiorri, Monique Signore, & Danilo Tosti.* 457, 1, 18-C1 (1996)

Secondary Infall: Theory versus Simulations. *S. Zaroubi, A. Naim, & Y. Hoffman.* 457, 50, 18-G3 (1996)

On the Destruction and Overmerging of Dark Halos in Dissipationless N-Body Simulations. *Ben Moore, Neal Katz, & George Lake.* 457, 455, 27-C1 (1996)

The Formation of Globular Cluster Systems. I. The Luminosity Function. *Dean E. McLaughlin & Ralph E. Pudritz.* 457, 578, 28-G3 (1996)

The Lyman-Alpha Forest in the Cold Dark Matter Model. *Lars Hernquist, Neal Katz, David H. Weinberg, & Jordi Miralda-Escudé.* 457, L51, 34-C1 (1996)

Damped Lyman-Alpha and Lyman Limit Absorbers in the Cold Dark Matter Model. *Neal Katz, David H. Weinberg, Lars Hernquist, & Jordi Miralda-Escudé.* 457, L57, 34-C10 (1996)

Evidence for Secular Evolution in Late-Type Spirals. *Stéphane Courteau, Roelof S. de Jong, & Adrick H. Broeils.* 457, L73, 34-E13 (1996)

Faint Blue Galaxies and the Epoch of Dwarf Galaxy Formation. *Arif Babul & Henry C. Ferguson.* 458, 100, 37-E1 (1996)

Counterrotating Stellar Disks in Early-Type Spirals: NGC 3593. *Francesco Bertola, Pierantonio Cinzano, Enrico Maria Corsini, Alessandro Pizzella, Massimo Persic, & Paolo Salucci.* 458, L67, 52-B1 (1996)

GALAXIES: FUNDAMENTAL PARAMETERS

The Intragroup Medium in Poor Groups of Galaxies. *John S. Mulchaey, David S. Davis, Richard F. Mushotzky, & David Burstein.* 456, 80, 2-B1 (1996)

X-Ray Constraints on the Intrinsic Shape of the Lenticular Galaxy NGC 1332. *David A. Buote & Claude R. Canizares.* 457, 177, 20-D12 (1996)

GALAXIES: HALOS

On the Destruction and Overmerging of Dark Halos in Dissipationless N-Body Simulations. *Ben Moore, Neal Katz, & George Lake.* 457, 455, 27-C1 (1996)

GALAXIES: INDIVIDUAL

Messier Number: M31

High-Resolution *IRAS* Maps and Infrared Emission of M31. I. Morphology and Sources. *Cong Xu & George Helou.* 456, 152, 3-A13 (1996)

High-Resolution *IRAS* Maps and Infrared Emission of M31. II. Diffuse Component and Interstellar Dust. *Cong Xu & George Helou.* 456, 163, 3-C1 (1996)

Very Luminous Giant Stars in the Central Region of M33. *I. S. McLean & T. Liu.* 456, 499, 10-D3 (1996)

Messier Number: M33

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

Messier Number: M81

VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81. *M. F. Bietenholz, N. Bartel, M. P. Rupen, J. E. Conway, A. J. Beasley, R. A. Sramek, J. D. Romney, M. A. Titus, D. A. Graham, V. I. Altunin, D. L. Jones, A. Rius, T. Venturi, G. Umana, K. W. Weiler, S. D. Van Dyk, N. Panagia, W. H. Cannon, J. Popelar, & R. J. Davis.* 457, 604, 28-B9 (1996)

Messier Number: M101

The Composition Gradient in M101 Revisited. I. H II Region Spectra and Excitation Properties. *Robert C. Kennicutt, Jr., & Donald R. Garnett.* 456, 504, 10-D12 (1996)

Messier Number: M104

The Stellar Halo of M104. I. A Survey for Planetary Nebulae and the Planetary Nebula Luminosity Function Distance. *H. C. Ford, X. Hui, R. Ciardullo, G. H. Jacoby, & K. C. Freeman.* 458, 455, 45-A8 (1996)

NGC Number: NGC 253

The Kinematics of the Ionized and Molecular Hydrogen in the Starburst Galaxy NGC 253. *F. Prada, A. Manchado, Blaise Canzian, R. F. Peletier, C. D. McKeith, & J. E. Beckman.* 458, 537, 46-B13 (1996)

NGC Number: NGC 1068

The Subarcsecond Radio Structure in NGC 1068. I. Observations and Results. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, & A. Pedlar.* 458, 136, 38-A4 (1996)

NGC Number: NGC 1275

The Parsec-Scale Structure of NGC 1275 at 1.3 GHz. *G. B. Taylor & R. C. Vermeulen.* 457, L69, 34-E6 (1996)

NGC Number: NGC 1313

The X-Ray Light Curve of the Very Luminous Supernova SN 1978K in NGC 1313. *Eric M. Schlegel, R. Petre, & E. J. M. Colbert.* 456, 187, 3-E6 (1996)

NGC Number: NGC 1332

X-Ray Constraints on the Intrinsic Shape of the Lenticular Galaxy NGC 1332. *David A. Buote & Claude R. Canizares.* 457, 177, 20-D12 (1996)

NGC Number: NGC 1800

Supershells and Chimneys: The Giant Ionized Gas Filaments in NGC 1800. *Deidre A. Hunter.* 457, 671, 30-A12 (1996)

NGC Number: NGC 2992

X-Ray Reprocessing by a Molecular Torus in the Seyfert 1.9 Galaxy NGC 2992. *K. A. Weaver, J. Nousek, T. Yaqoob, R. F. Mushotzky, F. Makino, & C. Otani.* 458, 160, 38-C6 (1996)

NGC Number: NGC 3593

Counterrotating Stellar Disks in Early-Type Spirals: NGC 3593. *Francesco Bertola, Pierantonio Cinzano, Enrico Maria Corsini, Alessandro Pizzella, Massimo Persic, & Paolo Salucci.* 458, L67, 52-B1 (1996)

NGC Number: NGC 4696

Cooling Flows and Metallicity Gradients in Clusters of Galaxies. *Andreas Reisenegger, Jordi Miralda-Escudé, & Eli Waxman.* 457, L11, 25-E6 (1996)

NGC Number: NGC 5252

Is the X-Ray Spectrum of the Seyfert 2 Galaxy NGC 5252 Intrinsically Flat? *M. Cappi, T. Mihara, M. Matsuoka, W. Brinkmann, M. A. Prieto, & G. G. C. Palumbo.* 456, 141, 2-G12 (1996)

Complex Gaseous Structure in the Nucleus of NGC 5252. *Zlatan I. Tsvetanov, Jon A. Morse, Andrew S. Wilson, & Gerald Cecil.* 458, 172, 38-D7 (1996)

NGC Number: NGC 5253

The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

Name: Arp 102B

Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

Name: Arp 220

ROSAT Observations of the X-Ray Nebula around Arp 220. *Timothy M. Heckman, Michael Dahlem, Stephen A. Eales, Giuseppina Fabbiano, & Kimberly Weaver.* 457, 616, 29-C10 (1996)

Name: Markarian 231

High-Resolution CO Observations of the Ultraluminous Infrared Galaxy Markarian 231. *P. M. Bryant & N. Z. Scoville.* 457, 678, 30-B8 (1996)

Name: Markarian 348

An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

Name: Markarian 478

The Steep Soft X-Ray Spectrum of the Highly Variable Active Nucleus in Markarian 478. *H. L. Marshall, T. E. Carone, J. Michael Shull, M. A. Malkan, & M. Elvis.* 457, 169, 20-D1 (1996)

Name: Sagittarius

Discovery of a Tidal Extension of the Sagittarius Dwarf Spheroidal Galaxy. *Mario Mateo, Nestor Mirabal, A. Udalski, M. Szymański, J. Kałużny, M. Kubiak, W. Krzemiński, & K. Z. Stanek.* 458, L13, 42-E10 (1996)

Alphanumeric: 3C 270

A Dust Lane in the Radio Galaxy 3C 270. *Ashish Mahabal, Ajit Kembhavi, K. P. Singh, P. N. Bhat, & T. P. Prabhu.* 457, 598, 29-A12 (1996)

Alphanumeric: H2107−099

The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

Alphanumeric: IC 4329A

Warm Absorber, Reflection, and Fe K Line in the X-Ray Spectrum of IC 4329A. *M. Cappi, T. Mihara, M. Matsuoka, K. Hayashida, K. A. Weaver, & C. Otani.* 458, 149, 38-B6 (1996)

GALAXIES: INTERACTIONS

On the Destruction and Overmerging of Dark Halos in Dissipationless N-Body Simulations. *Ben Moore, Neal Katz, & George Lake.* 457, 455, 27-C1 (1996)

Small Groups of Galaxies: A Clue to a Critical Universe. *F. Governato, P. Tozzi, & A. Cavaliere.* 458, 18, 36-D8 (1996)

GALAXIES: INTERGALACTIC MEDIUM

The Intragroup Medium in Poor Groups of Galaxies. *John S. Mulchaey, David S. Davis, Richard F. Mushotzky, & David Burstein.* 456, 80, 2-B1 (1996)

High-Ionization Quasar Absorption Lines: A Test of the Existence of Hot Gas in Spiral-rich Groups. *John S. Mulchaey, Richard F. Mushotzky, David Burstein, & David S. Davis.* 456, L5, 7-B10 (1996)

Simulation Analysis of Lyα Forest Spectra. I. Empirical Description at $z \approx 3$. *Adam Dobrzycki & Jill Bechtold.* 457, 102, 19-D13 (1996)

A Dust Lane Leading the Galactic Bar at Negative Galactic Longitudes. *X. Calbet, T. Mahoney, P. L. Hammersley, F. Garzón, & M. Lopez-Corredoira.* 457, L27, 26-A1 (1996)

Cosmic Metal Production and the Contribution of QSO Absorption Systems to the Ionizing Background. *Piero Madau & J. Michael Shull.* 457, 551, 28-D5 (1996)

GALAXIES: IRREGULAR

Spectroscopy of H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 458, 467, 45-B10 (1996)

GALAXIES: ISM

A 21 Centimeter Absorber Identified with a Spiral Galaxy: *Hubble Space Telescope* Faint Object Spectrograph and Wide-Field Camera Observations of 3CR 196. *Ross D. Cohen, E. A. Beaver, Athanassios Diplas, Vesa T. Junkkarinen, Thomas A. Barlow, & Ronald W. Lyons.* 456, 132, 2-F12 (1996)

High-Resolution *IRAS* Maps and Infrared Emission of M31. I. Morphology and Sources. *Cong Xu & George Helou.* 456, 152, 3-A13 (1996)

High-Resolution *IRAS* Maps and Infrared Emission of M31. II. Diffuse Component and Interstellar Dust. *Cong Xu & George Helou.* 456, 163, 3-C1 (1996)

The Composition Gradient in M101 Revisited. I. H II Region Spectra and Excitation Properties. *Robert C. Kennicutt, Jr., & Donald R. Garnett.* 456, 504, 10-D12 (1996)

HCN and CO in the Central 630 Parsecs of the Galaxy. *James M. Jackson, Mark H. Heyer, Timothy A. D. Paglione, & Alberto D. Bolatto.* 456, L91, 16-F13 (1996)

Properties of a High-Redshift Galaxy at $z = 4.4$. *Limin Lu, Wallace L. W. Sargent, Donna S. Womble, & Thomas A. Barlow.* 457, L1, 25-D1 (1996)

Interpreting Central Surface Brightness and Color Profiles in Elliptical Galaxies. *David R. Silva & Michael W. Wise.* 457, L15, 25-F1 (1996)

H_2 Emission from the Inner 400 Parsecs of the Galaxy. *Soojong Pak, D. T. Jaffe, & L. D. Keller.* 457, L43, 26-C3 (1996)

Internal Absorption and the Luminosity of Disk Galaxies. *Boqi Wang & Timothy M. Heckman.* 457, 645, 29-F7 (1996)

A Search for CO Emission in High-Redshift Powerful Radio Galaxies. *A. S. Evans, D. B. Sanders, J. M. Mazzarella, P. M. Solomon, D. Downes, C. Kramer, & S. J. E. Radford.* 457, 658, 29-G9 (1996)

Supershells and Chimneys: The Giant Ionized Gas Filaments in NGC 1800. *Deidre A. Hunter.* 457, 671, 30-A12 (1996)

High-Resolution CO Observations of the Ultraluminous Infrared Galaxy Markarian 231. *P. M. Bryant & N. Z. Scoville.* 457, 678, 30-B8 (1996)

The Parsec-Scale Structure of NGC 1275 at 1.3 GHz. *G. B. Taylor & R. C. Vermeulen.* 457, L69, 34-E6 (1996)

The Most Completely Sampled Rotation Curves for Galaxies. *Yoshiaki Sofue.* 458, 120, 37-F10 (1996)

Dust Obscuration in Starburst Galaxies from Near-Infrared Spectroscopy. *Daniela Calzetti, Anne L. Kinney, & Thaisa Storchi-Bergmann.* 458, 132, 37-G11 (1996)

Complex Gaseous Structure in the Nucleus of NGC 5252. *Zlatan I. Tsvetanov, Jon A. Morse, Andrew S. Wilson, & Gerald Cecil.* 458, 172, 38-D7 (1996)

Spectroscopy of H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 458, 467, 45-B10 (1996)

Spectrophotometry of Blue Compact Galaxies with Broad Emission Lines: Evidence for High-Velocity Gas Motion. *Yuri I. Izotov, Andrew B. Dyak, Frederic H. Chaffee, Craig B. Foltz, Alexei Y. Kniazev, & Valentin A. Lipovetsky.* 458, 524, 46-A7 (1996)

GALAXIES: JETS

On the Jets Associated with Galactic Superluminal Sources. *Amir Levinson & Roger Blandford.* 456, L29, 7-E13 (1996)

Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

The Parsec-Scale Structure of NGC 1275 at 1.3 GHz. *G. B. Taylor & R. C. Vermeulen.* 457, L69, 34-E6 (1996)

The Subarcsecond Radio Structure in NGC 1068. I. Observations and Results. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, & A. Pedlar.* 458, 136, 38-A4 (1996)

GALAXIES: KINEMATICS AND DYNAMICS

Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

High-Resolution CO Observations of the Ultraluminous Infrared Galaxy Markarian 231. *P. M. Bryant & N. Z. Scoville.* 457, 678, 30-B8 (1996)

The Most Completely Sampled Rotation Curves for Galaxies. *Yoshiaki Sofue.* 458, 120, 37-F10 (1996)

Structure and Dynamics of the Coma Cluster. *Matthew Colless & Andrew M. Dunn.* 458, 435, 44-F13 (1996)

Spectrophotometry of Blue Compact Galaxies with Broad Emission Lines: Evidence for High-Velocity Gas Motion. *Yuri I. Izotov, Andrew B. Dyak, Frederic H. Chaffee, Craig B. Foltz, Alexei Y. Kniazev, & Valentin A. Lipovetsky.* 458, 524, 46-A7 (1996)

The Kinematics of the Ionized and Molecular Hydrogen in the Starburst Galaxy NGC 253. *F. Prada, A. Manchado, Blaise Canzian, R. F. Peletier, C. D. McKeith, & J. E. Beckman.* 458, 537, 46-B13 (1996)

Counterrotating Stellar Disks in Early-Type Spirals: NGC 3593. *Francesco Bertola, Pierantonio Cinzano, Enrico Maria Corsini, Alessandro Pizzella, Massimo Persic, & Paolo Salucci.* 458, L67, 52-B1 (1996)

GALAXIES: LOCAL GROUP

High-Ionization Quasar Absorption Lines: A Test of the Existence of Hot Gas in Spiral-rich Groups. *John S. Mulchaey, Richard F. Mushotzky, David Burstein, & David S. Davis.* 456, L5, 7-B10 (1996)

The Mass of the Milky Way. *Christopher S. Kochanek.* 457, 228, 21-B3 (1996)

Discovery of a Tidal Extension of the Sagittarius Dwarf Spheroidal Galaxy. *Mario Mateo, Nestor Mirabal, A. Udalski, M. Szymański, J. Kałużny, M. Kubiak, W. Krzemiński, & K. Z. Stanek.* 458, L13, 42-E10 (1996)

Evidence for the Sagittarius Dwarf Galaxy at Low Galactic Latitudes. *C. Alard.* 458, L17, 42-F3 (1996)

GALAXIES: LUMINOSITY FUNCTION, MASS FUNCTION

Soft X-Ray Observations of a Complete Sample of X-Ray–selected BL Lacertae Objects. *Eric S. Perlman, John T. Stocke, Q. Daniel Wang, & Simon L. Morris.* 456, 451, 9-G2 (1996)

On the Star Formation Rate, Initial Mass Function, and Hubble Type of Disk Galaxies and the Age of the Universe. *Jesper Sommer-Larsen.* 457, 118, 19-F7 (1996)

The Opacity of Galactic Disks and Faint Blue Galaxy Number Counts. *Peter Leroy & Miguel Portilla.* 457, 145, 20-A13 (1996)

The Formation of Globular Cluster Systems. I. The Luminosity Function. *Dean E. McLaughlin & Ralph E. Pudritz.* 457, 578, 28-G3 (1996)

Faint Blue Galaxies and the Epoch of Dwarf Galaxy Formation. *Arif Babul & Henry C. Ferguson.* 458, 100, 37-E1 (1996)

GALAXIES: MAGELLANIC CLOUDS

Cosmic Lithium: Going Up or Coming Down? *Gary Steigman.* 457, 737, 31-B1 (1996)

X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

IUE Observations of Young Clusters in the Large Magellanic Cloud. *Eric M. Wilcots, Paul W. Hodge, & Nichole King.* 458, 580, 46-F13 (1996)

GALAXIES: MAGNETIC FIELDS

Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

GALAXIES: NUCLEI

Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. II. The 1985 Outburst of RS Ophiuchi. *Steven N. Shore, Scott J. Kenyon, Sumner Starrfield, & G. Sonneborn.* 456, 717, 13-E2 (1996)

The Steep Soft X-Ray Spectrum of the Highly Variable Active Nucleus in Markarian 478. *H. L. Marshall, T. E. Carone, J. Michael Shull, M. A. Malkan, & M. Elvis.* 457, 169, 20-D1 (1996)

An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81. *M. F. Bietenholz, N. Bartel, M. P. Rupen, J. E. Conway, A. J. Beasley, R. A. Sramek, J. D. Romney, M. A. Titus, D. A. Graham, V. I. Altunin, D. L. Jones, A. Rius, T. Venturi, G. Umana, K. W. Weiler, S. D. Van Dyk, N. Panagia, W. H. Cannon, J. Popelar, & R. J. Davis.* 457, 604, 28-B9 (1996)

Powerful Ejection of Matter from Tidally Disrupted Stars near Massive Black Holes and a Possible Application to Sagittarius A East. *Alexei Khokhlov & Fulvio Melia.* 457, L61, 34-D4 (1996)

Spectral Relation between X-Rays and Gamma Rays for Blazar High-Energy Emission. *Jiancheng Wang, Qinghuan Luo, & Guangzhong Xie.* 457, L65, 34-D12 (1996)

The Parsec-Scale Structure of NGC 1275 at 1.3 GHz. *G. B. Taylor & R. C. Vermeulen.* 457, L69, 34-E6 (1996)

X-Ray Reprocessing by a Molecular Torus in the Seyfert 1.9 Galaxy NGC 2992. *K. A. Weaver, J. Nousek, T. Yaqoob, R. F. Mushotzky, F. Makino, & C. Otani.* 458, 160, 38-C6 (1996)

Complex Gaseous Structure in the Nucleus of NGC 5252. *Zlatan I. Tsvetanov, Jon A. Morse, Andrew S. Wilson, & Gerald Cecil.* 458, 172, 38-D7 (1996)

GALAXIES: PECULIAR

Complex Gaseous Structure in the Nucleus of NGC 5252. *Zlatan I. Tsvetanov, Jon A. Morse, Andrew S. Wilson, & Gerald Cecil.* 458, 172, 38-D7 (1996)

Spectrophotometry and Stellar Population Models of "E + A" Galaxies. *Charles T. Liu & Robert F. Green.* 458, L63, 52-A7 (1996)

GALAXIES: PHOTOMETRY

High-Resolution *IRAS* Maps and Infrared Emission of M31. I. Morphology and Sources. *Cong Xu & George Helou.* 456, 152, 3-A13 (1996)

High-Resolution *IRAS* Maps and Infrared Emission of M31. II. Diffuse Component and Interstellar Dust. *Cong Xu & George Helou.* 456, 163, 3-C1 (1996)

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

Very Luminous Giant Stars in the Central Region of M33. *I. S. McLean & T. Liu.* 456, 499, 10-D3 (1996)

X-Ray Constraints on the Intrinsic Shape of the Lenticular Galaxy NGC 1332. *David A. Buote & Claude R. Canizares.* 457, 177, 20-D12 (1996)

Interpreting Central Surface Brightness and Color Profiles in Elliptical Galaxies. *David R. Silva & Michael W. Wise.* 457, L15, 25-F1 (1996)

An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

A Dust Lane in the Radio Galaxy 3C 270. *Ashish Mahabal, Ajit Kembhavi, K. P. Singh, P. N. Bhat, & T. P. Prabhu.* 457, 598, 29-A12 (1996)

Uncertainties in the Modeling of Old Stellar Populations. *Stéphane Charlot, Guy Worthey, & Alessandro Bressan.* 457, 625, 29-D12 (1996)

Internal Absorption and the Luminosity of Disk Galaxies. *Boqi Wang & Timothy M. Heckman.* 457, 645, 29-F7 (1996)

Evidence for Secular Evolution in Late-Type Spirals. *Stéphane Courteau, Roelof S. de Jong, & Adrick H. Broeils.* 457, L73, 34-E13 (1996)

Faint Blue Galaxies and the Epoch of Dwarf Galaxy Formation. *Arif Babul & Henry C. Ferguson.* 458, 100, 37-E1 (1996)

GALAXIES: QUASARS: ABSORPTION LINES

A 21 Centimeter Absorber Identified with a Spiral Galaxy: *Hubble Space Telescope* Faint Object Spectrograph and Wide-Field Camera Observations of 3CR 196. *Ross D. Cohen, E. A. Beaver, Athanassios Diplas, Vesa T. Junkkarinen, Thomas A. Barlow, & Ronald W. Lyons.* 456, 132, 2-F12 (1996)

High-Ionization Quasar Absorption Lines: A Test of the Existence of Hot Gas in Spiral-rich Groups. *John S. Mulchaey, Richard F. Mushotzky, David Burstein, & David S. Davis.* 456, L5, 7-B10 (1996)

A Redshift 4.38 Mg II Absorber toward BR 1202−0725. *Richard Elston, Jill Bechtold, Gary J. Hill, & Jian Ge.* 456, L13, 7-C10 (1996)

The Gaseous Extent of Galaxies and the Origin of Lyα Systems. II. Identification of a Group or Cluster of Lyα Absorbing Galaxies at $z \cong 0.26$. *Kenneth M. Lanzetta, John K. Webb, & Xavier Barcons.* 456, L17, 7-D4 (1996)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. VII. Absorption Systems at $z_{abs} \leq 1.3$. *John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, W. L. W. Sargent, Blair D. Savage, Donald P. Schneider, David A. Turnshek, Ray J. Weymann, & Arthur M. Wolfe.* 457, 19, 18-D11 (1996)

Simulation Analysis of Lyα Forest Spectra. I. Empirical Description at $z \approx 3$. *Adam Dobrzycki & Jill Bechtold.* 457, 102, 19-D13 (1996)

Properties of a High-Redshift Galaxy at $z = 4.4$. *Limin Lu, Wallace L. W. Sargent, Donna S. Womble, & Thomas A. Barlow.* 457, L1, 25-D1 (1996)

Gravitational Lensing of Quasi-stellar Objects by Their Damped Lyα Absorbers. *Matthias Bartelmann & Abraham Loeb.* 457, 529, 28-B5 (1996)

Requirements for Investigating the Connection between Lyman-α Absorption Clouds and the Large-Scale Distribution of Galaxies. *Vicki L. Sarajedini, Richard F. Green, & Buell T. Jannuzi.* 457, 542, 28-C7 (1996)

Cosmic Metal Production and the Contribution of QSO Absorption Systems to the Ionizing Background. *Piero Madau & J. Michael Shull.* 457, 551, 28-D5 (1996)

The Lyman-Alpha Forest in the Cold Dark Matter Model. *Lars Hernquist, Neal Katz, David H. Weinberg, & Jordi Miralda-Escudé.* 457, L51, 34-C1 (1996)

Damped Lyman-Alpha and Lyman Limit Absorbers in the Cold Dark Matter Model. *Neal Katz, David H. Weinberg, Lars Hernquist, & Jordi Miralda-Escudé.* 457, L57, 34-C10 (1996)

Far-UV Spectral Variability in the Gravitational Lens Candidate UM 425. *A. G. Michalitsianos, R. J. Oliversen, & S. P. Maran.* 458, 67, 37-B3 (1996)

Two-Point Velocity and Spatial Correlation Functions of the C IV Absorption Systems toward the Tololo Quasar Group: Evidence for Superclustering at $z \simeq 2$. *Nadine Dinshaw & Chris D. Impey.* 458, 73, 37-B12 (1996)

Are Lyman-Alpha Clouds Associated with Low Surface Brightness Galaxies? *M. Rauch, R. J. Weymann, & S. L. Morris.* 458, 518, 45-G9 (1996)

GALAXIES: QUASARS: EMISSION LINES

Discovery of a Type 2 Quasar at $z = 0.9$. *Kouji Ohta, Toru Yamada, Kouichiro Nakanishi, Yasushi Ogasaka, Tsuneo Kii, & Kiyoshi Hayashida.* 458, L57, 51-G12 (1996)

GALAXIES: QUASARS: GENERAL

Constraints on the Extragalactic Background Light from Gamma-Ray Observations of High-Redshift Quasars. *Piero Madau & E. Sterl Phinney.* 456, 124, 2-F1 (1996)

The Serendipitous Discovery of a Group or Cluster of Young Galaxies at $z \approx 2.40$ in Deep *Hubble Space Telescope* WFPC2 Images. *S. M. Pascarelle, R. A. Windhorst, S. P. Driver, E. J. Ostrander, & W. C. Keel.* 456, L21, 7-D11 (1996)

The *ROSAT*-PSPC Spectrum of Bright Low-z Quasars. *M.-H. Ulrich-Demoulin & S. Molendi.* 457, 77, 19-B8 (1996)

Relations between the Optical Fe II Emission and Ultraviolet Spectra in Active Galactic Nuclei. *Ting-Gui Wang, You-Yuan Zhou, & An-Song Gao.* 457, 111, 19-E11 (1996)

Two-Point Velocity and Spatial Correlation Functions of the C IV Absorption Systems toward the Tololo Quasar Group: Evidence for Superclustering at $z \simeq 2$. *Nadine Dinshaw & Chris D. Impey.* 458, 73, 37-B12 (1996)

Evolution of an Accretion Disk in an Active Galactic Nucleus. *Aneta Siemiginowska, Bożena Czerny, & Vadim Kostyunin.* 458, 491, 45-D12 (1996)

Discovery of a Type 2 Quasar at $z = 0.9$. *Kouji Ohta, Toru Yamada, Kouichiro Nakanishi, Yasushi Ogasaka, Tsuneo Kii, & Kiyoshi Hayashida.* 458, L57, 51-G12 (1996)

GALAXIES: QUASARS: INDIVIDUAL

Alphanumeric: 1202−07

A Redshift 4.38 Mg II Absorber toward BR 1202−0725. *Richard Elston, Jill Bechtold, Gary J. Hill, & Jian Ge.* 456, L13, 7-C10 (1996)

Alphanumeric: 1633+382

Constraints on the Extragalactic Background Light from Gamma-Ray Observations of High-Redshift Quasars. *Piero Madau & E. Sterl Phinney.* 456, 124, 2-F1 (1996)

Alphanumeric: 3C 273

Are Lyman-Alpha Clouds Associated with Low Surface Brightness Galaxies? *M. Rauch, R. J. Weymann, & S. L. Morris.* 458, 518, 45-G9 (1996)

Alphanumeric: 3CR 196

A 21 Centimeter Absorber Identified with a Spiral Galaxy: *Hubble Space Telescope* Faint Object Spectrograph and Wide-Field Camera Observations of 3CR 196. *Ross D. Cohen, E. A. Beaver, Athanassios Diplas, Vesa T. Junkkarinen, Thomas A. Barlow, & Ronald W. Lyons.* 456, 132, 2-F12 (1996)

Alphanumeric: FSC 10214+4724

FSC 10214+4724: A Gravitationally Lensed, Hidden QSO. *Robert W. Goodrich, Joseph S. Miller, André Martel, Marshall H. Cohen, Hien D. Tran, Patrick M. Ogle, & René C. Vermeulen.* 456, L9, 7-C3 (1996)

Alphanumeric: PG 0052+251

The Apparently Normal Galaxy Hosts for Two Luminous Quasars. *John N. Bahcall, Sofia Kirhakos, & Donald P. Schneider.* 457, 557, 28-E1 (1996)

Alphanumeric: PHL 909

The Apparently Normal Galaxy Hosts for Two Luminous Quasars. *John N. Bahcall, Sofia Kirhakos, & Donald P. Schneider.* 457, 557, 28-E1 (1996)

Alphanumeric: Q1120+019

Far-UV Spectral Variability in the Gravitational Lens Candidate UM 425. *A. G. Michalitsianos, R. J. Oliversen, & S. P. Maran.* 458, 67, 37-B3 (1996)

Alphanumeric: UM 425

Far-UV Spectral Variability in the Gravitational Lens Candidate UM 425. *A. G. Michalitsianos, R. J. Oliversen, & S. P. Maran.* 458, 67, 37-B3 (1996)

GALAXIES: SEYFERT

Is the X-Ray Spectrum of the Seyfert 2 Galaxy NGC 5252 Intrinsically Flat? *M. Cappi, T. Mihara, M. Matsuoka, W. Brinkmann, M. A. Prieto, & G. G. C. Palumbo.* 456, 141, 2-G12 (1996)

Spectropolarimetric Test of the Relativistic Disk Model for the Broad Hα Line of Arp 102B. *Robert Antonucci, Todd Hurt, & Eric Agol.* 456, L25, 7-E6 (1996)

The Soft X-Ray Spectral Shape of X-Ray–weak Seyfert Galaxies. *Brian Rush & Matthew A. Malkan.* 456, 466, 10-A6 (1996)

The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

The Subarcsecond Radio Structure in NGC 1068. I. Observations and Results. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, & A. Pedlar.* 458, 136, 38-A4 (1996)

Warm Absorber, Reflection, and Fe K Line in the X-Ray Spectrum of IC 4329A. *M. Cappi, T. Mihara, M. Matsuoka, K. Hayashida, K. A. Weaver, & C. Otani.* 458, 149, 38-B6 (1996)

X-Ray Reprocessing by a Molecular Torus in the Seyfert 1.9 Galaxy NGC 2992. *K. A. Weaver, J. Nousek, T. Yaqoob, R. F. Mushotzky, F. Makino, & C. Otani.* 458, 160, 38-C6 (1996)

Complex Gaseous Structure in the Nucleus of NGC 5252. *Zlatan I. Tsvetanov, Jon A. Morse, Andrew S. Wilson, & Gerald Cecil.* 458, 172, 38-D7 (1996)

GALAXIES: SPIRAL

The Composition Gradient in M101 Revisited. I. H II Region Spectra and Excitation Properties. *Robert C. Kennicutt, Jr., & Donald R. Garnett.* 456, 504, 10-D12 (1996)

Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

Internal Absorption and the Luminosity of Disk Galaxies. *Boqi Wang & Timothy M. Heckman.* 457, 645, 29-F7 (1996)

Evidence for Secular Evolution in Late-Type Spirals. *Stéphane Courteau, Roelof S. de Jong, & Adrick H. Broeils.* 457, L73, 34-E13 (1996)

GALAXIES: STARBURST

A Massive $z = 0.088$ Supercluster and Tests of Starburst Galaxy Evolution at the North Ecliptic Pole. *M. L. N. Ashby, Perry B. Hacking, J. R. Houck, B. T. Soifer, & E. W. Weisstein.* 456, 428, 9-D8 (1996)

HCN and CO in the Central 630 Parsecs of the Galaxy. *James M. Jackson, Mark H. Heyer, Timothy A. D. Paglione, & Alberto D. Bolatto.* 456, L91, 16-F13 (1996)

The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

Dust Obscuration in Starburst Galaxies from Near-Infrared Spectroscopy. *Daniela Calzetti, Anne L. Kinney, & Thaisa Storchi-Bergmann.* 458, 132, 37-G11 (1996)

The Kinematics of the Ionized and Molecular Hydrogen in the Starburst Galaxy NGC 253. *F. Prada, A. Manchado, Blaise Canzian, R. F. Peletier, C. D. McKeith, & J. E. Beckman.* 458, 537, 46-B13 (1996)

Spectrophotometry and Stellar Population Models of "E + A" Galaxies. *Charles T. Liu & Robert F. Green.* 458, L63, 52-A7 (1996)

GALAXIES: STAR CLUSTERS

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

The Formation of Globular Cluster Systems. I. The Luminosity Function. *Dean E. McLaughlin & Ralph E. Pudritz.* 457, 578, 28-G3 (1996)

The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

GALAXIES: STATISTICS

A Systematic Search for *IRAS* Galaxies behind the Milky Way. *Tadafumi Takata, Toru Yamada, & Mamoru Saitō.* 457, 693, 30-C12 (1996)

GALAXIES: STELLAR CONTENT

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

Very Luminous Giant Stars in the Central Region of M33. *I. S. McLean & T. Liu.* 456, 499, 10-D3 (1996)

On the Star Formation Rate, Initial Mass Function, and Hubble Type of Disk Galaxies and the Age of the Universe. *Jesper Sommer-Larsen.* 457, 118, 19-F7 (1996)

Uncertainties in the Modeling of Old Stellar Populations. *Stéphane Charlot, Guy Worthey, & Alessandro Bressan.* 457, 625, 29-D12 (1996)

The Stellar Halo of M104. I. A Survey for Planetary Nebulae and the Planetary Nebula Luminosity Function Distance. *H. C. Ford, X. Hui, R. Ciardullo, G. H. Jacoby, & K. C. Freeman.* 458, 455, 45-A8 (1996)

Spectrophotometry of Blue Compact Galaxies with Broad Emission Lines: Evidence for High-Velocity Gas Motion. *Yuri I. Izotov, Andrew B. Dyak, Frederic H. Chaffee, Craig B. Foltz, Alexei Y. Kniazev, & Valentin A. Lipovetsky.* 458, 524, 46-A7 (1996)

Spectrophotometry and Stellar Population Models of "E + A" Galaxies. *Charles T. Liu & Robert F. Green.* 458, L63, 52-A7 (1996)

GALAXIES: STRUCTURE

Analysis of Galaxy Morphology and Evolution Using the Pointwise Dimension. *Jason S. Best, Jane C. Charlton, & Gottfried Mayer-Kress.* 456, 55, 1-F8 (1996)

On the Star Formation Rate, Initial Mass Function, and Hubble Type of Disk Galaxies and the Age of the Universe. *Jesper Sommer-Larsen.* 457, 118, 19-F7 (1996)

Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

X-Ray Constraints on the Intrinsic Shape of the Lenticular Galaxy NGC 1332. *David A. Buote & Claude R. Canizares.* 457, 177, 20-D12 (1996)

The Apparently Normal Galaxy Hosts for Two Luminous Quasars. *John N. Bahcall, Sofia Kirhakos, & Donald P. Schneider.* 457, 557, 28-E1 (1996)

Supershells and Chimneys: The Giant Ionized Gas Filaments in NGC 1800. *Deidre A. Hunter.* 457, 671, 30-A12 (1996)

Evidence for Secular Evolution in Late-Type Spirals. *Stéphane Courteau, Roelof S. de Jong, & Adrick H. Broeils.* 457, L73, 34-E13 (1996)

Quantifying the Morphologies and Dynamical Evolution of Galaxy Clusters. II. Application to a Sample of *ROSAT* Clusters. *David A. Buote & John C. Tsai.* 458, 27, 36-E6 (1996)

The Subarcsecond Radio Structure in NGC 1068. I. Observations and Results. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, & A. Pedlar.* 458, 136, 38-A4 (1996)

GALAXY: ABUNDANCES

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

GALAXY: CENTER

Stellar Kinematics and the Black Hole in the Galactic Center. *Joseph W. Haller, M. J. Rieke, G. H. Rieke, P. Tamblyn, L. Close, & F. Melia.* 456, 194, 3-F2 (1996)

The Peculiar Population of Hot Stars at the Galactic Center. *Peter Tamblyn, G. H. Rieke, Margaret Murray Hanson, L. M. Close, D. W. McCarthy, Jr., & M. J. Rieke.* 456, 206, 3-G3 (1996)

10–30 Micron Maps of the Central 5 Parsecs of the Galaxy: Heating of the Cavity and Neutral Gas Disk. *C. M. Telesco, J. A. Davidson, & M. W. Werner.* 456, 541, 11-A2 (1996)

HCN and CO in the Central 630 Parsecs of the Galaxy. *James M. Jackson, Mark H. Heyer, Timothy A. D. Paglione, & Alberto D. Bolatto.* 456, L91, 16-F13 (1996)

A Dust Lane Leading the Galactic Bar at Negative Galactic Longitudes. *X. Calbet, T. Mahoney, P. L. Hammersley, F. Garzón, & M. Lopez-Corredoira.* 457, L27, 26-A1 (1996)

Powerful Ejection of Matter from Tidally Disrupted Stars near Massive Black Holes and a Possible Application to Sagittarius A East. *Alexei Khokhlov & Fulvio Melia.* 457, L61, 34-D4 (1996)

Detection of Ionized Gas toward an OH/IR Star: A Measure of the UV Radiation Field near the Galactic Center. *Farhad Yusef-Zadeh, Mark Wardle, & Douglas Roberts.* 458, L21, 42-F10 (1996)

Limits on Reported Transient Emission Events near 0.5 MeV from the Crab and 1E 1740.7−2942. *D. M. Smith, M. Leventhal, R. Cavallo, N. Gehrels, J. Tueller, & G. Fishman.* 458, 576, 46-F6 (1996)

GALAXY: FORMATION

A Redshift 4.38 Mg II Absorber toward BR 1202−0725. *Richard Elston, Jill Bechtold, Gary J. Hill, & Jian Ge.* 456, L13, 7-C10 (1996)

GALAXY: FUNDAMENTAL PARAMETERS

The Mass of the Milky Way. *Christopher S. Kochanek.* 457, 228, 21-B3 (1996)

GALAXY: GLOBULAR CLUSTERS: GENERAL

The Formation of Globular Cluster Systems. I. The Luminosity Function. *Dean E. McLaughlin & Ralph E. Pudritz.* 457, 578, 28-G3 (1996)

Truncation of the Binary Distribution Function in Globular Cluster Formation. *E. Vesperini & David F. Chernoff.* 458, 178, 38-E3 (1996)

GALAXY: HALO

Analysis of a *Hubble Space Telescope* Search for Red Dwarfs: Limits on Baryonic Matter in the Galactic Halo. *David S. Graff & Katherine Freese.* 456, L49, 8-A8 (1996)

The Role of Thermal Instabilities on the Theoretical Mass Function of MACHOs. *E. M. de Gouveia Dal Pino, J. E. Horvath, & J. A. de Freitas Pacheco.* 456, L97, 17-A9 (1996)

The Gas and Dust Abundances of Diffuse Halo Clouds in the Milky Way. *Kenneth R. Sembach & Blair D. Savage.* 457, 211, 20-G11 (1996)

Intermediate-Velocity Gas in the North Galactic Hemisphere: H I Studies. *K. D. Kuntz & L. Danly.* 457, 703, 30-D11 (1996)

Discovery of a Tidal Extension of the Sagittarius Dwarf Spheroidal Galaxy. *Mario Mateo, Nestor Mirabal, A. Udalski, M. Szymański, J. Kałużny, M. Kubiak, W. Krzemiński, & K. Z. Stanek.* 458, L13, 42-E10 (1996)

Highly Ionized Interstellar Atoms–Heated, Cooled, or Mixed? *Lyman Spitzer, Jr.* 458, L29, 42-G10 (1996)

Lithium Processing in Halo Dwarfs, and T_{eff}, [Fe/H] Correlations on the Spite Plateau. *Sean G. Ryan, Timothy C. Beers, Constantine P. Deliyannis, & Julie A. Thorburn.* 458, 543, 46-C8 (1996)

GALAXY: KINEMATICS AND DYNAMICS

Stellar Kinematics and the Black Hole in the Galactic Center. *Joseph W. Haller, M. J. Rieke, G. H. Rieke, P. Tamblyn, L. Close, & F. Melia.* 456, 194, 3-F2 (1996)

The Mass of the Milky Way. *Christopher S. Kochanek.* 457, 228, 21-B3 (1996)

GALAXY: OPEN CLUSTERS AND ASSOCIATIONS: GENERAL

Main-Sequence Masses and Radii from Gravitational Redshifts. *Ted von Hippel.* 458, L37, 43-A11 (1996)

GALAXY: OPEN CLUSTERS AND ASSOCIATIONS: INDIVIDUAL

NGC Number: NGC 1770

IUE Observations of Young Clusters in the Large Magellanic Cloud. *Eric M. Wilcots, Paul W. Hodge, & Nichole King.* 458, 580, 46-F13 (1996)

NGC Number: NGC 2014

IUE Observations of Young Clusters in the Large Magellanic Cloud. *Eric M. Wilcots, Paul W. Hodge, & Nichole King.* 458, 580, 46-F13 (1996)

Name: Pleiades

Lithium in Brown Dwarf Candidates: The Mass and Age of the Faintest Pleiades Stars. *Gibor Basri, Geoffrey W. Marcy, & James R. Graham.* 458, 600, 47-B3 (1996)

GALAXY: STELLAR CONTENT

Analysis of a *Hubble Space Telescope* Search for Red Dwarfs: Limits on Baryonic Matter in the Galactic Halo. *David S. Graff & Katherine Freese.* 456, L49, 8-A8 (1996)

GALAXY: STRUCTURE

Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

A Dust Lane Leading the Galactic Bar at Negative Galactic Longitudes. *X. Calbet, T. Mahoney, P. L. Hammersley, F. Garzón, & M. Lopez-Corredoira.* 457, L27, 26-A1 (1996)

Microlensing of Disk Source. *S. Mollerach & E. Roulet.* 458, L9, 42-E3 (1996)

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

GAMMA RAYS: BURSTS

An Estimate of the Motion-induced Dipole Moment in the Spatial Distribution of Cosmological Gamma-Ray Bursts. *J. J. Brainerd.* 456, 449, 9-F10 (1996)

Is There Evidence for Repeating Gamma-Ray Bursters in the BATSE Data? *David P. Bennett & Sun Hong Rhie.* 458, 293, 40-A12 (1996)

BATSE Gamma-Ray Burst Line Search. IV. Line Candidates from the Visual Search. *D. L. Band, S. Ryder, L. A. Ford, J. L. Matteson, D. M. Palmer, B. J. Teegarden, M. S. Briggs, W. S. Paciesas, G. N. Pendleton, & R. D. Preece.* 458, 746, 49-B3 (1996)

GAMMA RAYS: OBSERVATIONS

Constraints on the Extragalactic Background Light from Gamma-Ray Observations of High-Redshift Quasars. *Piero Madau & E. Sterl Phinney.* 456, 124, 2-F1 (1996)

Detection of Gamma Rays with $E > 300$ GeV from Markarian 501. *J. Quinn, C. W. Akerlof, S. Biller, J. Buckley, D. A. Carter-Lewis, M. F. Cawley, M. Catanese, V. Connaughton, D. J. Fegan, J. P. Finley, J. Gaidos, A. M. Hillas, R. C. Lamb, F. Krennrich, R. Lessard, J. E. McEnery, D. I. Meyer, G. Mohanty, A. J. Rodgers, H. J. Rose, G. Sembroski, M. S. Schubnell, T. C. Weekes, C. Wilson, & J. Zweerink.* 456, L83, 16-F13 (1996)

Gamma-Ray Observations of the Crab Nebula: A Study of the Synchro-Compton Spectrum. *O. C. de Jager, A. K. Harding, P. F. Michelson, H. I. Nel, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 457, 253, 21-D6 (1996)

Spectral Relation between X-Rays and Gamma Rays for Blazar High-Energy Emission. *Jiancheng Wang, Qinghuan Luo, & Guangzhong Xie.* 457, L65, 34-D12 (1996)

Is There Evidence for Repeating Gamma-Ray Bursters in the BATSE Data? *David P. Bennett & Sun Hong Rhie.* 458, 293, 40-A12 (1996)

Formation and Radiation Acceleration of Pair Plasmoids near Galactic Black Holes. *Hui Li & Edison P. Liang.* 458, 514, 45-G1 (1996)

Limits on Reported Transient Emission Events near 0.5 MeV from the Crab and 1E 1740.7−2942. *D. M. Smith, M. Leventhal, R. Cavallo, N. Gehrels, J. Tueller, & G. Fishman.* 458, 576, 46-F6 (1996)

Possible Evidence for Pulsed Emission of High-Energy Gamma Rays by PSR B0656+14. *P. V. Ramanamurthy, C. E. Fichtel, D. A. Kniffen, P. Sreekumar, & D. J. Thompson.* 458, 755, 49-C1 (1996)

GAMMA RAYS: THEORY

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

Gamma-Ray Pulsars: Emission from Extended Polar Cap Cascades. *Joseph K. Daugherty & Alice K. Harding.* 458, 278, 39-G8 (1996)

GRAVITATION

Evolution of the Potential in Cosmological Gravitational Clustering. *Adrian L. Melott, B. S. Sathyaprakash, & Varun Sahni.* 456, 65, 1-G7 (1996)

Effects of Dark Matter on the Stability of Supermassive Stars. *Gail C. McLaughlin & George M. Fuller.* 456, 71, 2-A2 (1996)

A New Method for Obtaining Binary Pulsar Distances and Its Implications for Tests of General Relativity. *J. F. Bell & M. Bailes.* 456, L33, 7-F7 (1996)

Experimental Limits on the Density of Dark Matter in the Solar System. *Øyvind Grøn & Harald H. Soleng.* 456, 445, 9-F3 (1996)

Beyond the Thin Lens Approximation. *Ted Pyne & Mark Birkinshaw.* 458, 46, 36-G1 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

Main-Sequence Masses and Radii from Gravitational Redshifts. *Ted von Hippel.* 458, L37, 43-A11 (1996)

HYDRODYNAMICS

Galaxy Formation in a CDM + Λ Universe. I. Properties of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 1, 1-B1 (1996)

Galaxy Formation in a CDM + Λ Universe. II. Spatial Distribution of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 34, 1-D9 (1996)

Water Maser Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 250, 4-D9 (1996)

The Effect of Gravitational Instabilities on Protostellar Disks. *Gregory Laughlin & Michał Różyczka.* 456, 279, 4-G4 (1996)

Cluster Accretion Shocks as Possible Acceleration Sites for Ultra–High-Energy Protons below the Greisen Cutoff. *Hyesung Kang, Dongsu Ryu, & T. W. Jones.* 456, 422, 9-C13 (1996)

Waves in Radiating Fluids. *T. J. Bogdan, M. Knölker, K. B. MacGregor, & E.-J. Kim.* 456, 879, 15-F6 (1996)

On the Quasi-hydrostatic Flows of Radiatively Cooling Self-gravitating Gas Clouds. *Baruch Meerson, Ephraim Megged, & Toshiki Tajima.* 457, 321, 22-D1 (1996)

Explosion Models for Type Ia Supernovae: A Comparison with Observed Light Curves, Distances, H_0, and q_0. *P. Höflich & A. Khokhlov.* 457, 500, 27-G1 (1996)

Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

The Shaping of Planetary Nebulae: Asymmetry in the External Wind. *Vikram V. Dwarkadas, Roger A. Chevalier, & John M. Blondin.* 457, 773, 31-E7 (1996)

Resonance Oscillation of Radiative Shock Waves in Accretion Disks around Compact Objects. *Diego Molteni, Hanno Sponholz, & Sandip K. Chakrabarti.* 457, 805, 32-A6 (1996)

Damped Lyman-Alpha and Lyman Limit Absorbers in the Cold Dark Matter Model. *Neal Katz, David H. Weinberg, Lars Hernquist, & Jordi Miralda-Escudé.* 457, L57, 34-C10 (1996)

Photon Bubble Oscillations in Accretion-powered Pulsars. *Richard I. Klein, Jonathan Arons, Garrett Jernigan, & Juliana J.-L. Hsu.* 457, L85, 34-G6 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

The Disk Accretion Rate for Dynamo-generated Turbulence. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 458, L45, 43-B10 (1996)

Double-Core Evolution. IX. The Infall of a Main-Sequence Star through the Envelope of Its Intermediate-Mass Red Giant Companion. *James L. Terman & Ronald E. Taam.* 458, 692, 48-C11 (1996)

New Global Instabilities of the Riemann Ellipsoids. *Norman R. Lebovitz & Alexander Lifschitz.* 458, 699, 48-D7 (1996)

The Dynamic Stability of Rotating Protostars and Protostellar Disks. I. The Effects of the Angular Momentum Distribution. *Brian K. Pickett, Richard H. Durisen, & Glen A. Davis.* 458, 714, 48-E12 (1996)

Scaling Relations for the Turbulent, Non–Self-gravitating, Neutral Component of the Interstellar Medium. *Robert C. Fleck, Jr.* 458, 739, 49-A1 (1996)

Equilibrium of Twisted Horizontal Magnetic Flux Tubes. *T. Emonet & F. Moreno-Insertis.* 458, 783, 49-E7 (1996)

INFRARED: GALAXIES

High-Resolution *IRAS* Maps and Infrared Emission of M31. II. Diffuse Component and Interstellar Dust. *Cong Xu & George Helou.* 456, 163, 3-C1 (1996)

A Massive $z = 0.088$ Supercluster and Tests of Starburst Galaxy Evolution at the North Ecliptic Pole. *M. L. N. Ashby, Perry B. Hacking, J. R. Houck, B. T. Soifer, & E. W. Weisstein.* 456, 428, 9-D8 (1996)

An Ionization Cone and Dusty Disk in Markarian 348: The Obscuring Torus Revealed? *Chris Simpson, John S. Mulchaey, A. S. Wilson, M. J. Ward, & A. Alonso-Herrero.* 457, L19, 25-F11 (1996)

A Search for CO Emission in High-Redshift Powerful Radio Galaxies. *A. S. Evans, D. B. Sanders, J. M. Mazzarella, P. M. Solomon, D. Downes, C. Kramer, & S. J. E. Radford.* 457, 658, 29-G9 (1996)

A Systematic Search for *IRAS* Galaxies behind the Milky Way. *Tadafumi Takata, Toru Yamada, & Mamoru Saitō.* 457, 693, 30-C12 (1996)

Dust Obscuration in Starburst Galaxies from Near-Infrared Spectroscopy. *Daniela Calzetti, Anne L. Kinney, & Thaisa Storchi-Bergmann.* 458, 132, 37-G11 (1996)

The Kinematics of the Ionized and Molecular Hydrogen in the Starburst Galaxy NGC 253. *F. Prada, A. Manchado, Blaise Canzian, R. F. Peletier, C. D. McKeith, & J. E. Beckman.* 458, 537, 46-B13 (1996)

INFRARED: INTERSTELLAR: CONTINUUM

COBE/DIRBE Observations of the Orion Constellation from the Near- to Far-Infrared. *W. F. Wall, W. T. Reach, M. G. Hauser, R. G. Arendt, J. L. Weiland, G. B. Berriman, C. L. Bennett, Eli Dwek, D. Leisawitz, P. M. Mitra, Sten F. Odenwald, T. J. Sodroski, & G. N. Toller.* 456, 566, 11-C6 (1996)

INFRARED: ISM: CONTINUUM

10–30 Micron Maps of the Central 5 Parsecs of the Galaxy: Heating of the Cavity and Neutral Gas Disk. *C. M. Telesco, J. A. Davidson, & M. W. Werner.* 456, 541, 11-A2 (1996)

Extinction and Polarization by Ellipsoidal Particles in the Infrared. *Masafumi Matsumura & Munezo Seki.* 456, 557, 11-B8 (1996)

Cooling, Sputtering, and Infrared Emission from Dust Grains in Fast Nonradiative Shocks. *Eli Dwek, Scott M. Foster, & Olaf Vancura.* 457, 244, 21-C8 (1996)

A Dust Lane Leading the Galactic Bar at Negative Galactic Longitudes. *X. Calbet, T. Mahoney, P. L. Hammersley, F. Garzón, & M. Lopez-Corredoira.* 457, L27, 26-A1 (1996)

INFRARED: ISM: LINES AND BANDS

Far-Infrared Water Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 611, 11-G6 (1996)

H_2 Emission from the Inner 400 Parsecs of the Galaxy. *Soojong Pak, D. T. Jaffe, & L. D. Keller.* 457, L43, 26-C3 (1996)

Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices. *D. C. B. Whittet, R. G. Smith, A. J. Adamson, D. K. Aitken, J. E. Chiar, T. H. Kerr, P. F. Roche, C. H. Smith, & C. M. Wright.* 458, 363, 41-A6 (1996)

Spatial Variation of the 3.29 and 3.40 Micron Emission Bands within Reflection Nebulae and the Photochemical Evolution of Methylated Polycyclic Aromatic Hydrocarbons. *C. Joblin, A. G. G. M. Tielens, L. J. Allamandola, & T. R. Geballe.* 458, 610, 47-C2 (1996)

INFRARED: STARS

The Peculiar Population of Hot Stars at the Galactic Center. *Peter Tamblyn, G. H. Rieke, Margaret Murray Hanson, L. M. Close, D. W. McCarthy, Jr., & M. J. Rieke.* 456, 206, 3-G3 (1996)

High-Resolution Spectroscopy of Brγ Emission in Young Stellar Objects. *Joan Najita, John S. Carr, & Alan T. Tokunaga.* 456, 292, 5-A6 (1996)

Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

Lithium Enrichment–Mass-Loss Connection in K Giant Stars. *R. de la Reza, N. A. Drake, & L. da Silva.* 456, L115, 17-C10 (1996)

The Connection between Submillimeter Continuum Flux and Binary Separation in Young Binaries: Evidence of Interaction between Stars and Disks. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 458, 312, 40-C9 (1996)

The Deeply Embedded Source That Drives the Protostellar Outflow in AFGL 437: Evidence from Near-Infrared Polarimetric Imaging. *David A. Weintraub & Joel H. Kastner.* 458, 670, 48-A10 (1996)

INSTABILITIES

Effects of Dark Matter on the Stability of Supermassive Stars. *Gail C. McLaughlin & George M. Fuller.* 456, 71, 2-A2 (1996)

WFPC2 Studies of the Crab Nebula. III. Magnetic Rayleigh-Taylor Instabilities and the Origin of the Filaments. *J. Jeff Hester, James M. Stone, Paul A. Scowen, Byung-Il Jun, John S. Gallagher III, Michael L. Norman, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, John Krist, Jeremy R. Mould, Ravi Sankrit, Karl R. Stapelfeldt, John T. Trauger, Alan Watson, & James A. Westphal.* 456, 225, 4-A12 (1996)

On the Radial Orbi. Instability. *Pablo M. Cincotta, Josué A. Núñez, & Juan C. Muzzio.* 456, 274, 4-F10 (1996)

The Effect of Gravitational Instabilities on Protostellar Disks. *Gregory Laughlin & Michał Różyczka.* 456, 279, 4-G4 (1996)

On the Nonlinear Evolution of Magnetohydrodynamic Kelvin-Helmholtz Instabilities. *Andrea Malagoli, Gianluigi Bodo, & Robert Rosner.* 456, 708, 13-D2 (1996)

On the Quasi-hydrostatic Flows of Radiatively Cooling Self-gravitating Gas Clouds. *Baruch Meerson, Ephraim Megged, & Toshiki Tajima.* 457, 321, 22-D1 (1996)

Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

Damping of the Shear Instability in Magnetized Disks by Ohmic Diffusion. *Liping Jin.* 457, 798, 31-G10 (1996)

Photon Bubble Oscillations in Accretion-powered Pulsars. *Richard I. Klein, Jonathan Arons, Garrett Jernigan, & Juliana J.-L. Hsu.* 457, L85, 34-G6 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

The Stability Properties of Two-Temperature White Dwarf Radiative Shock Waves. *James N. Imamura, Abdossalam Aboasha, Michael T. Wolff, & Kent S. Wood.* 458, 327, 40-D13 (1996)

New Global Instabilities of the Riemann Ellipsoids. *Norman R. Lebovitz & Alexander Lifschitz.* 458, 699, 48-D7 (1996)

The Role of Doubly Diffusive Instabilities in the Core-Collapse Supernova Mechanism. *Stephen W. Bruenn & Tamara Dineva.* 458, L71, 52-B8 (1996)

INSTRUMENTATION: MISCELLANEOUS

The Contribution of Galactic Free-Free Emission to Anistropies in the Cosmic Microwave Background Found by the Saskatoon Experiment. *John H. Simonetti, Brian Dennison, & Gregory A. Topsana.* 458, L1, 42-D1 (1996)

INTERPLANETARY MEDIUM

Nonradial Coronal Streamers. *Y.-M. Wang.* 456, L119, 17-D3 (1996)

1985 *Voyager 2* Radio Ranging Measurements of Coronal Density: Asymmetry in the Radial Profiles Explained. *Richard Woo.* 458, L87, 52-D11 (1996)

ISM: ABUNDANCES

The Interstellar Boron Abundance toward Orion. *M. Jura, David M. Meyer, Isabel Hawkins, & Jason A. Cardelli.* 456, 598, 11-F1 (1996)

Infrared Emissivity of HD in Magnetohydrodynamic Shocks. *Ralf Timmermann.* 456, 631, 12-B8 (1996)

K4-55: A Bipolar Planetary Nebula Observed near Pole-on. *M. A. Guerrero, A. Manchado, & M. Serra-Ricart.* 456, 651, 12-E2 (1996)

The Gas and Dust Abundances of Diffuse Halo Clouds in the Milky Way. *Kenneth R. Sembach & Blair D. Savage.* 457, 211, 20-G11 (1996)

New High-Statistical–High-Resolution Measurements of the Cosmic-Ray CNO Isotopes from a 17 Year Study Using the *Voyager 1* and *2* Spacecraft. *W. R. Webber, A. Lukasiak, F. B. McDonald, & P. Ferrando.* 457, 435, 24-A1 (1996)

Molecular Cloudlets Embedded in a Diffuse H I Cloud within 120 Parsecs of the Sun. *Joaquín Trapero, María J. Sempere, John E. Beckman, & L. M. Hobbs.* 457, 731, 31-A5 (1996)

Cosmic Lithium: Going Up or Coming Down? *Gary Steigman.* 457, 737, 31-B1 (1996)

A New Look at Carbon Abundances in Planetary Nebulae. I. PB 6, Hu 2–1, K648, and H4–1. *R. B. C. Henry, K. B. Kwitter, & J. W. Howard.* 458, 215, 39-A7 (1996)

Highly Ionized Interstellar Atoms–Heated, Cooled, or Mixed? *Lyman Spitzer, Jr.* 458, L29, 42-G10 (1996)

The Radiative Association of Li^+ and H, Li and H^+, and Li and H. *A. Dalgarno, K. Kirby, & P. C. Stancil.* 458, 397, 44-C1 (1996)

Predicting Big Bang Deuterium. *N. Hata, R. J. Scherrer, G. Steigman, D. Thomas, & T. P. Walker.* 458, 637, 47-E9 (1996)

ISM: BUBBLES

X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

The Shaping of Planetary Nebulae: Asymmetry in the External Wind. *Vikram V. Dwarkadas, Roger A. Chevalier, & John M. Blondin.* 457, 773, 31-E7 (1996)

Interstellar Mass Outflow to Galactic Halos by the Supernova-driven Parker Instability. *Hideyuki Kamaya, Shin Mineshige, Kazunari Shibata, & Ryoji Matsumoto.* 458, L25, 42-G3 (1996)

ISM: CLOUDS

CN Zeeman Observations of Molecular Cloud Cores. *Richard M. Crutcher, Thomas H. Troland, Bernard Lazareff, & Ilya Kazès.* 456, 217, 4-A1 (1996)

Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

The Gas and Dust Abundances of Diffuse Halo Clouds in the Milky Way. *Kenneth R. Sembach & Blair D. Savage.* 457, 211, 20-G11 (1996)

Interferometric Observations at 2.7 Millimeters of the Nearest T Tauri Stars. *Marc W. Pound.* 457, L35, 26-B3 (1996)

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

Intermediate-Velocity Gas in the North Galactic Hemisphere: H I Studies. *K. D. Kuntz & L. Danly.* 457, 703, 30-D11 (1996)

Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

Molecular Cloudlets Embedded in a Diffuse H I Cloud within 120 Parsecs of the Sun. *Joaquín Trapero, María J. Sempere, John E. Beckman, & L. M. Hobbs.* 457, 731, 31-A5 (1996)

The Distribution of Dust Clouds in the Interstellar Medium. *Andrew R. Dring, Jayant Murthy, R. C. Henry, & H. J. Walker.* 457, 764, 31-D9 (1996)

Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

Scaling Relations for the Turbulent, Non–Self-gravitating, Neutral Component of the Interstellar Medium. *Robert C. Fleck, Jr.* 458, 739, 49-A1 (1996)

ISM: COSMIC RAYS

Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

Cluster Accretion Shocks as Possible Acceleration Sites for Ultra–High-Energy Protons below the Greisen Cutoff. *Hyesung Kang, Dongsu Ryu, & T. W. Jones.* 456, 422, 9-C13 (1996)

Production of Antiprotons in Interstellar Space by Propagating Cosmic Rays under Conditions of Diffusive Reacceleration. *M. Simon & U. Heinbach.* 456, 519, 10-F2 (1996)

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

New High-Statistical–High-Resolution Measurements of the Cosmic-Ray CNO Isotopes from a 17 Year Study Using the *Voyager 1* and *2* Spacecraft. *W. R. Webber, A. Lukasiak, F. B. McDonald, & P. Ferrando.* 457, 435, 24-A1 (1996)

Measurement of the Positron to Electron Ratio in Cosmic Rays above 5 GeV. *R. L. Golden, S. J. Stochaj, S. A. Stephens, F. Aversa, G. Barbiellini, M. Boezio, U. Bravar, A. Colavita, F. Fratnik, P. Schiavon, A. Vacchi, N. Zampa, J. W. Mitchell, J. F. Ormes, R. E. Steitmatter, R. Bellotti, F. Cafagna, M. Castellano, M. Circella, G. De Cataldo, C. De Marzo, N. Giglietto, B. Marangelli, A. Rainó, P. Spinelli, M. Bocciolini, N. Finetti, P. Papini, A. Perego, S. Piccardi, P. Spillantini, G. Basini, F. Massimo Brancaccio, M. Ricci, M. T. Brunetti, A. Codino, C. Grimani, M. Menichelli, V. Bidoli, M. Candusso, M. Casolino, M. P. De Pascale, A. Morselli, P. Picozza, R. Sparvoli, M. Hof, W. Menn, & M. Simon.* 457, L103, 35-C11 (1996)

A Dynamical Monte Carlo Simulation of a Collisionless Shock. *Jeffrey M. Knerr, J. R. Jokipii, & Donald C. Ellison.* 458, 641, 47-F3 (1996)

ISM: DUST, EXTINCTION

High-Resolution *IRAS* Maps and Infrared Emission of M31. I. Morphology and Sources. *Cong Xu & George Helou.* 456, 152, 3-A13 (1996)

High-Resolution *IRAS* Maps and Infrared Emission of M31. II. Diffuse Component and Interstellar Dust. *Cong Xu & George Helou.* 456, 163, 3-C1 (1996)

Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

10–30 Micron Maps of the Central 5 Parsecs of the Galaxy: Heating of the Cavity and Neutral Gas Disk. *C. M. Telesco, J. A. Davidson, & M. W. Werner.* 456, 541, 11-A2 (1996)

Extinction and Polarization by Ellipsoidal Particles in the Infrared. *Masafumi Matsumura & Munezo Seki.* 456, 557, 11-B8 (1996)

COBE/DIRBE Observations of the Orion Constellation from the Near- to Far-Infrared. *W. F. Wall, W. T. Reach, M. G. Hauser, R. G. Arendt, J. L. Weiland, G. B. Berriman, C. L. Bennett, Eli Dwek, D. Leisawitz, P. M. Mitra, Sten F. Odenwald, T. J. Sodroski, & G. N. Toller.* 456, 566, 11-C6 (1996)

The Interstellar Boron Abundance toward Orion. *M. Jura, David M. Meyer, Isabel Hawkins, & Jason A. Cardelli.* 456, 598, 11-F1 (1996)

The Opacity of Galactic Disks and Faint Blue Galaxy Number Counts. *Peter Leroy & Miguel Portilla.* 457, 145, 20-A13 (1996)

The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

The Gas and Dust Abundances of Diffuse Halo Clouds in the Milky Way. *Kenneth R. Sembach & Blair D. Savage.* 457, 211, 20-G11 (1996)

Cooling, Sputtering, and Infrared Emission from Dust Grains in Fast Nonradiative Shocks. *Eli Dwek, Scott M. Foster, & Olaf Vancura.* 457, 244, 21-C8 (1996)

A Dust Lane in the Radio Galaxy 3C 270. *Ashish Mahabal, Ajit Kembhavi, K. P. Singh, P. N. Bhat, & T. P. Prabhu.* 457, 598, 29-A12 (1996)

Internal Absorption and the Luminosity of Disk Galaxies. *Boqi Wang & Timothy M. Heckman.* 457, 645, 29-F7 (1996)

A Systematic Search for *IRAS* Galaxies behind the Milky Way. *Tadafumi Takata, Toru Yamada, & Mamoru Saitō.* 457, 693, 30-C12 (1996)

The Distribution of Dust Clouds in the Interstellar Medium. *Andrew R. Dring, Jayant Murthy, R. C. Henry, & H. J. Walker.* 457, 764, 31-D9 (1996)

Dust Obscuration in Starburst Galaxies from Near-Infrared Spectroscopy. *Daniela Calzetti, Anne L. Kinney, & Thaisa Storchi-Bergmann.* 458, 132, 37-G11 (1996)

Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices. *D. C. B. Whittet, R. G. Smith, A. J. Adamson, D. K. Aitken, J. E. Chiar, T. H. Kerr, P. F. Roche, C. H. Smith, & C. M. Wright.* 458, 363, 41-A6 (1996)

The Kinematics of the Ionized and Molecular Hydrogen in the Starburst Galaxy NGC 253. *F. Prada, A. Manchado, Blaise Canzian, R. F. Peletier, C. D. McKeith, & J. E. Beckman.* 458, 537, 46-B13 (1996)

Spatial Variation of the 3.29 and 3.40 Micron Emission Bands within Reflection Nebulae and the Photochemical Evolution of Methylated Polycyclic Aromatic Hydrocarbons. *C. Joblin, A. G. G. M. Tielens, L. J. Allamandola, & T. R. Geballe.* 458, 610, 47-C2 (1996)

Assessment of the Polycyclic Aromatic Hydrocarbon–Diffuse Interstellar Band Proposal. *F. Salama, E. L. O. Bakes, L. J. Allamandola, & A. G. G. M. Tielens.* 458, 621, 47-D3 (1996)

ISM: GENERAL

One-Photon Annihilation of Nonthermal Positrons in the Interstellar Medium. *Young-Dae Jung.* 457, 431, 23-G6 (1996)

Powerful Ejection of Matter from Tidally Disrupted Stars near Massive Black Holes and a Possible Application to Sagittarius A East. *Alexei Khokhlov & Fulvio Melia.* 457, L61, 34-D4 (1996)

Observation of Turbulent Fluctuations in the Interstellar Plasma Density and Magnetic Field on Spatial Scales of 0.01 to 100 Parsecs. *Anthony H. Minter & Steven R. Spangler.* 458, 194, 38-F10 (1996)

The Contribution of Galactic Free-Free Emission to Anistropies in the Cosmic Microwave Background Found by the Saskatoon Experiment. *John H. Simonetti, Brian Dennison, & Gregory A. Topsana.* 458, L1, 42-D1 (1996)

Highly Ionized Interstellar Atoms–Heated, Cooled, or Mixed? *Lyman Spitzer, Jr.* 458, L29, 42-G10 (1996)

ISM: GLOBULES

The Dense Core, Outflow, and "Jet" in L810: High-Resolution Haystack Observations at 3 Millimeters. *Dan P. Clemens, Michael Berkovitch, João Lin Yun, Nimesh Patel, & Taoling Xie.* 457, 743, 31-B10 (1996)

ISM: H II REGIONS

High-Resolution *IRAS* Maps and Infrared Emission of M31. I. Morphology and Sources. *Cong Xu & George Helou.* 456, 152, 3-A13 (1996)

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

Unresolved Wind-driven Shells and the Supersonic Velocity Dispersion in Giant H II Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñón, & Roberto Cid-Fernandes.* 456, 264, 4-E12 (1996)

The H II Region Complex G5.48−0.24: Radio Continuum, H I, and CO Observations. *Bon-Chul Koo, Kee-Tae Kim, Ho-Gyu Lee, Min-Su Yun, & Paul T. P. Ho.* 456, 662, 12-F6 (1996)

High-Velocity Molecular Gas from High-Mass Star Formation Regions. *D. S. Shepherd & E. Churchwell.* 457, 267, 21-E9 (1996)

The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

The Thermal Radio Jet of Cepheus A HW2 and the Water Maser Distribution at 0″Scale (60 AU). *José M. Torrelles, José F. Gómez, Luis F. Rodríguez, Salvador Curiel, Paul T. P. Ho, & Guido Garay.* 457, L107, 35-C5 (1996)

Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)

Detection of Ionized Gas toward an OH/IR Star: A Measure of the UV Radiation Field near the Galactic Center. *Farhad Yusef-Zadeh, Mark Wardle, & Douglas Roberts.* 458, L21, 42-F10 (1996)

Spectroscopy of H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 458, 467, 45-B10 (1996)

Far Outer Galaxy H II Regions. *Alexander L. Rudolph, Jan Brand, Eugène J. de Geus, & Jan G. A. Wouterloot.* 458, 653, 47-G4 (1996)

ISM: INDIVIDUAL

Name: Abell 35

The Abell 35 Nebula Inside Out. *J. M. Hollis, D. Van Buren, S. N. Vogel, W. A. Feibelman, G. H. Jacoby, & J. A. Pedelty.* 456, 644, 12-C11 (1996)

Name: Cassiopeia A

Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

Name: Cepheus A

The Thermal Radio Jet of Cepheus A HW2 and the Water Maser Distribution at 0″Scale (60 AU). *José M. Torrelles, José F. Gómez, Luis F. Rodríguez, Salvador Curiel, Paul T. P. Ho, & Guido Garay.* 457, L107, 35-C5 (1996)

Name: Crab Nebula

WFPC2 Studies of the Crab Nebula. III. Magnetic Rayleigh-Taylor Instabilities and the Origin of the Filaments. *J. Jeff Hester, James M. Stone, Paul A. Scowen, Byung-Il Jun, John S. Gallagher III, Michael L. Norman, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, John Krist, Jeremy R. Mould, Ravi Sankrit, Karl R. Stapelfeldt, John T. Trauger, Alan Watson, & James A. Westphal.* 456, 225, 4-A12 (1996)

Gamma-Ray Observations of the Crab Nebula: A Study of the Synchro-Compton Spectrum. *O. C. de Jager, A. K. Harding, P. F. Michelson, H. I. Nel, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 457, 253, 21-D6 (1996)

Limits on Reported Transient Emission Events near 0.5 MeV from the Crab and 1E 1740.7−2942. *D. M. Smith, M. Leventhal, R. Cavallo, N. Gehrels, J. Tueller, & G. Fishman.* 458, 576, 46-F6 (1996)

Name: Orion Nebula

Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)

Name: Serpens

Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

Name: Serpens FIRS 1

High-Velocity Ammonia Emission Associated with the Young Stellar Object Serpens FIRS 1. *Salvador Curiel, Luis F. Rodríguez, José F. Gómez, José M. Torrelles, Paul T. P. Ho, & Carlos Eiroa.* 456, 677, 13-A2 (1996)

NGC Number: NGC 604

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

Alphanumeric: AFGL 437

The Deeply Embedded Source That Drives the Protostellar Outflow in AFGL 437: Evidence from Near-Infrared Polarimetric Imaging. *David A. Weintraub & Joel H. Kastner.* 458, 670, 48-A10 (1996)

Alphanumeric: DR 21

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

Alphanumeric: G5.48−0.24

The H II Region Complex G5.48−0.24: Radio Continuum, H I, and CO Observations. *Bon-Chul Koo, Kee-Tae Kim, Ho-Gyu Lee, Min-Su Yun, & Paul T. P. Ho.* 456, 662, 12-F6 (1996)

Alphanumeric: G11.2−0.3

Detection of a Hard X-Ray Plerion in the Candidate Historical Remnant G11.2−0.3. *G. Vasisht, T. Aoki, T. Dotani, S. R. Kulkarni, & F. Nagase.* 456, L59, 8-B11 (1996)

Alphanumeric: L810

The Dense Core, Outflow, and "Jet" in L810: High-Resolution Haystack Observations at 3 Millimeters. *Dan P. Clemens, Michael Berkovitch, João Lin Yun, Nimesh Patel, & Taoling Xie.* 457, 743, 31-B10 (1996)

Alphanumeric: S127

Far Outer Galaxy H II Regions. *Alexander L. Rudolph, Jan Brand, Eugène J. de Geus, & Jan G. A. Wouterloot.* 458, 653, 47-G4 (1996)

Alphanumeric: W3

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

Alphanumeric: W4

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

Alphanumeric: W5

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

ISM: JETS AND OUTFLOWS

Infrared Emissivity of HD in Magnetohydrodynamic Shocks. *Ralf Timmermann.* 456, 631, 12-B8 (1996)

High-Velocity Ammonia Emission Associated with the Young Stellar Object Serpens FIRS 1. *Salvador Curiel, Luis F. Rodríguez, José F. Gómez, José M. Torrelles, Paul T. P. Ho, & Carlos Eiroa.* 456, 677, 13-A2 (1996)

High-Velocity Molecular Gas from High-Mass Star Formation Regions. *D. S. Shepherd & E. Churchwell.* 457, 267, 21-E9 (1996)

Aperture Synthesis ^{13}CO (J = 1–0) Observations of the Molecular Gas around DG Tauri: Evidence for a Dispersing Gas Disk. *Yoshimi Kitamura, Ryohei Kawabe, & Masao Saito.* 457, 277, 21-F11 (1996)

The Dease Core, Outflow, and "Jet" in L810: High-Resolution Haystack Observations at 3 Millimeters. *Dan P. Clemens, Michael Berkovitch, João Lin Yun, Nimesh Patel, & Taoling Xie.* 457, 743, 31-B10 (1996)

The Thermal Radio Jet of Cepheus A HW2 and the Water Maser Distribution at 0″Scale (60 AU). *José M. Torrelles, José F. Gómez, Luis F. Rodríguez, Salvador Curiel, Paul T. P. Ho, & Guido Garay.* 457, L107, 35-C5 (1996)

ISM: KINEMATICS AND DYNAMICS

Unresolved Wind-driven Shells and the Supersonic Velocity Dispersion in Giant H II Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñón, & Roberto Cid-Fernandes.* 456, 264, 4-E12 (1996)

K4-55: A Bipolar Planetary Nebula Observed near Pole-on. *M. A. Guerrero, A. Manchado, & M. Serra-Ricart.* 456, 651, 12-E2 (1996)

High-Velocity Molecular Gas from High-Mass Star Formation Regions. *D. S. Shepherd & E. Churchwell.* 457, 267, 21-E9 (1996)

Intermediate-Velocity Gas in the North Galactic Hemisphere: H I Studies. *K. D. Kuntz & L. Danly.* 457, 703, 30-D11 (1996)

Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)

ISM: MAGNETIC FIELDS

CN Zeeman Observations of Molecular Cloud Cores. *Richard M. Crutcher, Thomas H. Troland, Bernard Lazareff, & Ilya Kazès.* 456, 217, 4-A1 (1996)

Gamma-Ray Observations of the Crab Nebula: A Study of the Synchro-Compton Spectrum. *O. C. de Jager, A. K. Harding, P. F. Michelson, H. I. Nel, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 457, 253, 21-D6 (1996)

VLA Polarization Observations of the Extragalactic Source 1741−038 during an Extreme Scattering Event. *Andrew W. Clegg, Alan L. Fey, & Ralph L. Fiedler.* 457, L23, 25-G8 (1996)

Observation of Turbulent Fluctuations in the Interstellar Plasma Density and Magnetic Field on Spatial Scales of 0.01 to 100 Parsecs. *Anthony H. Minter & Steven R. Spangler.* 458, 194, 38-F10 (1996)

Interstellar Mass Outflow to Galactic Halos by the Supernova-driven Parker Instability. *Hideyuki Kamaya, Shin Mineshige, Kazunari Shibata, & Ryoji Matsumoto.* 458, L25, 42-G3 (1996)

ISM: MOLECULES

CN Zeeman Observations of Molecular Cloud Cores. *Richard M. Crutcher, Thomas H. Troland, Bernard Lazareff, & Ilya Kazès.* 456, 217, 4-A1 (1996)

Water Maser Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 250, 4-D9 (1996)

Ab Initio Characterization of MgCCH, $MgCCH^+$, and MgC_2 and Pathways to Their Formation in the Interstellar Medium. *David E. Woon.* 456, 602, 11-F8 (1996)

Far-Infrared Water Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 611, 11-G6 (1996)

Infrared Emissivity of HD in Magnetohydrodynamic Shocks. *Ralf Timmermann.* 456, 631, 12-B8 (1996)

High-Velocity Ammonia Emission Associated with the Young Stellar Object Serpens FIRS 1. *Salvador Curiel, Luis F. Rodríguez, José F. Gómez, José M. Torrelles, Paul T. P. Ho, & Carlos Eiroa.* 456, 677, 13-A2 (1996)

High-Velocity Molecular Gas from High-Mass Star Formation Regions. *D. S. Shepherd & E. Churchwell.* 457, 267, 21-E9 (1996)

Aperture Synthesis ^{13}CO (J = 1–0) Observations of the Molecular Gas around DG Tauri: Evidence for a Dispersing Gas Disk. *Yoshimi Kitamura, Ryohei Kawabe, & Masao Saito.* 457, 277, 21-F11 (1996)

H_2 Emission from the Inner 400 Parsecs of the Galaxy. *Soojong Pak, D. T. Jaffe, & L. D. Keller.* 457, L43, 26-C3 (1996)

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

High-Resolution CO Observations of the Ultraluminous Infrared Galaxy Markarian 231. *P. M. Bryant & N. Z. Scoville.* 457, 678, 30-B8 (1996)

Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

Molecular Cloudlets Embedded in a Diffuse H I Cloud within 120 Parsecs of the Sun. *Joaquín Trapero, María J. Sempere, John E. Beckman, & L. M. Hobbs.* 457, 731, 31-A5 (1996)

Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices. *D. C. B. Whittet, R. G. Smith, A. J. Adamson, D. K. Aitken, J. E. Chiar, T. H. Kerr, P. F. Roche, C. H. Smith, & C. M. Wright.* 458, 363, 41-A6 (1996)

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

Assessment of the Polycyclic Aromatic Hydrocarbon–Diffuse Interstellar Band Proposal. *F. Salama, E. L. O. Bakes, L. J. Allamandola, & A. G. G. M. Tielens.* 458, 621, 47-D3 (1996)

ISM: PLANETARY NEBULAE: GENERAL

The Shaping of Planetary Nebulae: Asymmetry in the External Wind. *Vikram V. Dwarkadas, Roger A. Chevalier, & John M. Blondin.* 457, 773, 31-E7 (1996)

A New Look at Carbon Abundances in Planetary Nebulae. I. PB 6, Hu 2–1, K648, and H4–1. *R. B. C. Henry, K. B. Kwitter, & J. W. Howard.* 458, 215, 39-A7 (1996)

The Stellar Halo of M104. I. A Survey for Planetary Nebulae and the Planetary Nebula Luminosity Function Distance. *H. C. Ford, X. Hui, R. Ciardullo, G. H. Jacoby, & K. C. Freeman.* 458, 455, 45-A8 (1996)

ISM: PLANETARY NEBULAE: INDIVIDUAL

Alphanumeric: K4-55

K4-55: A Bipolar Planetary Nebula Observed near Pole-on. *M. A. Guerrero, A. Manchado, & M. Serra-Ricart.* 456, 651, 12-E2 (1996)

ISM: REFLECTION NEBULAE

The Distribution of Dust Clouds in the Interstellar Medium. *Andrew R. Dring, Jayant Murthy, R. C. Henry, & H. J. Walker.* 457, 764, 31-D9 (1996)

Spatial Variation of the 3.29 and 3.40 Micron Emission Bands within Reflection Nebulae and the Photochemical Evolution of Methylated Polycyclic Aromatic Hydrocarbons. *C. Joblin, A. G. G. M. Tielens, L. J. Allamandola, & T. R. Geballe.* 458, 610, 47-C2 (1996)

The Deeply Embedded Source That Drives the Protostellar Outflow in AFGL 437: Evidence from Near-Infrared Polarimetric Imaging. *David A. Weintraub & Joel H. Kastner.* 458, 670, 48-A10 (1996)

ISM: STRUCTURE

WFPC2 Studies of the Crab Nebula. III. Magnetic Rayleigh-Taylor Instabilities and the Origin of the Filaments. *J. Jeff Hester, James M. Stone, Paul A. Scowen, Byung-Il Jun, John S. Gallagher III, Michael L. Norman, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, John Krist, Jeremy R. Mould, Ravi Sankrit, Karl R. Stapelfeldt, John T. Trauger, Alan Watson, & James A. Westphal.* 456, 225, 4-A12 (1996)

The Abell 35 Nebula Inside Out. *J. M. Hollis, D. Van Buren, S. N. Vogel, W. A. Feibelman, G. H. Jacoby, & J. A. Pedelty.* 456, 644, 12-C11 (1996)

K4-55: A Bipolar Planetary Nebula Observed near Pole-on. *M. A. Guerrero, A. Manchado, & M. Serra-Ricart.* 456, 651, 12-E2 (1996)

The H II Region Complex G5.48−0.24: Radio Continuum, H I, and CO Observations. *Bon-Chul Koo, Kee-Tae Kim, Ho-Gyu Lee, Min-Su Yun, & Paul T. P. Ho.* 456, 662, 12-F6 (1996)

VLA Polarization Observations of the Extragalactic Source 1741−038 during an Extreme Scattering Event. *Andrew W. Clegg, Alan L. Fey, & Ralph L. Fiedler.* 457, L23, 25-G8 (1996)

Intermediate-Velocity Gas in the North Galactic Hemisphere: H I Studies. *K. D. Kuntz & L. Danly.* 457, 703, 30-D11 (1996)

The Dense Core, Outflow, and "Jet" in L810: High-Resolution Haystack Observations at 3 Millimeters. *Dan P. Clemens, Michael Berkovitch, João Lin Yun, Nimesh Patel, & Taoling Xie.* 457, 743, 31-B10 (1996)

The Shaping of Planetary Nebulae: Asymmetry in the External Wind. *Vikram V. Dwarkadas, Roger A. Chevalier, & John M. Blondin.* 457, 773, 31-E7 (1996)

ISM: SUPERNOVA REMNANTS

The X-Ray Light Curve of the Very Luminous Supernova SN 1978K in NGC 1313. *Eric M. Schlegel, R. Petre, & E. J. M. Colbert.* 456, 187, 3-E6 (1996)

Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

A Pulsar Survey of 18 Supernova Remnants. *Peter W. Gorham, Paul S. Ray, Stuart B. Anderson, Shrinivas R. Kulkarni, & Thomas A. Prince.* 458, 257, 39-E6 (1996)

Interstellar Mass Outflow to Galactic Halos by the Supernova-driven Parker Instability. *Hideyuki Kamaya, Shin Mineshige, Kazunari Shibata, & Ryoji Matsumoto.* 458, L25, 42-G3 (1996)

LINE: FORMATION

Ultraviolet Opacity and Fluorescence in Supernova Envelopes. *Hongwei Li & Richard McCray.* 456, 370, 6-B2 (1996)

Modeling Emission Lines from Dwarf Novae in Quiescence. *Yuan-Kuen Ko, Y. Paul Lee, Eric M. Schlegel, & Timothy R. Kallman.* 457, 363, 23-A3 (1996)

On the Balmer Line Problem. *K. Werner.* 457, L39, 26-B10 (1996)

A New Scheme for Multidimensional Line Transfer. III. A Two-dimensional Lagrangian Variable Tensor Method with Discontinuous Finite-Element Sn Transport. *Pieter G. Dykema, Richard I. Klein, & John I. Castor.* 457, 892, 33-B10 (1996)

Goddard High-Resolution Spectrograph Observations of Procyon and HR 1099. *Brian E. Wood, Graham M. Harper, Jeffrey L. Linsky, & Robert C. Dempsey.* 458, 761, 49-C10 (1996)

LINE: IDENTIFICATION

The Near-Infrared Coronal Spectrum. *J. R. Kuhn, M. J. Penn, & I. Mann.* 456, L67, 8-D4 (1996)

A High-Resolution X-Ray Spectrum of Centaurus X-3. *M. D. Audley, R. L. Kelley, E. A. Boldt, K. M. Jahoda, F. E. Marshall, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, & K. A. Weaver.* 457, 397, 23-D4 (1996)

Assessment of the Polycyclic Aromatic Hydrocarbon–Diffuse Interstellar Band Proposal. *F. Salama, E. L. O. Bakes, L. J. Allamandola, & A. G. G. M. Tielens.* 458, 621, 47-D3 (1996)

BATSE Gamma-Ray Burst Line Search. IV. Line Candidates from the Visual Search. *D. L. Band, S. Ryder, L. A. Ford, J. L. Matteson, D. M. Palmer, B. J. Teegarden, M. S. Briggs, W. S. Paciesas, G. N. Pendleton, & R. D. Preece.* 458, 746, 49-B3 (1996)

LINE IDENTIFICATIONS

Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices. *D. C. B. Whittet, R. G. Smith, A. J. Adamson, D. K. Aitken, J. E. Chiar, T. H. Kerr, P. F. Roche, C. H. Smith, & C. M. Wright.* 458, 363, 41-A6 (1996)

MAGNETIC FIELDS

Millimeter Interferometric Polarization Imaging of the Young Stellar Object NGC 1333/IRAS 4A. *R. L. Akeson, J. E. Carlstrom, J. A. Phillips, & D. P. Woody.* 456, L45, 8-A1 (1996)

Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

Polarization of Astronomical Maser Radiation. III. Arbitrary Zeeman Splitting and Anisotropic Pumping. *Moshe Elitzur.* 457, 415, 23-F1 (1996)

MAGNETOHYDRODYNAMICS: MHD

Water Maser Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 250, 4-D9 (1996)

The Influence of the Temperature Profile on the Magnetohydrodynamic Modes of a Prominence-Corona System. *R. Oliver & J. L. Ballester.* 456, 393, 6-D3 (1996)

Interacting Active Regions in the Solar Corona. *Saku Tsuneta.* 456, L63, 8-C5 (1996)

Magnetic Interaction between Classic T Tauri Stars and Their Associated Disks. *Jianke Li.* 456, 696, 13-C1 (1996)

On the Nonlinear Evolution of Magnetohydrodynamic Kelvin-Helmholtz Instabilities. *Andrea Malagoli, Gianluigi Bodo, & Robert Rosner.* 456, 708, 13-D2 (1996)

Interpretation of the Observed Plasma "Turbulent" Velocities as a Result of Magnetic Reconnection in Solar Flares. *Ester Antonucci, Carlo Benna, & Boris V. Somov.* 456, 833, 15-A12 (1996)

Structure and Dynamics of Magnetic Reconnection in a Solar Flare. *Saku Tsuneta.* 456, 840, 15-B8 (1996)

Reconnecting Magnetic Flux Tubes as a Source of In Situ Acceleration in Extragalactic Radio Sources. *Eric G. Blackman.* 456, L87, 16-G6 (1996)

Nonlinear Excitation of Global Modes and Heating in Randomly Driven Coronal Loops. *L. Ofman & J. M. Davila.* 456, L123, 17-D13 (1996)

Gamma-Ray Observations of the Crab Nebula: A Study of the Synchro-Compton Spectrum. *O. C. de Jager, A. K. Harding, P. F. Michelson, H. I. Nel, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 457, 253, 21-D6 (1996)

A Consistent Method of Characteristics for Multidimensional Magnetohydrodynamics. *David A. Clarke.* 457, 291, 22-A7 (1996)

On the Quasi-hydrostatic Flows of Radiatively Cooling Self-gravitating Gas Clouds. *Baruch Meerson, Ephraim Megged, & Toshiki Tajima.* 457, 321, 22-D1 (1996)

Dynamo-driven Accretion Disks and Dwarf Nova Eruptions. *P. J. Armitage, M. Livio, & J. E. Pringle.* 457, 332, 22-E1 (1996)

Damping of the Shear Instability in Magnetized Disks by Ohmic Diffusion. *Liping Jin.* 457, 798, 31-G10 (1996)

Nonlinear Compressible Convection in Oblique Magnetic Fields. *Neal E. Hurlburt, Paul C. Matthews, & Michael R. E. Proctor.* 457, 933, 33-F2 (1996)

Energy Release in a Turbulent Corona. *G. Einaudi, M. Velli, H. Politano, & A. Pouquet.* 457, L113, 35-C13 (1996)

The Effects of Convection Zone Turbulence on the Tilt Angles of Magnetic Bipoles. *D. W. Longcope & G. H. Fisher.* 458, 380, 41-C1 (1996)

Interstellar Mass Outflow to Galactic Halos by the Supernova-driven Parker Instability. *Hideyuki Kamaya, Shin Mineshige, Kazunari Shibata, & Ryoji Matsumoto.* 458, L25, 42-G3 (1996)

The Disk Accretion Rate for Dynamo-generated Turbulence. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 458, L45, 43-B10 (1996)

Scaling Relations for the Turbulent, Non–Self-gravitating, Neutral Component of the Interstellar Medium. *Robert C. Fleck, Jr.* 458, 739, 49-A1 (1996)

Equilibrium of Twisted Horizontal Magnetic Flux Tubes. *T. Emonet & F. Moreno-Insertis.* 458, 783, 49-E7 (1996)

On the Storage of Magnetic Flux Tubes at the Base of the Solar Convection Zone. *Antonio Ferriz-Mas.* 458, 802, 49-G3 (1996)

Solar Dynamo Surface Waves in the Presence of a Primordial Magnetic Field: A 30 Gauss Upper Limit in the Solar Core. *Nicholas Boruta.* 458, 832, 50-B13 (1996)

MASERS

Water Maser Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 250, 4-D9 (1996)

Polarization of Astronomical Maser Radiation. III. Arbitrary Zeeman Splitting and Anisotropic Pumping. *Moshe Elitzur.* 457, 415, 23-F1 (1996)

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

The Thermal Radio Jet of Cepheus A HW2 and the Water Maser Distribution at 0″Scale (60 AU). *José M. Torrelles, José F. Gómez, Luis F. Rodríguez, Salvador Curiel, Paul T. P. Ho, & Guido Garay.* 457, L107, 35-C5 (1996)

METHODS: ANALYTICAL

Analysis of Galaxy Morphology and Evolution Using the Pointwise Dimension. *Jason S. Best, Jane C. Charlton, & Gottfried Mayer-Kress.* 456, 55, 1-F8 (1996)

H-Function Evolution during Violent Relaxation. *Noam Soker.* 457, 287, 21-G13 (1996)

Constrained Linear Algebraic Deconvolution of Poisson Data. *D. D. Dixon, D. Bhattacharya, T. J. O'Neill, O. T. Tümer, R. S. White, A. D. Zych, & Wm. A. Wheaton.* 457, 789, 31-F12 (1996)

New Global Instabilities of the Riemann Ellipsoids. *Norman R. Lebovitz & Alexander Lifschitz.* 458, 699, 48-D7 (1996)

Estimating the Cramér-Rao Bound for Astronomical Observations: Application to the Richardson-Lucy Algorithm. *T. S. Zaccheo, R. A. Gonsalves, P. Nisenson, & S. M. Ebstein.* 458, 742, 49-A8 (1996)

METHODS: DATA ANALYSIS

Constrained Linear Algebraic Deconvolution of Poisson Data. *D. D. Dixon, D. Bhattacharya, T. J. O'Neill, O. T. Tümer, R. S. White, A. D. Zych, & Wm. A. Wheaton.* 457, 789, 31-F12 (1996)

Estimating the Cramér-Rao Bound for Astronomical Observations: Application to the Richardson-Lucy Algorithm. *T. S. Zaccheo, R. A. Gonsalves, P. Nisenson, & S. M. Ebstein.* 458, 742, 49-A8 (1996)

Producing Megapixel Cosmic Microwave Background from Differential Radiometer Data. *E. L. Wright, G. Hinshaw, & C. L. Bennett.* 458, L53, 51-G2 (1996)

METHODS: NUMERICAL

Galaxy Formation in a CDM + Λ Universe. I. Properties of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 1, 1-B1 (1996)

Galaxy Formation in a CDM + Λ Universe. II. Spatial Distribution of Gas and Galaxies. *Nickolay Y. Gnedin.* 456, 34, 1-D9 (1996)

Evolution of the Potential in Cosmological Gravitational Clustering. *Adrian L. Melott, B. S. Sathyaprakash, & Varun Sahni.* 456, 65, 1-G7 (1996)

Cluster Accretion Shocks as Possible Acceleration Sites for Ultra–High-Energy Protons below the Greisen Cutoff. *Hyesung Kang, Dongsu Ryu, & T. W. Jones.* 456, 422, 9-C13 (1996)

On the Nonlinear Evolution of Magnetohydrodynamic Kelvin-Helmholtz Instabilities. *Andrea Malagoli, Gianluigi Bodo, & Robert Rosner.* 456, 708, 13-D2 (1996)

H-Function Evolution during Violent Relaxation. *Noam Soker.* 457, 287, 21-G13 (1996)

A Consistent Method of Characteristics for Multidimensional Magnetohydrodynamics. *David A. Clarke.* 457, 291, 22-A7 (1996)

On the Balmer Line Problem. *K. Werner.* 457, L39, 26-B10 (1996)

On the Destruction and Overmerging of Dark Halos in Dissipationless *N*-Body Simulations. *Ben Moore, Neal Katz, & George Lake.* 457, 455, 27-C1 (1996)

Resonance Oscillation of Radiative Shock Waves in Accretion Disks around Compact Objects. *Diego Molteni, Hanno Sponholz, & Sandip K. Chakrabarti.* 457, 805, 32-A6 (1996)

A New Scheme for Multidimensional Line Transfer. III. A Two-dimensional Lagrangian Variable Tensor Method with Discontinuous Finite-Element Sn Transport. *Pieter G. Dykema, Richard I. Klein, & John I. Castor.* 457, 892, 33-B10 (1996)

Damped Lyman-Alpha and Lyman Limit Absorbers in the Cold Dark Matter Model. *Neal Katz, David H. Weinberg, Lars Hernquist, & Jordi Miralda-Escudé.* 457, L57, 34-C10 (1996)

Large-Scale Structure Tests of Warm Dark Matter. *Stéphane Colombi, Scott Dodelson, & Lawrence M. Widrow.* 458, 1, 36-C1 (1996)

A Note on the Evaluation of the Generalized Fermi-Dirac Integral. *N. Mohankumar & A. Natarajan.* 458, 233, 39-C3 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

Simulating Our Cosmological Neighborhood: Mock Catalogs for Velocity Analysis. *Tsafrir Kolatt, Avishai Dekel, Galit Ganon, & Jeffrey A. Willick.* 458, 419, 44-E7 (1996)

METHODS: STATISTICAL

An Estimate of the Motion-induced Dipole Moment in the Spatial Distribution of Cosmological Gamma-Ray Bursts. *J. J. Brainerd.* 456, 449, 9-F10 (1996)

Statistics of Isodensity Contours in Redshift Space. *Takahiko Matsubara.* 457, 13, 18-D2 (1996)

Requirements for Investigating the Connection between Lyman-α Absorption Clouds and the Large-Scale Distribution of Galaxies. *Vicki L. Sarajedini, Richard F. Green, & Buell T. Jannuzi.* 457, 542, 28-C7 (1996)

Constrained Linear Algebraic Deconvolution of Poisson Data. *D. D. Dixon, D. Bhattacharya, T. J. O'Neill, O. T. Tümer, R. S. White, A. D. Zych, & Wm. A. Wheaton.* 457, 789, 31-F12 (1996)

Is There Evidence for Repeating Gamma-Ray Bursters in the BATSE Data? *David P. Bennett & Sun Hong Rhie.* 458, 293, 40-A12 (1996)

BATSE Gamma-Ray Burst Line Search. IV. Line Candidates from the Visual Search. *D. L. Band, S. Ryder, L. A. Ford, J. L. Matteson, D. M. Palmer, B. J. Teegarden, M. S. Briggs, W. S. Paciesas, G. N. Pendleton, & R. D. Preece.* 458, 746, 49-B3 (1996)

MOLECULAR DATA

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

MOLECULAR PROCESSES

The Gaseous Sulfur Dioxide Abundance over Io's Leading and Trailing Hemispheres: *HST* Spectra of Io's $C\ ^1B_2$–$X\ ^1A_1$ Band of SO_2 near 2100 Å. *L. M. Trafton, J. J. Caldwell, C. Barnet, & C. C. Cunningham.* 456, 384, 6-C5 (1996)

Ab Initio Characterization of MgCCH, $MgCCH^+$, and MgC_2 and Pathways to Their Formation in the Interstellar Medium. *David E. Woon.* 456, 602, 11-F8 (1996)

Molecular Signals from Primordial Clouds at High Redshift. *Roberto Maoli, Valerio Ferrucci, Francesco Melchiorri, Monique Signore, & Danilo Tosti.* 457, 1, 18-C1 (1996)

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)

The Radiative Association of Li^+ and H, Li and H^+, and Li and H. *A. Dalgarno, K. Kirby, & P. C. Stancil.* 458, 397, 44-C1 (1996)

Spatial Variation of the 3.29 and 3.40 Micron Emission Bands within Reflection Nebulae and the Photochemical Evolution of Methylated Polycyclic Aromatic Hydrocarbons. *C. Joblin, A. G. G. M. Tielens, L. J. Allamandola, & T. R. Geballe.* 458, 610, 47-C2 (1996)

Assessment of the Polycyclic Aromatic Hydrocarbon–Diffuse Interstellar Band Proposal. *F. Salama, E. L. O. Bakes, L. J. Allamandola, & A. G. G. M. Tielens.* 458, 621, 47-D3 (1996)

NEBULAE: SUPERNOVA REMNANTS

Powerful Ejection of Matter from Tidally Disrupted Stars near Massive Black Holes and a Possible Application to Sagittarius A East. *Alexei Khokhlov & Fulvio Melia.* 457, L61, 34-D4 (1996)

NUCLEAR REACTIONS, NUCLEOSYNTHESIS, ABUNDANCES

Effects of Dark Matter on the Stability of Supermassive Stars. *Gail C. McLaughlin & George M. Fuller.* 456, 71, 2-A2 (1996)

Inhomogeneous Primordial Nucleosynthesis and New Abundance Constraints on $\Omega_b h^2$. *G. J. Mathews, T. Kajino, & M. Orito.* 456, 98, 2-C8 (1996)

On the Evolution of the Light Elements. I. D, ^{3}He, and ^{4}He. *Brian D. Fields.* 456, 478, 10-B7 (1996)

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

Explosion Models for Type Ia Supernovae: A Comparison with Observed Light Curves, Distances, H_0, and q_0. *P. Höflich & A. Khokhlov.* 457, 500, 27-G1 (1996)

Indirect Investigation of the d + ^{6}Li Reaction at Low Energies Relevant for Nuclear Astrophysics. *S. Cherubini, V. N. Kondratyev, M. Lattuada, C. Spitaleri, D. Miljanić, M. Zadro, & G. Baur.* 457, 855, 32-F3 (1996)

Radiation Dosimetry of Binary Pulsars. *David Eichler & Biman B. Nath.* 458, 275, 39-G2 (1996)

The Lithium Chemistry of the Early Universe. *P. C. Stancil, S. Lepp, & A. Dalgarno.* 458, 401, 44-C9 (1996)

Predicting Big Bang Deuterium. *N. Hata, R. J. Scherrer, G. Steigman, D. Thomas, & T. P. Walker.* 458, 637, 47-E9 (1996)

PLANETS AND SATELLITES: INDIVIDUAL

Io

The Gaseous Sulfur Dioxide Abundance over Io's Leading and Trailing Hemispheres: *HST* Spectra of Io's $C\ ^1B_2$–$X\ ^1A_1$ Band of SO_2 near 2100 Å. *L. M. Trafton, J. J. Caldwell, C. Barnet, & C. C. Cunningham.* 456, 384, 6-C5 (1996)

Titan

The Asymmetric Distribution of Titan's Atomic Hydrogen Cloud as a Function of Local Time. *W.-H. Ip.* 457, 922, 33-E2 (1996)

PLASMAS

On the Nonlinear Evolution of Magnetohydrodynamic Kelvin-Helmholtz Instabilities. *Andrea Malagoli, Gianluigi Bodo, & Robert Rosner.* 456, 708, 13-D2 (1996)

VLA Polarization Observations of the Extragalactic Source 1741−038 during an Extreme Scattering Event. *Andrew W. Clegg, Alan L. Fey, & Ralph L. Fiedler.* 457, L23, 25-G8 (1996)

POLARIZATION

CN Zeeman Observations of Molecular Cloud Cores. *Richard M. Crutcher, Thomas H. Troland, Bernard Lazareff, & Ilya Kazès.* 456, 217, 4-A1 (1996)

Millimeter Interferometric Polarization Imaging of the Young Stellar Object NGC 1333/IRAS 4A. *R. L. Akeson, J. E. Carlstrom, J. A. Phillips, & D. P. Woody.* 456, L45, 8-A1 (1996)

Large-Angle Polarization and Anisotropy of the Cosmic Microwave Background Radiation and Reionization. *Ka Lok Ng & Kin-Wang Ng.* 456, 413, 9-C1 (1996)

Extinction and Polarization by Ellipsoidal Particles in the Infrared. *Masafumi Matsumura & Munezo Seki.* 456, 557, 11-B8 (1996)

Polarization of Astronomical Maser Radiation. III. Arbitrary Zeeman Splitting and Anisotropic Pumping. *Moshe Elitzur.* 457, 415, 23-F1 (1996)

The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

The Deeply Embedded Source That Drives the Protostellar Outflow in AFGL 437: Evidence from Near-Infrared Polarimetric Imaging. *David A. Weintraub & Joel H. Kastner.* 458, 670, 48-A10 (1996)

Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

PULSARS

Giant Radio Pulses from a Millisecond Pulsar. *I. Cognard, J. A. Shrauner, J. H. Taylor, & S. E. Thorsett.* 457, L81, 34-F13 (1996)

RADIATION MECHANISMS: NONTHERMAL

Stochastic Particle Acceleration near Accreting Black Holes. *Charles D. Dermer, James A. Miller, & Hui Li.* 456, 106, 2-D5 (1996)

WFPC2 Studies of the Crab Nebula. III. Magnetic Rayleigh-Taylor Instabilities and the Origin of the Filaments. *J. Jeff Hester, James M. Stone, Paul A. Scowen, Byung-Il Jun, John S. Gallagher III, Michael L. Norman, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, John Krist, Jeremy R. Mould, Ravi Sankrit, Karl R. Stapelfeldt, John T. Trauger, Alan Watson, & James A. Westphal.* 456, 225, 4-A12 (1996)

Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

The Synchrotron Spectrum of Diffuse Radio Sources: Effects of Particle and Field Distributions. *Jean A. Eilek & Paul N. Arendt.* 457, 150, 20-B7 (1996)

The Steep Soft X-Ray Spectrum of the Highly Variable Active Nucleus in Markarian 478. *H. L. Marshall, T. E. Carone, J. Michael Shull, M. A. Malkan, & M. Elvis.* 457, 169, 20-D1 (1996)

Gamma-Ray Observations of the Crab Nebula: A Study of the Synchro-Compton Spectrum. *O. C. de Jager, A. K. Harding, P. F. Michelson, H. I. Nel, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 457, 253, 21-D6 (1996)

Hot Accretion Disks with Nonthermal Pairs: Injection of Low-Energy Nonthermal Electrons. *Masaaki Kusunose, Shin Mineshige, & Tetsuya T. Yamada.* 457, 813, 32-B3 (1996)

Spectral Relation between X-Rays and Gamma Rays for Blazar High-Energy Emission. *Jiancheng Wang, Qinghuan Luo, & Guangzhong Xie.* 457, L65, 34-D12 (1996)

Gamma-Ray Pulsars: Emission from Extended Polar Cap Cascades. *Joseph K. Daugherty & Alice K. Harding.* 458, 278, 39-G8 (1996)

RADIATION MECHANISMS: THERMAL

Structure of Accretion Disks with Optically Thick–Optically Thin Transitions. *I. V. Artemova, G. S. Bisnovatyi-Kogan, G. Björnsson, & I. D. Novikov.* 456, 119, 2-E7 (1996)

ROSAT X-Ray Observations of Nova V1974 Cygni: The Rise and Fall of the Brightest Supersoft X-Ray Source. *J. Krautter, H. Ögelman, S. Starrfield, R. Wichmann, & E. Pfeffermann.* 456, 788, 14-D13 (1996)

Cooling, Sputtering, and Infrared Emission from Dust Grains in Fast Nonradiative Shocks. *Eli Dwek, Scott M. Foster, & Olaf Vancura.* 457, 244, 21-C8 (1996)

Hot Accretion Disks with Nonthermal Pairs: Injection of Low-Energy Nonthermal Electrons. *Masaaki Kusunose, Shin Mineshige, & Tetsuya T. Yamada.* 457, 813, 32-B3 (1996)

RADIATIVE TRANSFER

Ultraviolet Opacity and Fluorescence in Supernova Envelopes. *Hongwei Li & Richard McCray.* 456, 370, 6-B2 (1996)

COBE/DIRBE Observations of the Orion Constellation from the Near- to Far-Infrared. *W. F. Wall, W. T. Reach, M. G. Hauser, R. G. Arendt, J. L. Weiland, G. B. Berriman, C. L. Bennett, Eli Dwek, D. Leisawitz, P. M. Mitra, Sten F. Odenwald, T. J. Sodroski, & G. N. Toller.* 456, 566, 11-C6 (1996)

Waves in Radiating Fluids. *T. J. Bogdan, M. Knölker, K. B. MacGregor, & E.-J. Kim.* 456, 879, 15-F6 (1996)

Polarization of Astronomical Maser Radiation. III. Arbitrary Zeeman Splitting and Anisotropic Pumping. *Moshe Elitzur.* 457, 415, 23-F1 (1996)

Interpreting Central Surface Brightness and Color Profiles in Elliptical Galaxies. *David R. Silva & Michael W. Wise.* 457, L15, 25-F1 (1996)

On the Balmer Line Problem. *K. Werner.* 457, L39, 26-B10 (1996)

Explosion Models for Type Ia Supernovae: A Comparison with Observed Light Curves, Distances, H_0, and q_0. *P. Höflich & A. Khokhlov.* 457, 500, 27-G1 (1996)

A New Scheme for Multidimensional Line Transfer. III. A Two-dimensional Lagrangian Variable Tensor Method with Discontinuous Finite-Element Sn Transport. *Pieter G. Dykema, Richard I. Klein, & John I. Castor.* 457, 892, 33-B10 (1996)

Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

RADIO CONTINUUM: GALAXIES

The Synchrotron Spectrum of Diffuse Radio Sources: Effects of Particle and Field Distributions. *Jean A. Eilek & Paul N. Arendt.* 457, 150, 20-B7 (1996)

A Dust Lane in the Radio Galaxy 3C 270. *Ashish Mahabal, Ajit Kembhavi, K. P. Singh, P. N. Bhat, & T. P. Prabhu.* 457, 598, 29-A12 (1996)

VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81. *M. F. Bietenholz, N. Bartel, M. P. Rupen, J. E. Conway, A. J. Beasley, R. A. Sramek, J. D. Romney, M. A. Titus, D. A. Graham, V. I. Altunin, D. L. Jones, A. Rius, T. Venturi, G. Umana, K. W. Weiler, S. D. Van Dyk, N. Panagia, W. H. Cannon, J. Popelar, & R. J. Davis.* 457, 604, 28-B9 (1996)

The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

The Parsec-Scale Structure of NGC 1275 at 1.3 GHz. *G. B. Taylor & R. C. Vermeulen.* 457, L69, 34-E6 (1996)

The Subarcsecond Radio Structure in NGC 1068. I. Observations and Results. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, & A. Pedlar.* 458, 136, 38-A4 (1996)

RADIO CONTINUUM: ISM

Sites of Relativistic Particle Acceleration in Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 456, 234, 4-C2 (1996)

The H II Region Complex G5.48−0.24: Radio Continuum, H I, and CO Observations. *Bon-Chul Koo, Kee-Tae Kim, Ho-Gyu Lee, Min-Su Yun, & Paul T. P. Ho.* 456, 662, 12-F6 (1996)

Far Outer Galaxy H II Regions. *Alexander L. Rudolph, Jan Brand, Eugène J. de Geus, & Jan G. A. Wouterloot.* 458, 653, 47-G4 (1996)

RADIO CONTINUUM: STARS

Discovery of Three Radio Pulsars from an X-Ray–selected Sample. *Alex Zepka, James M. Cordes, Ira Wasserman, & Scott C. Lundgren.* 456, 305, 5-B12 (1996)

On the Jets Associated with Galactic Superluminal Sources. *Amir Levinson & Roger Blandford.* 456, L29, 7-E13 (1996)

Interferometric Observations at 2.7 Millimeters of the Nearest T Tauri Stars. *Marc W. Pound.* 457, L35, 26-B3 (1996)

RADIO LINES: GALAXIES

A 21 Centimeter Absorber Identified with a Spiral Galaxy: *Hubble Space Telescope* Faint Object Spectrograph and Wide-Field Camera Observations of 3CR 196. *Ross D. Cohen, E. A. Beaver, Athanassios Diplas, Vesa T. Junkkarinen, Thomas A. Barlow, & Ronald W. Lyons.* 456, 132, 2-F12 (1996)

A Search for CO Emission in High-Redshift Powerful Radio Galaxies. *A. S. Evans, D. B. Sanders, J. M. Mazzarella, P. M. Solomon, D. Downes, C. Kramer, & S. J. E. Radford.* 457, 658, 29-G9 (1996)

RADIO LINES: ISM

The H II Region Complex G5.48−0.24: Radio Continuum, H I, and CO Observations. *Bon-Chul Koo, Kee-Tae Kim, Ho-Gyu Lee, Min-Su Yun, & Paul T. P. Ho.* 456, 662, 12-F6 (1996)

Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

Non-LTE Effects in Ammonia. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 457, L47, 26-C10 (1996)

Intermediate-Velocity Gas in the North Galactic Hemisphere: H I Studies. *K. D. Kuntz & L. Danly.* 457, 703, 30-D11 (1996)

Molecular Cloudlets Embedded in a Diffuse H I Cloud within 120 Parsecs of the Sun. *Joaquín Trapero, María J. Sempere, John E. Beckman, & L. M. Hobbs.* 457, 731, 31-A5 (1996)

The Dense Core, Outflow, and "Jet" in L810: High-Resolution Haystack Observations at 3 Millimeters. *Dan P. Clemens, Michael Berkovitch, João Lin Yun, Nimesh Patel, & Taoling Xie.* 457, 743, 31-B10 (1996)

A Large-Scale CO Survey toward W3, W4, and W5. *Seth W. Digel, David A. Lyder, Amy J. Philbrick, Daniel Puche, & Patrick Thaddeus.* 458, 561, 46-E2 (1996)

RELATIVITY

Effects of Dark Matter on the Stability of Supermassive Stars. *Gail C. McLaughlin & George M. Fuller.* 456, 71, 2-A2 (1996)

A New Method for Obtaining Binary Pulsar Distances and Its Implications for Tests of General Relativity. *J. F. Bell & M. Bailes.* 456, L33, 7-F7 (1996)

Main-Sequence Masses and Radii from Gravitational Redshifts. *Ted von Hippel.* 458, L37, 43-A11 (1996)

Relativistic Accretion Disks: Low-Frequency Modes and Frame Dragging. *James R. Ipser.* 458, 508, 45-F5 (1996)

Computing the Delayed Collapse of Hot Neutron Stars to Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 458, 680, 48-B9 (1996)

SHOCK WAVES

Water Maser Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 250, 4-D9 (1996)

Unresolved Wind-driven Shells and the Supersonic Velocity Dispersion in Giant H II Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñón, & Roberto Cid-Fernandes.* 456, 264, 4-E12 (1996)
Far-Infrared Water Emission from Magnetohydrodynamic Shock Waves. *Michael J. Kaufman & David A. Neufeld.* 456, 611, 11-G6 (1996)
Infrared Emissivity of HD in Magnetohydrodynamic Shocks. *Ralf Timmermann.* 456, 631, 12-B8 (1996)
The Abell 35 Nebula Inside Out. *J. M. Hollis, D. Van Buren, S. N. Vogel, W. A. Feibelman, G. H. Jacoby, & J. A. Pedelty.* 456, 644, 12-C11 (1996)
Cooling, Sputtering, and Infrared Emission from Dust Grains in Fast Nonradiative Shocks. *Eli Dwek, Scott M. Foster, & Olaf Vancura.* 457, 244, 21-C8 (1996)
Resonance Oscillation of Radiative Shock Waves in Accretion Disks around Compact Objects. *Diego Molteni, Hanno Sponholz, & Sandip K. Chakrabarti.* 457, 805, 32-A6 (1996)
Nonequilibrium Photodissociation Regions: Ionization-Dissociation Fronts. *Frank Bertoldi & B. T. Draine.* 458, 222, 39-B3 (1996)
The Stability Properties of Two-Temperature White Dwarf Radiative Shock Waves. *James N. Imamura, Abdossalam Aboasha, Michael T. Wolff, & Kent S. Wood.* 458, 327, 40-D13 (1996)
A Dynamical Monte Carlo Simulation of a Collisionless Shock. *Jeffrey M. Knerr, J. R. Jokipii, & Donald C. Ellison.* 458, 641, 47-F3 (1996)

SOLAR SYSTEM: FORMATION

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

SOLAR SYSTEM: GENERAL

Experimental Limits on the Density of Dark Matter in the Solar System. *Øyvind Grøn & Harald H. Soleng.* 456, 445, 9-F3 (1996)
Predicting Big Bang Deuterium. *N. Hata, R. J. Scherrer, G. Steigman, D. Thomas, & T. P. Walker.* 458, 637, 47-E9 (1996)

STARS: ABUNDANCES

The Low-Mass Double-lined Eclipsing Binary CM Draconis: A Test of the Primordial Helium Abundance and the Mass-Radius Relation near the Bottom of the Main Sequence. *Travis S. Metcalfe, Robert D. Mathieu, David W. Latham, & Guillermo Torres.* 456, 356, 5-G10 (1996)
Corona(e) of AR Lacertae. I. The Temperature and Abundance Distribution. *K. P. Singh, N. E. White, & S. A. Drake.* 456, 766, 14-B13 (1996)
Determinations of Metal Abundances from *ROSAT* Observations. *Franz Bauer & Joel N. Bregman.* 457, 382, 23-B11 (1996)
Lithium Processing in Halo Dwarfs, and T_{eff}, [Fe/H] Correlations on the Spite Plateau. *Sean G. Ryan, Timothy C. Beers, Constantine P. Deliyannis, & Julie A. Thorburn.* 458, 543, 46-C8 (1996)
Lithium in Brown Dwarf Candidates: The Mass and Age of the Faintest Pleiades Stars. *Gibor Basri, Geoffrey W. Marcy, & James R. Graham.* 458, 600, 47-B3 (1996)

STARS: ACTIVITY

Variations of β Comae through a Magnetic Minimum. *David F. Gray, Sallie L. Baliunas, G. W. Lockwood, & Brian A. Skiff.* 456, 365, 6-A8 (1996)
On the Coronal Field Topology in Warm Stars: Is Procyon a Warm Hybrid? *Carolus J. Schrijver & Bernhard Haisch.* 456, L55, 8-B3 (1996)

STARS: AGB AND POST-AGB

Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

STARS: ATMOSPHERES

Ultraviolet Opacity and Fluorescence in Supernova Envelopes. *Hongwei Li & Richard McCray.* 456, 370, 6-B2 (1996)
On the Balmer Line Problem. *K. Werner.* 457, L39, 26-B10 (1996)
Ultraviolet Emission-Line Intensities and Coronal Heating by Velocity Filtration: Collisionless Results. *Stephen W. Anderson, John C. Raymond, & Adriaan van Ballegooijen.* 457, 939, 33-F14 (1996)

STARS: BINARIES

Formation of Low-Mass X-Ray Binaries. I. Constraints on Hydrogen-rich Donors at the Onset of the X-Ray Phase. *Vassiliki Kalogera & Ronald F. Webbink.* 458, 301, 40-B9 (1996)

STARS: BINARIES: CLOSE

On the Origin of the High Space Velocities of Radio Pulsars. *Icko Iben, Jr., & Alexander V. Tutukov.* 456, 738, 13-G7 (1996)
On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)
The Single-degenerate Scenario for Type Ia Supernovae in Cosmic Perspective. *R. Canal, P. Ruiz-Lapuente, & A. Burkert.* 456, L101, 17-B2 (1996)
Spin and Orbital Evolution in Low-Mass Binary Pulsars. *L. Burderi, A. R. King, & G. A. Wynn.* 457, 348, 22-F10 (1996)
The 0.8 Day Orbit of the Precataclysmic Binary EUVE J1016−053. *John R. Thorstensen, Stéphane Vennes, & Stuart Bowyer.* 457, 390, 23-C8 (1996)
Transient X-Ray Sources, Luminosity Gaps, and Neutron Star Densities. *Robin H. D. Corbet.* 457, L31, 26-A10 (1996)
A New Model for Black Hole Soft X-Ray Transients in Quiescence. *Ramesh Narayan, Jeffrey E. McClintock, & Insu Yi.* 457, 821, 32-C1 (1996)
Are Microlensing Events Contaminated by Dwarf Nova Eruptions? *Massimo Della Valle & Mario Livio.* 457, L77, 34-F7 (1996)
Radiation Dosimetry of Binary Pulsars. *David Eichler & Biman B. Nath.* 458, 275, 39-G2 (1996)
Double-Core Evolution. IX. The Infall of a Main-Sequence Star through the Envelope of Its Intermediate-Mass Red Giant Companion. *James L. Terman & Ronald E. Taam.* 458, 692, 48-C11 (1996)
Timescale Invariance of Rapid X-Ray Variability of the Black Hole Candidate GRO J1719−24. *F. van der Hooft, C. Kouveliotou, J. van Paradijs, B. C. Rubin, D. J. Crary, M. H. Finger, B. A. Harmon, M. van der Klis, W. H. G. Lewin, J. P. Norris, & G. J. Fishman.* 458, L75, 52-C2 (1996)

STARS: BINARIES: ECLIPSING

The Low-Mass Double-lined Eclipsing Binary CM Draconis: A Test of the Primordial Helium Abundance and the Mass-Radius Relation near the Bottom of the Main Sequence. *Travis S. Metcalfe, Robert D. Mathieu, David W. Latham, & Guillermo Torres.* 456, 356, 5-G10 (1996)
Orbital Decay in the X-Ray Binary LMC X-4. *Samar Safi-Harb & Hakki Ögelman.* 456, L37, 7-F13 (1996)
Corona(e) of AR Lacertae. I. The Temperature and Abundance Distribution. *K. P. Singh, N. E. White, & S. A. Drake.* 456, 766, 14-B13 (1996)
R Canis Majoris—Revisited. *M. B. K. Sarma, P. Vivekananda Rao, & K. D. Abhyankar.* 458, 371, 41-B3 (1996)

STARS: BINARIES: GENERAL

Observation of a Lunar Occultation of T Tauri. *M. Simon, A. J. Longmore, M. A. Shure, & A. Smillie.* 456, L41, 7-G7 (1996)
Truncation of the Binary Distribution Function in Globular Cluster Formation. *E. Vesperini & David F. Chernoff.* 458, 178, 38-E3 (1996)
Optical Studies of Millisecond Pulsar Companions. *S. C. Lundgren, J. M. Cordes, R. S. Foster, A. Wolszczan, & F. Camilo.* 458, L33, 43-A3 (1996)

STARS: BINARIES: SPECTROSCOPIC

The Large Magellanic Cloud Supersoft X-Ray Binary RX J0513.9−6951. *David Crampton, J. B. Hutchings, A. P. Cowley, P. C. Schmidtke, T. K. McGrath, D. O'Donoghue, & M. K. Harrop-Allin.* 456, 320, 5-D6 (1996)
The Low-Mass Double-lined Eclipsing Binary CM Draconis: A Test of the Primordial Helium Abundance and the Mass-Radius Relation near the Bottom of the Main Sequence. *Travis S. Metcalfe, Robert D. Mathieu, David W. Latham, & Guillermo Torres.* 456, 356, 5-G10 (1996)

STARS: BINARIES: SYMBIOTIC

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. II. The 1985 Outburst of RS Ophiuchi. *Steven N. Shore, Scott J. Kenyon, Sumner Starrfield, & G. Sonneborn.* 456, 717, 13-E2 (1996)

STARS: BINARIES: VISUAL

The Connection between Submillimeter Continuum Flux and Binary Separation in Young Binaries: Evidence of Interaction between Stars and Disks. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 458, 312, 40-C9 (1996)

STARS: CHROMOSPHERES

Goddard High-Resolution Spectrograph Observations of Procyon and HR 1099. *Brian E. Wood, Graham M. Harper, Jeffrey L. Linsky, & Robert C. Dempsey.* 458, 761, 49-C10 (1996)

STARS: CIRCUMSTELLAR MATTER

The Effect of Gravitational Instabilities on Protostellar Disks. *Gregory Laughlin & Michał Różyczka.* 456, 279, 4-G4 (1996)

Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

Lithium Enrichment–Mass-Loss Connection in K Giant Stars. *R. de la Reza, N. A. Drake, & L. da Silva.* 456, L115, 17-C10 (1996)

Aperture Synthesis ^{13}CO (J = 1–0) Observations of the Molecular Gas around DG Tauri: Evidence for a Dispersing Gas Disk. *Yoshimi Kitamura, Ryohei Kawabe, & Masao Saito.* 457, 277, 21-F11 (1996)

STARS: CORONAE

On the Coronal Field Topology in Warm Stars: Is Procyon a Warm Hybrid? *Carolus J. Schrijver & Bernhard Haisch.* 456, L55, 8-B3 (1996)

Corona(e) of AR Lacertae. I. The Temperature and Abundance Distribution. *K. P. Singh, N. E. White, & S. A. Drake.* 456, 766, 14-B13 (1996)

Determinations of Metal Abundances from *ROSAT* Observations. *Franz Bauer & Joel N. Bregman.* 457, 382, 23-B11 (1996)

The Extreme-Ultraviolet Spectrum of the Nearby K Dwarf ϵ Eridani. *J. H. M. M. Schmitt, J. J. Drake, R. A. Stern, & B. M. Haisch.* 457, 882, 33-A11 (1996)

Correlating Coronal Temperature and Gravitational Potential: A Test of the Nonthermal Boundary Hypothesis. *L. L. Williams & D. J. Mullan.* 457, L95, 35-A9 (1996)

STARS: EARLY-TYPE

On the Balmer Line Problem. *K. Werner.* 457, L39, 26-B10 (1996)

IUE Observations of Young Clusters in the Large Magellanic Cloud. *Eric M. Wilcots, Paul W. Hodge, & Nichole King.* 458, 580, 46-F13 (1996)

STARS: EMISSION-LINE, BE

The Peculiar Population of Hot Stars at the Galactic Center. *Peter Tamblyn, G. H. Rieke, Margaret Murray Hanson, L. M. Close, D. W. McCarthy, Jr., & M. J. Rieke.* 456, 206, 3-G3 (1996)

STARS: EVOLUTION

Long-Term Nonlinear Thermal Effects in the Pulsation of Mira Variables. *A. Ya'ari & Y. Tuchman.* 456, 350, 5-G1 (1996)

On the Origin of the High Space Velocities of Radio Pulsars. *Icko Iben, Jr., & Alexander V. Tutukov.* 456, 738, 13-G7 (1996)

On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)

Seismology of η Bootis. *D. B. Guenther & P. Demarque.* 456, 798, 14-E12 (1996)

Lithium Enrichment–Mass-Loss Connection in K Giant Stars. *R. de la Reza, N. A. Drake, & L. da Silva.* 456, L115, 17-C10 (1996)

The Theoretical Calculation of the Rossby Number and the "Nonlocal" Convective Overturn Time for Pre–Main-Sequence and Early Post–Main-Sequence Stars. *Yong-Cheol Kim & Pierre Demarque.* 457, 340, 22-E12 (1996)

Uncertainties in the Modeling of Old Stellar Populations. *Stéphane Charlot, Guy Worthey, & Alessandro Bressan.* 457, 625, 29-D12 (1996)

The Neutron Star and Black Hole Initial Mass Function. *F. X. Timmes, S. E. Woosley, & Thomas A. Weaver.* 457, 834, 32-D3 (1996)

Thermally Driven Neutron Star Glitches. *Bennett Link & Richard I. Epstein.* 457, 844, 32-E2 (1996)

A New Look at Carbon Abundances in Planetary Nebulae. I. PB 6, Hu 2–1, K648, and H4–1. *R. B. C. Henry, K. B. Kwitter, & J. W. Howard.* 458, 215, 39-A7 (1996)

Formation of Low-Mass X-Ray Binaries. I. Constraints on Hydrogen-rich Donors at the Onset of the X-Ray Phase. *Vassiliki Kalogera & Ronald F. Webbink.* 458, 301, 40-B9 (1996)

Optical Studies of Millisecond Pulsar Companions. *S. C. Lundgren, J. M. Cordes, R. S. Foster, A. Wolszczan, & F. Camilo.* 458, L33, 43-A3 (1996)

Lithium in Brown Dwarf Candidates: The Mass and Age of the Faintest Pleiades Stars. *Gibor Basri, Geoffrey W. Marcy, & James R. Graham.* 458, 600, 47-B3 (1996)

Computing the Delayed Collapse of Hot Neutron Stars to Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 458, 680, 48-B9 (1996)

Double-Core Evolution. IX. The Infall of a Main-Sequence Star through the Envelope of Its Intermediate-Mass Red Giant Companion. *James L. Terman & Ronald E. Taam.* 458, 692, 48-C11 (1996)

STARS: FORMATION

Millimeter Interferometric Polarization Imaging of the Young Stellar Object NGC 1333/IRAS 4A. *R. L. Akeson, J. E. Carlstrom, J. A. Phillips, & D. P. Woody.* 456, L45, 8-A1 (1996)

Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

On the Star Formation Rate, Initial Mass Function, and Hubble Type of Disk Galaxies and the Age of the Universe. *Jesper Sommer-Larsen.* 457, 118, 19-F7 (1996)

High-Velocity Molecular Gas from High-Mass Star Formation Regions. *D. S. Shepherd & E. Churchwell.* 457, 267, 21-E9 (1996)

On the Quasi-hydrostatic Flows of Radiatively Cooling Self-gravitating Gas Clouds. *Baruch Meerson, Ephraim Megged, & Toshiki Tajima.* 457, 321, 22-D1 (1996)

The Central Star Cluster of the Star-forming Dwarf Galaxy NGC 5253. *S. C. Beck, J. L. Turner, P. T. P. Ho, J. H. Lacy, & D. M. Kelly.* 457, 610, 29-C4 (1996)

Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

The Thermal Radio Jet of Cepheus A HW2 and the Water Maser Distribution at 0″Scale (60 AU). *José M. Torrelles, José F. Gómez, Luis F. Rodríguez, Salvador Curiel, Paul T. P. Ho, & Guido Garay.* 457, L107, 35-C5 (1996)

The Connection between Submillimeter Continuum Flux and Binary Separation in Young Binaries: Evidence of Interaction between Stars and Disks. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 458, 312, 40-C9 (1996)

The Dynamic Stability of Rotating Protostars and Protostellar Disks. I. The Effects of the Angular Momentum Distribution. *Brian K. Pickett, Richard H. Durisen, & Glen A. Davis.* 458, 714, 48-E12 (1996)

STARS: FUNDAMENTAL PARAMETERS

Seismology of η Bootis. *D. B. Guenther & P. Demarque.* 456, 798, 14-E12 (1996)

On the Balmer Line Problem. *K. Werner.* 457, L39, 26-B10 (1996)

Optical Studies of Millisecond Pulsar Companions. *S. C. Lundgren, J. M. Cordes, R. S. Foster, A. Wolszczan, & F. Camilo.* 458, L33, 43-A3 (1996)

Main-Sequence Masses and Radii from Gravitational Redshifts. *Ted von Hippel.* 458, L37, 43-A11 (1996)

STARS: INDIVIDUAL

Constellation Name: η Bootis

Seismology of η Bootis. *D. B. Guenther & P. Demarque.* 456, 798, 14-E12 (1996)

Constellation Name: R Canis Majoris

R Canis Majoris—Revisited. *M. B. K. Sarma, P. Vivekananda Rao, & K. D. Abhyankar.* 458, 371, 41-B3 (1996)

Constellation Name: α Canis Minoris

Goddard High-Resolution Spectrograph Observations of Procyon and HR 1099. *Brian E. Wood, Graham M. Harper, Jeffrey L. Linsky, & Robert C. Dempsey.* 458, 761, 49-C10 (1996)

Constellation Name: Centaurus X-3

Long-Term Behavior of Centaurus X-3 Observed with the All Sky Monitor on Board *Ginga*. *Hiroshi Tsunemi, Shunji Kitamoto, & Keisuke Tamura.* 456, 316, 5-C13 (1996)

Constellation Name: β Comae

Variations of β Comae through a Magnetic Minimum. *David F. Gray, Sallie L. Baliunas, G. W. Lockwood, & Brian A. Skiff.* 456, 365, 6-A8 (1996)

Constellation Name: Cygnus XR-1

The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

Constellation Name: Nova V1974 Cygni

ROSAT X-Ray Observations of Nova V1974 Cygni: The Rise and Fall of the Brightest Supersoft X-Ray Source. *J. Krautter, H. Ögelman, S. Starrfield, R. Wichmann, & E. Pfeffermann.* 456, 788, 14-D13 (1996)

Constellation Name: CM Draconis

The Low-Mass Double-lined Eclipsing Binary CM Draconis: A Test of the Primordial Helium Abundance and the Mass-Radius Relation near the Bottom of the Main Sequence. *Travis S. Metcalfe, Robert D. Mathieu, David W. Latham, & Guillermo Torres.* 456, 356, 5-G10 (1996)

Constellation Name: ϵ Eridani

The Extreme-Ultraviolet Spectrum of the Nearby K Dwarf ϵ Eridani. *J. H. M. M. Schmitt, J. J. Drake, R. A. Stern, & B. M. Haisch.* 457, 882, 33-A11 (1996)

Constellation Name: VW Hydri

Hubble Space Telescope/FOS Spectroscopy of VW Hydri in Superoutburst. *M. Huang, E. M. Sion, I. Hubeny, F. H. Cheng, & P. Szkody.* 458, 355, 40-G9 (1996)

Constellation Name: AR Lacertae

Corona(e) of AR Lacertae. I. The Temperature and Abundance Distribution. *K. P. Singh, N. E. White, & S. A. Drake.* 456, 766, 14-B13 (1996)

Constellation Name: BT Monocerotis

BT Monocerotis: Another Extraordinary Old Nova. *James C. White II, Eric M. Schlegel, & R. Kent Honeycutt.* 456, 777, 14-C13 (1996)

Constellation Name: Nova Muscae 1991

Limits on Reported Transient Emission Events near 0.5 MeV from the Crab and 1E 1740.7−2942. *D. M. Smith, M. Leventhal, R. Cavallo, N. Gehrels, J. Tueller, & G. Fishman.* 458, 576, 46-F6 (1996)

Constellation Name: ρ Ophiuchi

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. II. The 1985 Outburst of RS Ophiuchi. *Steven N. Shore, Scott J. Kenyon, Sumner Starrfield, & G. Sonneborn.* 456, 717, 13-E2 (1996)

Constellation Name: DG Tauri

Aperture Synthesis ^{13}CO (J = 1–0) Observations of the Molecular Gas around DG Tauri: Evidence for a Dispersing Gas Disk. *Yoshimi Kitamura, Ryohei Kawabe, & Masao Saito.* 457, 277, 21-F11 (1996)

Bright Star Number: HR 1099

Goddard High-Resolution Spectrograph Observations of Procyon and HR 1099. *Brian E. Wood, Graham M. Harper, Jeffrey L. Linsky, & Robert C. Dempsey.* 458, 761, 49-C10 (1996)

Henry Draper Number: HD 116852

The Gas and Dust Abundances of Diffuse Halo Clouds in the Milky Way. *Kenneth R. Sembach & Blair D. Savage.* 457, 211, 20-G11 (1996)

Alphanumeric: 1E 1740.7−2942

Limits on Reported Transient Emission Events near 0.5 MeV from the Crab and 1E 1740.7−2942. *D. M. Smith, M. Leventhal, R. Cavallo, N. Gehrels, J. Tueller, & G. Fishman.* 458, 576, 46-F6 (1996)

Alphanumeric: EUVE J1016−053

The 0.8 Day Orbit of the Precataclysmic Binary EUVE J1016−053. *John R. Thorstensen, Stéphane Vennes, & Stuart Bowyer.* 457, 390, 23-C8 (1996)

Alphanumeric: GRO J165+40

On the Jets Associated with Galactic Superluminal Sources. *Amir Levinson & Roger Blandford.* 456, L29, 7-E13 (1996)

Alphanumeric: GRS 1915+105

On the Jets Associated with Galactic Superluminal Sources. *Amir Levinson & Roger Blandford.* 456, L29, 7-E13 (1996)

Alphanumeric: HH 100

Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices. *D. C. B. Whittet, R. G. Smith, A. J. Adamson, D. K. Aitken, J. E. Chiar, T. H. Kerr, P. F. Roche, C. H. Smith, & C. M. Wright.* 458, 363, 41-A6 (1996)

Alphanumeric: LMC X-4

Orbital Decay in the X-Ray Binary LMC X-4. *Samar Safi-Harb & Hakki Ögelman.* 456, L37, 7-F13 (1996)

Alphanumeric: OH 26.5+0.6

Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

Alphanumeric: RE 0751+14

The Magnetic Field of the Intermediate Polar RE 0751+14. *H. Väth, G. Chanmugam, & J. Frank.* 457, 407, 23-E3 (1996)

Alphanumeric: RX J0513.9−6951

The Large Magellanic Cloud Supersoft X-Ray Binary RX J0513.9−6951. *David Crampton, J. B. Hutchings, A. P. Cowley, P. C. Schmidtke, T. K. McGrath, D. O'Donoghue, & M. K. Harrop-Allin.* 456, 320, 5-D6 (1996)

Alphanumeric: 4U 0900−40

The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

Alphanumeric: 4U 1700−37

The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

STARS: INTERIORS

Effects of Dark Matter on the Stability of Supermassive Stars. *Gail C. McLaughlin & George M. Fuller.* 456, 71, 2-A2 (1996)

Stellar Models and Luminosity Functions for the Population II Main Sequence Down to Its Lower End. *Francesca D'Antona & Italo Mazzitelli.* 456, 329, 5-E1 (1996)

Long-Term Nonlinear Thermal Effects in the Pulsation of Mira Variables. *A. Ya'ari & Y. Tuchman.* 456, 350, 5-G1 (1996)

On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)

Seismology of η Bootis. *D. B. Guenther & P. Demarque.* 456, 798, 14-E12 (1996)

Analysis of the Late Optical Spectra of SN 1993J. *John C. Houck & Claes Fransson.* 456, 811, 14-G1 (1996)

The Theoretical Calculation of the Rossby Number and the "Nonlocal" Convective Overturn Time for Pre–Main-Sequence and Early Post–Main-Sequence Stars. *Yong-Cheol Kim & Pierre Demarque.* 457, 340, 22-E12 (1996)

Explosion Models for Type Ia Supernovae: A Comparison with Observed Light Curves, Distances, H_0, and q_0. *P. Höflich & A. Khokhlov.* 457, 500, 27-G1 (1996)

Thermally Driven Neutron Star Glitches. *Bennett Link & Richard I. Epstein.* 457, 844, 32-E2 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

The Dynamic Stability of Rotating Protostars and Protostellar Disks. I. The Effects of the Angular Momentum Distribution. *Brian K. Pickett, Richard H. Durisen, & Glen A. Davis.* 458, 714, 48-E12 (1996)

STARS: KINEMATICS

On the Origin of the High Space Velocities of Radio Pulsars. *Icko Iben, Jr., & Alexander V. Tutukov.* 456, 738, 13-G7 (1996)

STARS: LATE-TYPE

Lithium Enrichment–Mass-Loss Connection in K Giant Stars. *R. de la Reza, N. A. Drake, & L. da Silva.* 456, L115, 17-C10 (1996)

The 0.8 Day Orbit of the Precataclysmic Binary EUVE J1016−053. *John R. Thorstensen, Stéphane Vennes, & Stuart Bowyer.* 457, 390, 23-C8 (1996)

The Extreme-Ultraviolet Spectrum of the Nearby K Dwarf ε Eridani. *J. H. M. M. Schmitt, J. J. Drake, R. A. Stern, & B. M. Haisch.* 457, 882, 33-A11 (1996)

Detection of Ionized Gas toward an OH/IR Star: A Measure of the UV Radiation Field near the Galactic Center. *Farhad Yusef-Zadeh, Mark Wardle, & Douglas Roberts.* 458, L21, 42-F10 (1996)

STARS: LOW-MASS, BROWN DWARFS

Stellar Models and Luminosity Functions for the Population II Main Sequence Down to Its Lower End. *Francesca D'Antona & Italo Mazzitelli.* 456, 329, 5-E1 (1996)

Analysis of a *Hubble Space Telescope* Search for Red Dwarfs: Limits on Baryonic Matter in the Galactic Halo. *David S. Graff & Katherine Freese.* 456, L49, 8-A8 (1996)

The Role of Thermal Instabilities on the Theoretical Mass Function of MACHOs. *E. M. de Gouveia Dal Pino, J. E. Horvath, & J. A. de Freitas Pacheco.* 456, L97, 17-A9 (1996)

Do Microlensing Events Repeat? *R. Di Stefano & S. Mao.* 457, 93, 19-D1 (1996)

Near-Infrared Photometry and the Nature of Gliese 105C. *Richard J. Rudy, George S. Rossano, & R. C. Puetter.* 458, L41, 43-B3 (1996)

Lithium in Brown Dwarf Candidates: The Mass and Age of the Faintest Pleiades Stars. *Gibor Basri, Geoffrey W. Marcy, & James R. Graham.* 458, 600, 47-B3 (1996)

STARS: LUMINOSITY FUNCTION, MASS FUNCTION

The Intermediate Stellar Mass Population in NGC 604 Determined from *Hubble Space Telescope* Images. *Deidre A. Hunter, William A. Baum, Earl J. O'Neil, Jr., & Roger Lynds.* 456, 174, 3-D1 (1996)

Stellar Models and Luminosity Functions for the Population II Main Sequence Down to Its Lower End. *Francesca D'Antona & Italo Mazzitelli.* 456, 329, 5-E1 (1996)

The Neutron Star and Black Hole Initial Mass Function. *F. X. Timmes, S. E. Woosley, & Thomas A. Weaver.* 457, 834, 32-D3 (1996)

STARS: MAGNETIC

Variations of β Comae through a Magnetic Minimum. *David F. Gray, Sallie L. Baliunas, G. W. Lockwood, & Brian A. Skiff.* 456, 365, 6-A8 (1996)

STARS: MAGNETIC FIELDS

On the Coronal Field Topology in Warm Stars: Is Procyon a Warm Hybrid? *Carolus J. Schrijver & Bernhard Haisch.* 456, L55, 8-B3 (1996)

Spin and Orbital Evolution in Low-Mass Binary Pulsars. *L. Burderi, A. R. King, & G. A. Wynn.* 457, 348, 22-F10 (1996)

Layered Accretion in T Tauri Disks. *Charles F. Gammie.* 457, 355, 22-G6 (1996)

The Magnetic Field of the Intermediate Polar RE 0751+14. *H. Väth, G. Chanmugam, & J. Frank.* 457, 407, 23-E3 (1996)

Magnetic Field and Rotation in Lower Main-Sequence Stars: An Empirical Time-dependent Magnetic Bode's Relation? *Sallie Baliunas, Dmitry Sokoloff, & Willie Soon.* 457, L99, 35-B3 (1996)

Magnetic Effects on Oscillations in roAp Stars. *W. A. Dziembowski & Phillip R. Goode.* 458, 338, 40-E13 (1996)

Magnetic and Spin History of Very Young Pulsars. *Alexander Muslimov & Dany Page.* 458, 347, 40-F11 (1996)

Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

STARS: MASS LOSS

Unresolved Wind-driven Shells and the Supersonic Velocity Dispersion in Giant H II Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñón, & Roberto Cid-Fernandes.* 456, 264, 4-E12 (1996)

High-Resolution Spectroscopy of Br γ Emission in Young Stellar Objects. *Joan Najita, John S. Carr, & Alan T. Tokunaga.* 456, 292, 5-A6 (1996)

Modeling of the Dust and Gas Outflows from OH 26.5+0.6: The Superwind. *K. Justtanont, C. J. Skinner, A. G. G. M. Tielens, M. Meixner, & F. Baas.* 456, 337, 5-E12 (1996)

On the Coronal Field Topology in Warm Stars: Is Procyon a Warm Hybrid? *Carolus J. Schrijver & Bernhard Haisch.* 456, L55, 8-B3 (1996)

Lithium Enrichment–Mass-Loss Connection in K Giant Stars. *R. de la Reza, N. A. Drake, & L. da Silva.* 456, L115, 17-C10 (1996)

Aperture Synthesis ^{13}CO (J = 1–0) Observations of the Molecular Gas around DG Tauri: Evidence for a Dispersing Gas Disk. *Yoshimi Kitamura, Ryohei Kawabe, & Masao Saito.* 457, 277, 21-F11 (1996)

The Shaping of Planetary Nebulae: Asymmetry in the External Wind. *Vikram V. Dwarkadas, Roger A. Chevalier, & John M. Blondin.* 457, 773, 31-E7 (1996)

Detection of Ionized Gas toward an OH/IR Star: A Measure of the UV Radiation Field near the Galactic Center. *Farhad Yusef-Zadeh, Mark Wardle, & Douglas Roberts.* 458, L21, 42-F10 (1996)

IUE Observations of Young Clusters in the Large Magellanic Cloud. *Eric M. Wilcots, Paul W. Hodge, & Nichole King.* 458, 580, 46-F13 (1996)

Double-Core Evolution. IX. The Infall of a Main-Sequence Star through the Envelope of Its Intermediate-Mass Red Giant Companion. *James L. Terman & Ronald E. Taam.* 458, 692, 48-C11 (1996)

STARS: NEUTRON

Fast Rotation of Neutron Stars. *Jean-Pierre Lasota, Paweł Haensel, & Marek Artur Abramowicz.* 456, 300, 5-B3 (1996)

Orbital Decay in the X-Ray Binary LMC X-4. *Samar Safi-Harb & Hakki Ögelman.* 456, L37, 7-F13 (1996)

On the Origin of the High Space Velocities of Radio Pulsars. *Icko Iben, Jr., & Alexander V. Tutukov.* 456, 738, 13-G7 (1996)

Multiwavelength Data Suggest a Cyclotron Feature on the Hot Thermal Continuum of Geminga. *Giovanni F. Bignami, Patrizia A. Caraveo, Roberto Mignani, Jerry Edelstein, & Stuart Bowyer.* 456, L111, 17-C2 (1996)

Spin and Orbital Evolution in Low-Mass Binary Pulsars. *L. Burderi, A. R. King, & G. A. Wynn.* 457, 348, 22-F10 (1996)

Transient X-Ray Sources, Luminosity Gaps, and Neutron Star Densities. *Robin H. D. Corbet.* 457, L31, 26-A10 (1996)

The Neutron Star and Black Hole Initial Mass Function. *F. X. Timmes, S. E. Woosley, & Thomas A. Weaver.* 457, 834, 32-D3 (1996)

Thermally Driven Neutron Star Glitches. *Bennett Link & Richard I. Epstein.* 457, 844, 32-E2 (1996)

Photon Bubble Oscillations in Accretion-powered Pulsars. *Richard I. Klein, Jonathan Arons, Garrett Jernigan, & Juliana J.-L. Hsu.* 457, L85, 34-G6 (1996)

Geometry of Pulsar Emission and Pulse Width Distribution. *J. A. Gil & J. L. Han.* 458, 265, 39-F3 (1996)

Formation of Low-Mass X-Ray Binaries. I. Constraints on Hydrogen-rich Donors at the Onset of the X-Ray Phase. *Vassiliki Kalogera & Ronald F. Webbink.* 458, 301, 40-B9 (1996)

Magnetic and Spin History of Very Young Pulsars. *Alexander Muslimov & Dany Page.* 458, 347, 40-F11 (1996)

Computing the Delayed Collapse of Hot Neutron Stars to Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 458, 680, 48-B9 (1996)

The Role of Doubly Diffusive Instabilities in the Core-Collapse Supernova Mechanism. *Stephen W. Bruenn & Tamara Dineva.* 458, L71, 52-B8 (1996)

STARS: NOVAE, CATACLYSMIC VARIABLES

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. II. The 1985 Outburst of RS Ophiuchi. *Steven N. Shore, Scott J. Kenyon, Sumner Starrfield, & G. Sonneborn.* 456, 717, 13-E2 (1996)

BT Monocerotis: Another Extraordinary Old Nova. *James C. White II, Eric M. Schlegel, & R. Kent Honeycutt.* 456, 777, 14-C13 (1996)

ROSAT X-Ray Observations of Nova V1974 Cygni: The Rise and Fall of the Brightest Supersoft X-Ray Source. *J. Krautter, H. Ögelman, S. Starrfield, R. Wichmann, & E. Pfeffermann.* 456, 788, 14-D13 (1996)

Dynamo-driven Accretion Disks and Dwarf Nova Eruptions. *P. J. Armitage, M. Livio, & J. E. Pringle.* 457, 332, 22-E1 (1996)

Modeling Emission Lines from Dwarf Novae in Quiescence. *Yuan-Kuen Ko, Y. Paul Lee, Eric M. Schlegel, & Timothy R. Kallman.* 457, 363, 23-A3 (1996)

The Magnetic Field of the Intermediate Polar RE 0751+14. *H. Väth, G. Chanmugam, & J. Frank.* 457, 407, 23-E3 (1996)

A New Model for Black Hole Soft X-Ray Transients in Quiescence. *Ramesh Narayan, Jeffrey E. McClintock, & Insu Yi.* 457, 821, 32-C1 (1996)

Are Microlensing Events Contaminated by Dwarf Nova Eruptions? *Massimo Della Valle & Mario Livio.* 457, L77, 34-F7 (1996)

EUVE J1429−38.0: A New Magnetic Cataclysmic Variable. *N. Craig, S. B. Howell, M. M. Sirk, & R. F. Malina.* 457, L91, 35-A1 (1996)

Hubble Space Telescope/FOS Spectroscopy of VW Hydri in Superoutburst. *M. Huang, E. M. Sion, I. Hubeny, F. H. Cheng, & P. Szkody.* 458, 355, 40-G9 (1996)

STARS: OSCILLATIONS

Long-Term Nonlinear Thermal Effects in the Pulsation of Mira Variables. *A. Ya'ari & Y. Tuchman.* 456, 350, 5-G1 (1996)

Seismology of η Bootis. *D. B. Guenther & P. Demarque.* 456, 798, 14-E12 (1996)

A High-Resolution X-Ray Spectrum of Centaurus X-3. *M. D. Audley, R. L. Kelley, E. A. Boldt, K. M. Jahoda, F. E. Marshall, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, & K. A. Weaver.* 457, 397, 23-D4 (1996)

Resonance Oscillation of Radiative Shock Waves in Accretion Disks around Compact Objects. *Diego Molteni, Hanno Sponholz, & Sandip K. Chakrabarti.* 457, 805, 32-A6 (1996)

The Stability Properties of Two-Temperature White Dwarf Radiative Shock Waves. *James N. Imamura, Abdossalam Aboasha, Michael T. Wolff, & Kent S. Wood.* 458, 327, 40-D13 (1996)

Magnetic Effects on Oscillations in roAp Stars. *W. A. Dziembowski & Phillip R. Goode.* 458, 338, 40-E13 (1996)

STARS: PECULIAR

Magnetic Effects on Oscillations in roAp Stars. *W. A. Dziembowski & Phillip R. Goode.* 458, 338, 40-E13 (1996)

STARS: POPULATION II

Stellar Models and Luminosity Functions for the Population II Main Sequence Down to Its Lower End. *Francesca D'Antona & Italo Mazzitelli.* 456, 329, 5-E1 (1996)

The Low-Mass Double-lined Eclipsing Binary CM Draconis: A Test of the Primordial Helium Abundance and the Mass-Radius Relation near the Bottom of the Main Sequence. *Travis S. Metcalfe, Robert D. Mathieu, David W. Latham, & Guillermo Torres.* 456, 356, 5-G10 (1996)

Analysis of a *Hubble Space Telescope* Search for Red Dwarfs: Limits on Baryonic Matter in the Galactic Halo. *David S. Graff & Katherine Freese.* 456, L49, 8-A8 (1996)

STARS: PRE–MAIN-SEQUENCE

High-Resolution Spectroscopy of Brγ Emission in Young Stellar Objects. *Joan Najita, John S. Carr, & Alan T. Tokunaga.* 456, 292, 5-A6 (1996)

Observation of a Lunar Occultation of T Tauri. *M. Simon, A. J. Longmore, M. A. Shure, & A. Smillie.* 456, L41, 7-G7 (1996)

High-Velocity Ammonia Emission Associated with the Young Stellar Object Serpens FIRS 1. *Salvador Curiel, Luis F. Rodríguez, José F. Gómez, José M. Torrelles, Paul T. P. Ho, & Carlos Eiroa.* 456, 677, 13-A2 (1996)

Potential Protostars in Cloud Cores: H_2CO Observations of Serpens. *Robert L. Hurt, Mary Barsony, & Alwyn Wootten.* 456, 686, 13-B1 (1996)

Magnetic Interaction between Classic T Tauri Stars and Their Associated Disks. *Jianke Li.* 456, 696, 13-C1 (1996)

Aperture Synthesis ^{13}CO (J = 1–0) Observations of the Molecular Gas around DG Tauri: Evidence for a Dispersing Gas Disk. *Yoshimi Kitamura, Ryohei Kawabe, & Masao Saito.* 457, 277, 21-F11 (1996)

The Theoretical Calculation of the Rossby Number and the "Nonlocal" Convective Overturn Time for Pre–Main-Sequence and Early Post–Main-Sequence Stars. *Yong-Cheol Kim & Pierre Demarque.* 457, 340, 22-E12 (1996)

Layered Accretion in T Tauri Disks. *Charles F. Gammie.* 457, 355, 22-G6 (1996)

Interferometric Observations at 2.7 Millimeters of the Nearest T Tauri Stars. *Marc W. Pound.* 457, L35, 26-B3 (1996)

The Connection between Submillimeter Continuum Flux and Binary Separation in Young Binaries: Evidence of Interaction between Stars and Disks. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 458, 312, 40-C9 (1996)

Interstellar Dust Absorption Features in the Infrared Spectrum of HH 100-IR: Searching for the Nitrogen Component of the Ices. *D. C. B. Whittet, R. G. Smith, A. J. Adamson, D. K. Aitken, J. E. Chiar, T. H. Kerr, P. F. Roche, C. H. Smith, & C. M. Wright.* 458, 363, 41-A6 (1996)

The Deeply Embedded Source That Drives the Protostellar Outflow in AFGL 437: Evidence from Near-Infrared Polarimetric Imaging. *David A. Weintraub & Joel H. Kastner.* 458, 670, 48-A10 (1996)

The Dynamic Stability of Rotating Protostars and Protostellar Disks. I. The Effects of the Angular Momentum Distribution. *Brian K. Pickett, Richard H. Durisen, & Glen A. Davis.* 458, 714, 48-E12 (1996)

Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

STARS: PULSARS: GENERAL

The X-Ray Light Curve of the Very Luminous Supernova SN 1978K in NGC 1313. *Eric M. Schlegel, R. Petre, & E. J. M. Colbert.* 456, 187, 3-E6 (1996)

Fast Rotation of Neutron Stars. *Jean-Pierre Lasota, Paweł Haensel, & Marek Artur Abramowicz.* 456, 300, 5-B3 (1996)

A New Method for Obtaining Binary Pulsar Distances and Its Implications for Tests of General Relativity. *J. F. Bell & M. Bailes.* 456, L33, 7-F7 (1996)

On the Origin of the High Space Velocities of Radio Pulsars. *Icko Iben, Jr., & Alexander V. Tutukov.* 456, 738, 13-G7 (1996)

Spin and Orbital Evolution in Low-Mass Binary Pulsars. *L. Burderi, A. R. King, & G. A. Wynn.* 457, 348, 22-F10 (1996)

A Pulsar Survey of 18 Supernova Remnants. *Peter W. Gorham, Paul S. Ray, Stuart B. Anderson, Shrinivas R. Kulkarni, & Thomas A. Prince.* 458, 257, 39-E6 (1996)

Geometry of Pulsar Emission and Pulse Width Distribution. *J. A. Gil & J. L. Han.* 458, 265, 39-F3 (1996)

Radiation Dosimetry of Binary Pulsars. *David Eichler & Biman B. Nath.* 458, 275, 39-G2 (1996)

Gamma-Ray Pulsars: Emission from Extended Polar Cap Cascades. *Joseph K. Daugherty & Alice K. Harding.* 458, 278, 39-G8 (1996)

STARS: PULSARS: INDIVIDUAL

Name: Centaurus X-3

Long-Term Behavior of Centaurus X-3 Observed with the All Sky Monitor on Board *Ginga*. *Hiroshi Tsunemi, Shunji Kitamoto, & Keisuke Tamura.* 456, 316, 5-C13 (1996)

A High-Resolution X-Ray Spectrum of Centaurus X-3. *M. D. Audley, R. L. Kelley, E. A. Boldt, K. M. Jahoda, F. E. Marshall, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, & K. A. Weaver.* 457, 397, 23-D4 (1996)

Name: Geminga

Multiwavelength Data Suggest a Cyclotron Feature on the Hot Thermal Continuum of Geminga. *Giovanni F. Bignami, Patrizia A. Caraveo, Roberto Mignani, Jerry Edelstein, & Stuart Bowyer.* 456, L111, 17-C2 (1996)

Alphanumeric: B0540−69

A Search for Optical Pulsations in SN 1987A. *R. N. Manchester & B. A. Peterson.* 456, L107, 17-B10 (1996)

Alphanumeric: PSR 0531+21

Magnetic and Spin History of Very Young Pulsars. *Alexander Muslimov & Dany Page.* 458, 347, 40-F11 (1996)

Alphanumeric: PSR 0540−69

Magnetic and Spin History of Very Young Pulsars. *Alexander Muslimov & Dany Page.* 458, 347, 40-F11 (1996)

Alphanumeric: PSR 0656+14

Possible Evidence for Pulsed Emission of High-Energy Gamma Rays by PSR B0656+14. *P. V. Ramanamurthy, C. E. Fichtel, D. A. Kniffen, P. Sreekumar, & D. J. Thompson.* 458, 755, 49-C1 (1996)

Alphanumeric: PSR 1133+16

New Features in Two Radio Pulsars: PSR 1541+09 and PSR 1133+16. *Leszek A. Nowakowski.* 457, 868, 32-G8 (1996)

New Features in Two Radio Pulsars: PSR 1541+09 and PSR 1133+16. *Leszek A. Nowakowski.* 457, 868, 32-G8 (1996)

Alphanumeric: PSR 1509−58

Magnetic and Spin History of Very Young Pulsars. *Alexander Muslimov & Dany Page.* 458, 347, 40-F11 (1996)

Alphanumeric: PSR B1937+21

Giant Radio Pulses from a Millisecond Pulsar. *I. Cognard, J. A. Shrauner, J. H. Taylor, & S. E. Thorsett.* 457, L81, 34-F13 (1996)

Alphanumeric: PSR J0631+10

Discovery of Three Radio Pulsars from an X-Ray–selected Sample. *Alex Zepka, James M. Cordes, Ira Wasserman, & Scott C. Lundgren.* 456, 305, 5-B12 (1996)

Alphanumeric: PSR J1843+20

Discovery of Three Radio Pulsars from an X-Ray–selected Sample. *Alex Zepka, James M. Cordes, Ira Wasserman, & Scott C. Lundgren.* 456, 305, 5-B12 (1996)

Alphanumeric: PSR J1908+04

Discovery of Three Radio Pulsars from an X-Ray–selected Sample. *Alex Zepka, James M. Cordes, Ira Wasserman, & Scott C. Lundgren.* 456, 305, 5-B12 (1996)

Alphanumeric: PSR J2145−0750

Optical Studies of Millisecond Pulsar Companions. *S. C. Lundgren, J. M. Cordes, R. S. Foster, A. Wolszczan, & F. Camilo.* 458, L33, 43-A3 (1996)

STARS: ROTATION

Fast Rotation of Neutron Stars. *Jean-Pierre Lasota, Paweł Haensel, & Marek Artur Abramowicz.* 456, 300, 5-B3 (1996)

The Theoretical Calculation of the Rossby Number and the "Nonlocal" Convective Overturn Time for Pre–Main-Sequence and Early Post–Main-Sequence Stars. *Yong-Cheol Kim & Pierre Demarque.* 457, 340, 22-E12 (1996)

Magnetic Field and Rotation in Lower Main-Sequence Stars: An Empirical Time-dependent Magnetic Bode's Relation? *Sallie Baliunas, Dmitry Sokoloff, & Willie Soon.* 457, L99, 35-B3 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

Geometry of Pulsar Emission and Pulse Width Distribution. *J. A. Gil & J. L. Han.* 458, 265, 39-F3 (1996)

New Global Instabilities of the Riemann Ellipsoids. *Norman R. Lebovitz & Alexander Lifschitz.* 458, 699, 48-D7 (1996)

The Dynamic Stability of Rotating Protostars and Protostellar Disks. I. The Effects of the Angular Momentum Distribution. *Brian K. Pickett, Richard H. Durisen, & Glen A. Davis.* 458, 714, 48-E12 (1996)

Magnetic Accretion and Photopolarimetric Variability in T Tauri Stars. *Kenneth Wood, Scott J. Kenyon, Barbara A. Whitney, & J. E. Bjorkman.* 458, L79, 52-C11 (1996)

STARS: STATISTICS

On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)

The Neutron Star and Black Hole Initial Mass Function. *F. X. Timmes, S. E. Woosley, & Thomas A. Weaver.* 457, 834, 32-D3 (1996)

STARS: SUBDWARFS

Stellar Models and Luminosity Functions for the Population II Main Sequence Down to Its Lower End. *Francesca D'Antona & Italo Mazzitelli.* 456, 329, 5-E1 (1996)

STARS: SUPERGIANTS

The Peculiar Population of Hot Stars at the Galactic Center. *Peter Tamblyn, G. H. Rieke, Margaret Murray Hanson, L. M. Close, D. W. McCarthy, Jr., & M. J. Rieke.* 456, 206, 3-G3 (1996)

On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)

STARS: SUPERNOVAE: GENERAL

Ultraviolet Opacity and Fluorescence in Supernova Envelopes. *Hongwei Li & Richard McCray.* 456, 370, 6-B2 (1996)

Light Isotopes, Extinct Radioisotopes, and Gamma-Ray Lines from Low-Energy Cosmic-Ray Interactions. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 456, 525, 10-F11 (1996)

On the Origin of the High Space Velocities of Radio Pulsars. *Icko Iben, Jr., & Alexander V. Tutukov.* 456, 738, 13-G7 (1996)

The Single-degenerate Scenario for Type Ia Supernovae in Cosmic Perspective. *R. Canal, P. Ruiz-Lapuente, & A. Burkert.* 456, L101, 17-B2 (1996)

Explosion Models for Type Ia Supernovae: A Comparison with Observed Light Curves, Distances, H_0, and q_0. *P. Höflich & A. Khokhlov.* 457, 500, 27-G1 (1996)

The Role of Doubly Diffusive Instabilities in the Core-Collapse Supernova Mechanism. *Stephen W. Bruenn & Tamara Dineva.* 458, L71, 52-B8 (1996)

STARS: SUPERNOVAE: INDIVIDUAL

Alphanumeric: SN 1978K

The X-Ray Light Curve of the Very Luminous Supernova SN 1978K in NGC 1313. *Eric M. Schlegel, R. Petre, & E. J. M. Colbert.* 456, 187, 3-E6 (1996)

Alphanumeric: SN 1987A

Ultraviolet Opacity and Fluorescence in Supernova Envelopes. *Hongwei Li & Richard McCray.* 456, 370, 6-B2 (1996)

A Search for Optical Pulsations in SN 1987A. *R. N. Manchester & B. A. Peterson.* 456, L107, 17-B10 (1996)

Cosmic Lithium: Going Up or Coming Down? *Gary Steigman.* 457, 737, 31-B1 (1996)

Alphanumeric: SN 1993J

Analysis of the Late Optical Spectra of SN 1993J. *John C. Houck & Claes Fransson.* 456, 811, 14-G1 (1996)

STARS: VARIABLES: OTHER

Evidence for the Sagittarius Dwarf Galaxy at Low Galactic Latitudes. *C. Alard.* 458, L17, 42-F3 (1996)

R Coronae Borealis

On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)

Long-Period Variables

Long-Term Nonlinear Thermal Effects in the Pulsation of Mira Variables. *A. Ya'ari & Y. Tuchman.* 456, 350, 5-G1 (1996)

STARS: WHITE DWARFS

On the Origin of Hydrogen-deficient Supergiants and Their Relation to R Coronae Borealis Stars and Non-DA White Dwarfs. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 456, 750, 14-A8 (1996)

The 0.8 Day Orbit of the Precataclysmic Binary EUVE J1016−053. *John R. Thorstensen, Stéphane Vennes, & Stuart Bowyer.* 457, 390, 23-C8 (1996)

The Stability Properties of Two-Temperature White Dwarf Radiative Shock Waves. *James N. Imamura, Abdossalam Aboasha, Michael T. Wolff, & Kent S. Wood.* 458, 327, 40-D13 (1996)

Hubble Space Telescope/FOS Spectroscopy of VW Hydri in Superoutburst. *M. Huang, E. M. Sion, I. Hubeny, F. H. Cheng, & P. Szkody.* 458, 355, 40-G9 (1996)

Optical Studies of Millisecond Pulsar Companions. *S. C. Lundgren, J. M. Cordes, R. S. Foster, A. Wolszczan, & F. Camilo.* 458, L33, 43-A3 (1996)

STARS: WOLF-RAYET

The Peculiar Population of Hot Stars at the Galactic Center. *Peter Tamblyn, G. H. Rieke, Margaret Murray Hanson, L. M. Close, D. W. McCarthy, Jr., & M. J. Rieke.* 456, 206, 3-G3 (1996)

SUN: ABUNDANCES

New High-Statistical–High-Resolution Measurements of the Cosmic-Ray CNO Isotopes from a 17 Year Study Using the *Voyager 1* and *2* Spacecraft. *W. R. Webber, A. Lukasiak, F. B. McDonald, & P. Ferrando.* 457, 435, 24-A1 (1996)

SUN: ACTIVITY

Discrete High-Frequency p-Modes. *Rekha Jain & B. Roberts.* 456, 399, 6-D8 (1996)

Interacting Active Regions in the Solar Corona. *Saku Tsuneta.* 456, L63, 8-C5 (1996)

A Search for Asymmetric Flows in Young Active Regions. *G. Cauzzi, R. C. Canfield, & G. H. Fisher.* 456, 850, 15-C11 (1996)
Flares and the Magnetic Nonpotentiality. *Jingxiu Wang, Zhongxian Shi, Huaning Wang, & Yanping Lü.* 456, 861, 15-D13 (1996)
Nonradial Coronal Streamers. *Y.-M. Wang.* 456, L119, 17-D3 (1996)
The Effects of Convection Zone Turbulence on the Tilt Angles of Magnetic Bipoles. *D. W. Longcope & G. H. Fisher.* 458, 380, 41-C1 (1996)

SUN: CHROMOSPHERE

Chromospheric Evaporation in Four Solar Flares Observed by *Yohkoh*. *M. D. Ding, T. Watanabe, K. Shibata, T. Sakurai, T. Kosugi, & C. Fang.* 458, 391, 41-D1 (1996)

SUN: CORONA

The Influence of the Temperature Profile on the Magnetohydrodynamic Modes of a Prominence-Corona System. *R. Oliver & J. L. Ballester.* 456, 393, 6-D3 (1996)
Interacting Active Regions in the Solar Corona. *Saku Tsuneta.* 456, L63, 8-C5 (1996)
The Near-Infrared Coronal Spectrum. *J. R. Kuhn, M. J. Penn, & I. Mann.* 456, L67, 8-D4 (1996)
Nonradial Coronal Streamers. *Y.-M. Wang.* 456, L119, 17-D3 (1996)
Nonlinear Excitation of Global Modes and Heating in Randomly Driven Coronal Loops. *L. Ofman & J. M. Davila.* 456, L123, 17-D13 (1996)
Ultraviolet Emission-Line Intensities and Coronal Heating by Velocity Filtration: Collisionless Results. *Stephen W. Anderson, John C. Raymond, & Adriaan van Ballegooijen.* 457, 939, 33-F14 (1996)
Detection of Large-Scale Radio Structure and Plasma Flow during a Solar Bright Point Flare. *N. Gopalswamy, M. R. Kundu, Y. Hanaoka, S. Enome, & J. R. Lemen.* 457, L117, 35-D8 (1996)
The Large-Scale Density Structure of the Solar Corona and the Heliospheric Current Sheet. *Madhulika Guhathakurta, Thomas E. Holzer, & R. M. MacQueen.* 458, 817, 50-A9 (1996)
1985 *Voyager 2* Radio Ranging Measurements of Coronal Density: Asymmetry in the Radial Profiles Explained. *Richard Woo.* 458, L87, 52-D11 (1996)

SUN: FLARES

OVRO, BBSO, BATSE, and *Yohkoh* Observations of a Twin Solar Flare. *H. Wang, D. E. Gary, H. Zirin, N. Nitta, R. A. Schwartz, & T. Kosugi.* 456, 403, 6-E1 (1996)
Interpretation of the Observed Plasma "Turbulent" Velocities as a Result of Magnetic Reconnection in Solar Flares. *Ester Antonucci, Carlo Benna, & Boris V. Somov.* 456, 833, 15-A12 (1996)
Structure and Dynamics of Magnetic Reconnection in a Solar Flare. *Saku Tsuneta.* 456, 840, 15-B8 (1996)
Flares and the Magnetic Nonpotentiality. *Jingxiu Wang, Zhongxian Shi, Huaning Wang, & Yanping Lü.* 456, 861, 15-D13 (1996)
Energy Release in a Turbulent Corona. *G. Einaudi, M. Velli, H. Politano, & A. Pouquet.* 457, L113, 35-C13 (1996)
Chromospheric Evaporation in Four Solar Flares Observed by *Yohkoh*. *M. D. Ding, T. Watanabe, K. Shibata, T. Sakurai, T. Kosugi, & C. Fang.* 458, 391, 41-D1 (1996)
First Images of a Solar Flare at Millimeter Wavelengths. *Adriana V. R. Silva, Stephen M. White, Robert P. Lin, Imke de Pater, K. Shibasaki, Hugh S. Hudson, & Mukul R. Kundu.* 458, L49, 43-C3 (1996)

SUN: INFRARED

The Near-Infrared Coronal Spectrum. *J. R. Kuhn, M. J. Penn, & I. Mann.* 456, L67, 8-D4 (1996)

SUN: INTERIOR

An Alternative Explanation for the Observed Variation of Solar *p*-Modes with the Solar Cycle. *Thomas Joseph Lydon, D. B. Guenther, & S. Sofia.* 456, L127, 17-E6 (1996)
Calculations of the Solar Internal Angular Velocity for 1986–1990. *P. R. Wilson, D. Burtonclay, & Y. Li.* 457, 440, 24-A1 (1996)
Nonlinear Compressible Convection in Oblique Magnetic Fields. *Neal E. Hurlburt, Paul C. Matthews, & Michael R. E. Proctor.* 457, 933, 33-F2 (1996)
The Effects of Convection Zone Turbulence on the Tilt Angles of Magnetic Bipoles. *D. W. Longcope & G. H. Fisher.* 458, 380, 41-C1 (1996)
On the Storage of Magnetic Flux Tubes at the Base of the Solar Convection Zone. *Antonio Ferriz-Mas.* 458, 802, 49-G3 (1996)
Solar Dynamo Surface Waves in the Presence of a Primordial Magnetic Field: A 30 Gauss Upper Limit in the Solar Core. *Nicholas Boruta.* 458, 832, 50-B13 (1996)
On the High-Frequency Behavior of Acoustic Waves within the Sun. *Gary H. Price.* 458, 850, 50-D7 (1996)
Observational Searches for Solar *g*-Modes: Some Theoretical Considerations. *Pawan Kumar, Eliot J. Quataert, & John N. Bahcall.* 458, L83, 52-D4 (1996)

SUN: MAGNETIC FIELDS

The Influence of the Temperature Profile on the Magnetohydrodynamic Modes of a Prominence-Corona System. *R. Oliver & J. L. Ballester.* 456, 393, 6-D3 (1996)
Discrete High-Frequency *p*-Modes. *Rekha Jain & B. Roberts.* 456, 399, 6-D8 (1996)
Interacting Active Regions in the Solar Corona. *Saku Tsuneta.* 456, L63, 8-C5 (1996)
Structure and Dynamics of Magnetic Reconnection in a Solar Flare. *Saku Tsuneta.* 456, 840, 15-B8 (1996)
A Search for Asymmetric Flows in Young Active Regions. *G. Cauzzi, R. C. Canfield, & G. H. Fisher.* 456, 850, 15-C11 (1996)
Flares and the Magnetic Nonpotentiality. *Jingxiu Wang, Zhongxian Shi, Huaning Wang, & Yanping Lü.* 456, 861, 15-D13 (1996)
Nonradial Coronal Streamers. *Y.-M. Wang.* 456, L119, 17-D3 (1996)
Nonlinear Excitation of Global Modes and Heating in Randomly Driven Coronal Loops. *L. Ofman & J. M. Davila.* 456, L123, 17-D13 (1996)
An Alternative Explanation for the Observed Variation of Solar *p*-Modes with the Solar Cycle. *Thomas Joseph Lydon, D. B. Guenther, & S. Sofia.* 456, L127, 17-E6 (1996)
Nonlinear Compressible Convection in Oblique Magnetic Fields. *Neal E. Hurlburt, Paul C. Matthews, & Michael R. E. Proctor.* 457, 933, 33-F2 (1996)
The Effects of Convection Zone Turbulence on the Tilt Angles of Magnetic Bipoles. *D. W. Longcope & G. H. Fisher.* 458, 380, 41-C1 (1996)
Equilibrium of Twisted Horizontal Magnetic Flux Tubes. *T. Emonet & F. Moreno-Insertis.* 458, 783, 49-E7 (1996)
On the Storage of Magnetic Flux Tubes at the Base of the Solar Convection Zone. *Antonio Ferriz-Mas.* 458, 802, 49-G3 (1996)
The Large-Scale Density Structure of the Solar Corona and the Heliospheric Current Sheet. *Madhulika Guhathakurta, Thomas E. Holzer, & R. M. MacQueen.* 458, 817, 50-A9 (1996)
Solar Dynamo Surface Waves in the Presence of a Primordial Magnetic Field: A 30 Gauss Upper Limit in the Solar Core. *Nicholas Boruta.* 458, 832, 50-B13 (1996)

SUN: OSCILLATIONS

Discrete High-Frequency *p*-Modes. *Rekha Jain & B. Roberts.* 456, 399, 6-D8 (1996)
Waves in Radiating Fluids. *T. J. Bogdan, M. Knölker, K. B. MacGregor, & E.-J. Kim.* 456, 879, 15-F6 (1996)
An Alternative Explanation for the Observed Variation of Solar *p*-Modes with the Solar Cycle. *Thomas Joseph Lydon, D. B. Guenther, & S. Sofia.* 456, L127, 17-E6 (1996)
Calculations of the Solar Internal Angular Velocity for 1986–1990. *P. R. Wilson, D. Burtonclay, & Y. Li.* 457, 440, 24-A1 (1996)
On the High-Frequency Behavior of Acoustic Waves within the Sun. *Gary H. Price.* 458, 850, 50-D7 (1996)
Observational Searches for Solar *g*-Modes: Some Theoretical Considerations. *Pawan Kumar, Eliot J. Quataert, & John N. Bahcall.* 458, L83, 52-D4 (1996)

SUN: PROMINENCES

The Influence of the Temperature Profile on the Magnetohydrodynamic Modes of a Prominence-Corona System. *R. Oliver & J. L. Ballester.* 456, 393, 6-D3 (1996)

SUN: RADIO RADIATION

OVRO, BBSO, BATSE, and *Yohkoh* Observations of a Twin Solar Flare. *H. Wang, D. E. Gary, H. Zirin, N. Nitta, R. A. Schwartz, & T. Kosugi.* 456, 403, 6-E1 (1996)
Detection of Large-Scale Radio Structure and Plasma Flow during a Solar Bright Point Flare. *N. Gopalswamy, M. R. Kundu, Y. Hanaoka, S. Enome, & J. R. Lemen.* 457, L117, 35-D8 (1996)

SUN: ROTATION

Calculations of the Solar Internal Angular Velocity for 1986–1990. *P. R. Wilson, D. Burtonclay, & Y. Li.* 457, 440, 24-A1 (1996)

SUN: SOLAR WIND

Nonradial Coronal Streamers. *Y.-M. Wang.* 456, L119, 17-D3 (1996)

1985 *Voyager 2* Radio Ranging Measurements of Coronal Density: Asymmetry in the Radial Profiles Explained. *Richard Woo.* 458, L87, 52-D11 (1996)

SUN: TRANSITION REGION

Ultraviolet Emission-Line Intensities and Coronal Heating by Velocity Filtration: Collisionless Results. *Stephen W. Anderson, John C. Raymond, & Adriaan van Ballegooijen.* 457, 939, 33-F14 (1996)

SUN: UV RADIATION

OVRO, BBSO, BATSE, and *Yohkoh* Observations of a Twin Solar Flare. *H. Wang, D. E. Gary, H. Zirin, N. Nitta, R. A. Schwartz, & T. Kosugi.* 456, 403, 6-E1 (1996)

Ultraviolet Emission-Line Intensities and Coronal Heating by Velocity Filtration: Collisionless Results. *Stephen W. Anderson, John C. Raymond, & Adriaan van Ballegooijen.* 457, 939, 33-F14 (1996)

SUN: X-RAYS, GAMMA RAYS

OVRO, BBSO, BATSE, and *Yohkoh* Observations of a Twin Solar Flare. *H. Wang, D. E. Gary, H. Zirin, N. Nitta, R. A. Schwartz, & T. Kosugi.* 456, 403, 6-E1 (1996)

Structure and Dynamics of Magnetic Reconnection in a Solar Flare. *Saku Tsuneta.* 456, 840, 15-B8 (1996)

Detection of Large-Scale Radio Structure and Plasma Flow during a Solar Bright Point Flare. *N. Gopalswamy, M. R. Kundu, Y. Hanaoka, S. Enome, & J. R. Lemen.* 457, L117, 35-D8 (1996)

Chromospheric Evaporation in Four Solar Flares Observed by *Yohkoh*. *M. D. Ding, T. Watanabe, K. Shibata, T. Sakurai, T. Kosugi, & C. Fang.* 458, 391, 41-D1 (1996)

SURVEYS

A Systematic Search for *IRAS* Galaxies behind the Milky Way. *Tadafumi Takata, Toru Yamada, & Mamoru Saitō.* 457, 693, 30-C12 (1996)

Evidence for the Sagittarius Dwarf Galaxy at Low Galactic Latitudes. *C. Alard.* 458, L17, 42-F3 (1996)

Far Outer Galaxy H II Regions. *Alexander L. Rudolph, Jan Brand, Eugène J. de Geus, & Jan G. A. Wouterloot.* 458, 653, 47-G4 (1996)

TECHNIQUES: INTERFEROMETRIC

Millimeter Interferometric Polarization Imaging of the Young Stellar Object NGC 1333/IRAS 4A. *R. L. Akeson, J. E. Carlstrom, J. A. Phillips, & D. P. Woody.* 456, L45, 8-A1 (1996)

Interferometric Imaging of the Sunyaev-Zeldovich Effect at 30 GHz. *John E. Carlstrom, Marhshall Joy, & Laura Grego.* 456, L75, 16-E8 (1996)

VLBI Observations of the Ultracompact Radio Nucleus of the Galaxy M81. *M. F. Bietenholz, N. Bartel, M. P. Rupen, J. E. Conway, A. J. Beasley, R. A. Sramek, J. D. Romney, M. A. Titus, D. A. Graham, V. I. Altunin, D. L. Jones, A. Rius, T. Venturi, G. Umana, K. W. Weiler, S. D. Van Dyk, N. Panagia, W. H. Cannon, J. Popelar, & R. J. Davis.* 457, 604, 28-B9 (1996)

TECHNIQUES: POLARIMETRIC

Millimeter Interferometric Polarization Imaging of the Young Stellar Object NGC 1333/IRAS 4A. *R. L. Akeson, J. E. Carlstrom, J. A. Phillips, & D. P. Woody.* 456, L45, 8-A1 (1996)

TECHNIQUES: RADIAL VELOCITIES

Main-Sequence Masses and Radii from Gravitational Redshifts. *Ted von Hippel.* 458, L37, 43-A11 (1996)

TURBULENCE

Interpretation of the Observed Plasma "Turbulent" Velocities as a Result of Magnetic Reconnection in Solar Flares. *Ester Antonucci, Carlo Benna, & Boris V. Somov.* 456, 833, 15-A12 (1996)

Energy Release in a Turbulent Corona. *G. Einaudi, M. Velli, H. Politano, & A. Pouquet.* 457, L113, 35-C13 (1996)

Observation of Turbulent Fluctuations in the Interstellar Plasma Density and Magnetic Field on Spatial Scales of 0.01 to 100 Parsecs. *Anthony H. Minter & Steven R. Spangler.* 458, 194, 38-F10 (1996)

The Disk Accretion Rate for Dynamo-generated Turbulence. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 458, L45, 43-B10 (1996)

Scaling Relations for the Turbulent, Non–Self-gravitating, Neutral Component of the Interstellar Medium. *Robert C. Fleck, Jr.* 458, 739, 49-A1 (1996)

ULTRAVIOLET: GALAXIES

The *Hubble Space Telescope* Quasar Absorption Line Key Project. VII. Absorption Systems at $z_{abs} \leq 1.3$. *John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, W. L. W. Sargent, Blair D. Savage, Donald P. Schneider, David A. Turnshek, Ray J. Weymann, & Arthur M. Wolfe.* 457, 19, 18-D11 (1996)

Relations between the Optical Fe II Emission and Ultraviolet Spectra in Active Galactic Nuclei. *Ting-Gui Wang, You-Yuan Zhou, & An-Song Gao.* 457, 111, 19-E11 (1996)

The Steep Soft X-Ray Spectrum of the Highly Variable Active Nucleus in Markarian 478. *H. L. Marshall, T. E. Carone, J. Michael Shull, M. A. Malkan, & M. Elvis.* 457, 169, 20-D1 (1996)

The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

Far-UV Spectral Variability in the Gravitational Lens Candidate UM 425. *A. G. Michalitsianos, R. J. Oliversen, & S. P. Maran.* 458, 67, 37-B3 (1996)

ULTRAVIOLET: GENERAL

High-Ionization Quasar Absorption Lines: A Test of the Existence of Hot Gas in Spiral-rich Groups. *John S. Mulchaey, Richard F. Mushotzky, David Burstein, & David S. Davis.* 456, L5, 7-B10 (1996)

ULTRAVIOLET: ISM

The Interstellar Boron Abundance toward Orion. *M. Jura, David M. Meyer, Isabel Hawkins, & Jason A. Cardelli.* 456, 598, 11-F1 (1996)

The Abell 35 Nebula Inside Out. *J. M. Hollis, D. Van Buren, S. N. Vogel, W. A. Feibelman, G. H. Jacoby, & J. A. Pedelty.* 456, 644, 12-C11 (1996)

The Gas and Dust Abundances of Diffuse Halo Clouds in the Milky Way. *Kenneth R. Sembach & Blair D. Savage.* 457, 211, 20-G11 (1996)

Highly Ionized Interstellar Atoms–Heated, Cooled, or Mixed? *Lyman Spitzer, Jr.* 458, L29, 42-G10 (1996)

ULTRAVIOLET: SOLAR SYSTEM

The Gaseous Sulfur Dioxide Abundance over Io's Leading and Trailing Hemispheres: *HST* Spectra of Io's $C\ ^1B_2$–$X\ ^1A_1$ Band of SO_2 near 2100 Å. *L. M. Trafton, J. J. Caldwell, C. Barnet, & C. C. Cunningham.* 456, 384, 6-C5 (1996)

ULTRAVIOLET: STARS

The 0.8 Day Orbit of the Precataclysmic Binary EUVE J1016−053. *John R. Thorstensen, Stéphane Vennes, & Stuart Bowyer.* 457, 390, 23-C8 (1996)

The Extreme-Ultraviolet Spectrum of the Nearby K Dwarf ϵ Eridani. *J. H. M. M. Schmitt, J. J. Drake, R. A. Stern, & B. M. Haisch.* 457, 882, 33-A11 (1996)

Hubble Space Telescope/FOS Spectroscopy of VW Hydri in Superoutburst. *M. Huang, E. M. Sion, I. Hubeny, F. H. Cheng, & P. Szkody.* 458, 355, 40-G9 (1996)

IUE Observations of Young Clusters in the Large Magellanic Cloud. *Eric M. Wilcots, Paul W. Hodge, & Nichole King.* 458, 580, 46-F13 (1996)

Goddard High-Resolution Spectrograph Observations of Procyon and HR 1099. *Brian E. Wood, Graham M. Harper, Jeffrey L. Linsky, & Robert C. Dempsey.* 458, 761, 49-C10 (1996)

WAVES

Waves in Radiating Fluids. *T. J. Bogdan, M. Knölker, K. B. MacGregor, & E.-J. Kim.* 456, 879, 15-F6 (1996)

Nonlinear Excitation of Global Modes and Heating in Randomly Driven Coronal Loops. *L. Ofman & J. M. Davila.* 456, L123, 17-D13 (1996)

Secular Evolution of Spiral Galaxies. I. A Collective Dissipation Process. *Xiaolei Zhang.* 457, 125, 19-G3 (1996)

Wave Motions in Molecular Clouds: Results in Two Dimensions. *Curtis S. Gehman, Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 457, 718, 30-G3 (1996)

Simulations of Nonaxisymmetric Instability in a Rotating Star: A Comparison between Eulerian and Smooth Particle Hydrodynamics. *Scott C. Smith, Janet L. Houser, & Joan M. Centrella.* 458, 236, 39-C10 (1996)

Solar Dynamo Surface Waves in the Presence of a Primordial Magnetic Field: A 30 Gauss Upper Limit in the Solar Core. *Nicholas Boruta.* 458, 832, 50-B13 (1996)

On the High-Frequency Behavior of Acoustic Waves within the Sun. *Gary H. Price.* 458, 850, 50-D7 (1996)

X-RAYS: BINARIES

Formation of Low-Mass X-Ray Binaries. I. Constraints on Hydrogen-rich Donors at the Onset of the X-Ray Phase. *Vassiliki Kalogera & Ronald F. Webbink.* 458, 301, 40-B9 (1996)

X-RAYS: BURSTS

Limits on Reported Transient Emission Events near 0.5 MeV from the Crab and 1E 1740.7−2942. *D. M. Smith, M. Leventhal, R. Cavallo, N. Gehrels, J. Tueller, & G. Fishman.* 458, 576, 46-F6 (1996)

X-RAYS: GALAXIES

The Intragroup Medium in Poor Groups of Galaxies. *John S. Mulchaey, David S. Davis, Richard F. Mushotzky, & David Burstein.* 456, 80, 2-B1 (1996)

Is the X-Ray Spectrum of the Seyfert 2 Galaxy NGC 5252 Intrinsically Flat? *M. Cappi, T. Mihara, M. Matsuoka, W. Brinkmann, M. A. Prieto, & G. G. C. Palumbo.* 456, 141, 2-G12 (1996)

Abell 2163: Temperature, Mass, and Hydrostatic Equilibrium. *M. Markevitch, R. Mushotzky, H. Inoue, K. Yamashita, A. Furuzawa, & Y. Tawara.* 456, 437, 9-E6 (1996)

Soft X-Ray Observations of a Complete Sample of X-Ray–selected BL Lacertae Objects. *Eric S. Perlman, John T. Stocke, Q. Daniel Wang, & Simon L. Morris.* 456, 451, 9-G2 (1996)

The Soft X-Ray Spectral Shape of X-Ray–weak Seyfert Galaxies. *Brian Rush & Matthew A. Malkan.* 456, 466, 10-A6 (1996)

Velocity Dispersions and X-Ray Temperatures of Galaxy Clusters. *M. Girardi, D. Fadda, G. Giuricin, F. Mardirossian, M. Mezzetti, & A. Biviano.* 457, 61, 19-A3 (1996)

The *ROSAT*-PSPC Spectrum of Bright Low-*z* Quasars. *M.-H. Ulrich-Demoulin & S. Molendi.* 457, 77, 19-B8 (1996)

The Steep Soft X-Ray Spectrum of the Highly Variable Active Nucleus in Markarian 478. *H. L. Marshall, T. E. Carone, J. Michael Shull, M. A. Malkan, & M. Elvis.* 457, 169, 20-D1 (1996)

X-Ray Constraints on the Intrinsic Shape of the Lenticular Galaxy NGC 1332. *David A. Buote & Claude R. Canizares.* 457, 177, 20-D12 (1996)

The Weak Blue Bump of H2106−099 and Active Galactic Nuclei Dereddening. *B. Grossan, R. A. Remillard, H. V. Bradt, R. J. Brissenden, T. Ohashi, & T. Sakao.* 457, 199, 20-F9 (1996)

X-Ray Constraints on the Intrinsic Shapes and Baryon Fractions of Five Abell Clusters. *David A. Buote & Claude R. Canizares.* 457, 565, 28-F1 (1996)

ROSAT Observations of the X-Ray Nebula around Arp 220. *Timothy M. Heckman, Michael Dahlem, Stephen A. Eales, Giuseppina Fabbiano, & Kimberly Weaver.* 457, 616, 29-C10 (1996)

Quantifying the Morphologies and Dynamical Evolution of Galaxy Clusters. II. Application to a Sample of *ROSAT* Clusters. *David A. Buote & John C. Tsai.* 458, 27, 36-E6 (1996)

Warm Absorber, Reflection, and Fe K Line in the X-Ray Spectrum of IC 4329A. *M. Cappi, T. Mihara, M. Matsuoka, K. Hayashida, K. A. Weaver, & C. Otani.* 458, 149, 38-B6 (1996)

X-Ray Reprocessing by a Molecular Torus in the Seyfert 1.9 Galaxy NGC 2992. *K. A. Weaver, J. Nousek, T. Yaqoob, R. F. Mushotzky, F. Makino, & C. Otani.* 458, 160, 38-C6 (1996)

Discovery of a Type 2 Quasar at $z = 0.9$. *Kouji Ohta, Toru Yamada, Kouichiro Nakanishi, Yasushi Ogasaka, Tsuneo Kii, & Kiyoshi Hayashida.* 458, L57, 51-G12 (1996)

X-RAYS: GENERAL

Cooling Flows and Metallicity Gradients in Clusters of Galaxies. *Andreas Reisenegger, Jordi Miralda-Escudé, & Eli Waxman.* 457, L11, 25-E6 (1996)

X-RAYS: ISM

Gamma-Ray Observations of the Crab Nebula: A Study of the Synchro-Compton Spectrum. *O. C. de Jager, A. K. Harding, P. F. Michelson, H. I. Nel, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 457, 253, 21-D6 (1996)

X-Rays from Mass-loaded Supernova Remnants in the Large Magellanic Cloud. *S. J. Arthur & W. J. Henney.* 457, 752, 31-C8 (1996)

X-RAYS: STARS

The X-Ray Light Curve of the Very Luminous Supernova SN 1978K in NGC 1313. *Eric M. Schlegel, R. Petre, & E. J. M. Colbert.* 456, 187, 3-E6 (1996)

Discovery of Three Radio Pulsars from an X-Ray–selected Sample. *Alex Zepka, James M. Cordes, Ira Wasserman, & Scott C. Lundgren.* 456, 305, 5-B12 (1996)

Long-Term Behavior of Centaurus X-3 Observed with the All Sky Monitor on Board *Ginga*. *Hiroshi Tsunemi, Shunji Kitamoto, & Keisuke Tamura.* 456, 316, 5-C13 (1996)

The Large Magellanic Cloud Supersoft X-Ray Binary RX J0513.9−6951. *David Crampton, J. B. Hutchings, A. P. Cowley, P. C. Schmidtke, T. K. McGrath, D. O'Donoghue, & M. K. Harrop-Allin.* 456, 320, 5-D6 (1996)

Orbital Decay in the X-Ray Binary LMC X-4. *Samar Safi-Harb & Hakki Ögelman.* 456, L37, 7-F13 (1996)

Corona(e) of AR Lacertae. I. The Temperature and Abundance Distribution. *K. P. Singh, N. E. White, & S. A. Drake.* 456, 766, 14-B13 (1996)

ROSAT X-Ray Observations of Nova V1974 Cygni: The Rise and Fall of the Brightest Supersoft X-Ray Source. *J. Krautter, H. Ögelman, S. Starrfield, R. Wichmann, & E. Pfeffermann.* 456, 788, 14-D13 (1996)

The Single-degenerate Scenario for Type Ia Supernovae in Cosmic Perspective. *R. Canal, P. Ruiz-Lapuente, & A. Burkert.* 456, L101, 17-B2 (1996)

Spin and Orbital Evolution in Low-Mass Binary Pulsars. *L. Burderi, A. R. King, & G. A. Wynn.* 457, 348, 22-F10 (1996)

Modeling Emission Lines from Dwarf Novae in Quiescence. *Yuan-Kuen Ko, Y. Paul Lee, Eric M. Schlegel, & Timothy R. Kallman.* 457, 363, 23-A3 (1996)

Determinations of Metal Abundances from *ROSAT* Observations. *Franz Bauer & Joel N. Bregman.* 457, 382, 23-B11 (1996)

A High-Resolution X-Ray Spectrum of Centaurus X-3. *M. D. Audley, R. L. Kelley, E. A. Boldt, K. M. Jahoda, F. E. Marshall, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, & K. A. Weaver.* 457, 397, 23-D4 (1996)

The Magnetic Field of the Intermediate Polar RE 0751+14. *H. Väth, G. Chanmugam, & J. Frank.* 457, 407, 23-E3 (1996)

Transient X-Ray Sources, Luminosity Gaps, and Neutron Star Densities. *Robin H. D. Corbet.* 457, L31, 26-A10 (1996)

A New Model for Black Hole Soft X-Ray Transients in Quiescence. *Ramesh Narayan, Jeffrey E. McClintock, & Insu Yi.* 457, 821, 32-C1 (1996)

The Polarization of X-Ray Binaries in the Ultraviolet. I. Cygnus XR-1, 4U 0900−40, and 4U 1700−37. *Karen G. Wolinski, Joseph F. Dolan, Patricia T. Boyd, James D. Biggs, Matthew J. Nelson, Jeffrey W. Percival, M. Taylor, & G. W. van Citters.* 457, 859, 32-F10 (1996)

Correlating Coronal Temperature and Gravitational Potential: A Test of the Nonthermal Boundary Hypothesis. *L. L. Williams & D. J. Mullan.* 457, L95, 35-A9 (1996)

Timescale Invariance of Rapid X-Ray Variability of the Black Hole Candidate GRO J1719−24. *F. van der Hooft, C. Kouveliotou, J. van Paradijs, B. C. Rubin, D. J. Crary, M. H. Finger, B. A. Harmon, M. van der Klis, W. H. G. Lewin, J. P. Norris, & G. J. Fishman.* 458, L75, 52-C2 (1996)
